

You can not brush bad breath away

Almost everyone uses tooth paste... yet almost everyone has bad breath occasionally. Germs in the mouth cause most bad breath. No tooth paste kills germs the way Listerine Antiseptic does—on contact, by millions. Listerine stops bad breath four times better than tooth paste. Rinse with Listerine every time you brush your teeth.

*Furniture
with a
Future*

BY RUTH W. LEE, HOME-FURNISHINGS CONSULTANT

WHEN YOUNG homemakers set out to select their first furniture, the idea usually is to choose pieces that fill present needs and, later on, adapt to larger quarters. Could be quite a problem if it weren't for furnishings like Paul McCobb's "Linear" group. These well-thought-out designs look forward to a bright and useful future. The sectional sofas handsomely occupy right-angle corners or just as easily come out into

the open to serve as room dividers. Oblong coffee tables level off with sofa and chair cushions in order to double as corner and end tables, too. And good-looking chests that provide ample storage space may be used in the dining room, bedroom, hallway, or almost anywhere you wish. Best of all, the timeless quality of the clean lines means these furnishings should be as appealing 20 years from now as they are today.

Providing maximum seating space in a small room is a sectional sofa with separate back cushions. Its brass legs match the frame of the oblong travertine-topped coffee table.

A couple of love seats spaced by a lamp table with travertine top and bank of drawers make up an attractive corner setting. This arrangement allows for plenty of leg room.
