the way
**Chewing-Gum
Laxative**
acts chiefly to

REMOVE WASTE- NOT GOOD FOOD

Here's a secret millions have discovered about FEEN-A-MINT, the wonderfully different chewing-gum laxative.

FEEN-A-MINT is different because you chew it. It's different, too, because it removes mostly waste—not good food! FEEN-A-MINT does not work in the stomach, where food is being digested. That's why it does not take away a lot of the good food you need for energy.

Doctors know that FEEN-A-MINT works chiefly in the lower bowel...removes mostly waste, not good food! And it's non-irritating, too.

So to feel like a million, chew delicious FEEN-A-MINT. 16 tablets, 35¢—also small and economy sizes.

Shrinks Hemorrhoids New Way Without Surgery

Science Finds Healing
Substance That Relieves Pain
—Shrinks Hemorrhoids

For the first time science has found a new healing substance with the astonishing ability to shrink hemorrhoids and to relieve pain—without surgery.

In case after case, while gently relieving pain, actual reduction (shrinkage) took place.

Most amazing of all—results were so thorough that sufferers made astonishing statements like "Piles have ceased to be a problem!"

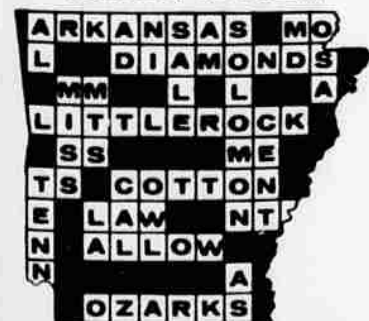

The secret is a new healing substance (Bio-Dyne®)—discovery of a world-famous research institute.

This substance is now available in suppository or ointment form under the name of Preparation H®. Ask for it at all drug counters—money back guarantee.

DOES GETTING UP NIGHTS MAKE YOU FEEL OLD

NEW YORK—Special: Thanks to new, scientific laboratory formulation, thousands of men and women now escape feeling old, tired, irritable and depressed from losing sleep and worrying about "Bladder Weakness"—too frequent, burning and itching urination, Bed Wetting, Getting Up Nights—or Strong Cloudy Urine, due to common Kidney or Bladder Irritations, which often result in secondary Backache, Headache and Nervousness. In such cases New Improved CYSTEX usually gives quick, calming relief by combating irritating germs in acid urine; and by relaxing, analgesic pain relief. Over a billion CYSTEX tablets used—proves safety and success. Get Laboratory Tested and Certified CYSTEX at drugist today. See how much better you feel tomorrow. Money back guarantee.

SOLUTION TO PUZZLE

DIAPER RASH

Tornado (Continued)

five seconds of silence and pressure so severe it made my ears pop. Then came the second blast."

His ranch home was torn loose at the floorboards and destroyed. His car, which had been parked in the driveway, was found crushed a block away. But the man—one of the few persons ever to survive the heart of a tornado—lived to confirm that the twister had two walls and a hollow center. The sudden pressure drop was also confirmed by his household barometer; it was found in the ruins, its needle stuck nearly three points lower than the lowest reading recorded a few blocks away at North Dakota Agricultural College.

THE SECOND forecasting tool is radar, which is also used in research.

One of the most successful warning systems is the Texas Radar Tornado Warning Network, established after the 1953 tornado season, the worst in history. Volunteers periodically scan the skies through radar scopes; when unusual echo activity is noted, they alert all stations.

The year after the network was established, only two Texans lost their lives in tornadoes. Even last year, when a tornado roared into the heart of Dallas, a city of nearly half a million people, only 10 met death.

Even more effective than ground radar, limited because storms must pass within about 50 miles of it, is airborne radar. It generally receives better signals and can seek and follow approaching storms.

The dream of forecasters is to blanket the country with warning networks which, supplemented by radar and aircraft, could pinpoint tornado-producing storms with lifesaving accuracy.

Great hope is held for a third tool, an electronic gadget with a strange-sounding name, sferics. This detection device, which measures the frequency of electrical discharges within a thunderstorm, has revealed that the frequency of the discharges increases with the severity of the storm. More important, it indicates that maximum activity may occur just prior to a tornado.

This comes close to pinpointing a tornado before it happens.

Real accuracy in pinpoint forecasting, however, will have to wait until research reveals the exact nature of a tornado and the storm that produces it. Again, radar has helped here.

Some remarkable radar photographs, taken of a tornado storm by the Illinois State Water Survey's meteorological subdivision, showed a hook-shaped formation, like a figure "6," at the edge of the storm (see photo). Later reports from areas where the tornado struck proved that the tornado funnel was in the hook, a new clue to its exact location within a storm.

Research at the University of Chicago expanded on this information. Using the photos, and others of subsequent tornadoes, and charting them with painstaking detail against weather data available for the days the tornadoes occurred, Dr. Tetsuya Fujita produced "the equivalent of a motion picture" of the mechanism of a tornado. His method showed that the tornado "occurs within a whirling circulation several times larger than the tornado itself. The outer edge acts like a gear, turning a smaller inner gear (the tornado) at a much higher speed."

Fujita believes that if this "mother cloud," which is usually 10 times the size of the tornado, can be identified early in its formation, the immediate area where a tornado may strike can be pinpointed.

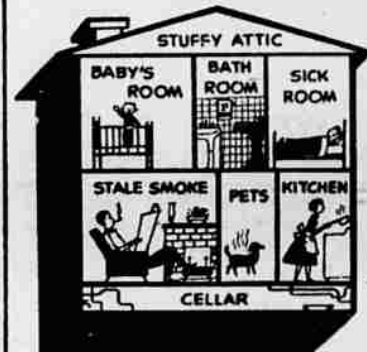

Some meteorologists, looking beyond mere pinpointing of tornadoes and other severe storms, hope some day to eliminate them altogether. Their talk today sounds as wild as space-travel talk of yesterday, but there is some logic on their side. Cloud seeding has had mild success, and large oil fires and mild explosions have also been advocated as methods which may dissipate the energy in a storm before it reaches the violent stage.

Whatever the methods, man may yet learn how to tame the tornado and, instead of suffering from Nature, put its tremendous power to work for good.

"Here comes the hot chocolate man!"

Colgate's new Florient aerosol air deodorant kills room odors fast

Makes air smell
flower-fresh

If you have a Serious Odor Problem Make this FREE TEST!

1. We will send you one week's supply of NULLO free and postpaid. The magical ingredient it contains—extracted from fresh, sweet alfalfa—safely neutralizes the most stubborn odors, internally, BEFORE THEY FORM.
2. Foot odors, under arm odors, breath odors—even menstrual and colostomy odors—simply can't exist when NULLO is used regularly. Try it, FREE!
3. Send your name on the coupon below. Your Seven Day Trial packet of NULLO will be mailed free, postpaid. THE DE PREE CO., Dept. 774, Holland, Mich.

THE DE PREE CO., Dept. 774, Holland, Mich.
Please mail postpaid a Seven Day Supply of NULLO with directions for use. There is no charge to me now or at any other time.
