

DARK DAYS ARE UPON US, MEN!—Marilyn Monroe has taken to the sack dress. Gone are the days when MM's famous curves could be seen and appreciated, as shown at right during her tour of Korea in 1954. Photo at left shows sack-clad Marilyn after she signed a contract to return to the screen after an absence of nearly two years. Sad, truly sad.

Rock-and Roll Music Helps Hoop Players

Beckley, W.Va.—Beckley college basketball coach Bill Bowman set a record player to produce rock-and-roll-sounds during his team's practice sessions. Bowman said the music keeps the players from feeling

Schooner Idled After 69 Years

Rockland, Me. — The two-masted schooner Eva S. Cullison has been drydocked after 69 years of sailing the East Coast.

The all-white craft recently was towed into Lermond's Cove here where she will be used as a training ship for the local unit of the U. S. Coast Guard Reserve.

The vessel was built in Baltimore in 1888, and formerly plied the Bahama fruit trade. Since 1951, Capt. Frank Swift of Camden, Me., had operated the Eva S. Cullison as one of his summer wind-jammer cruise ships.

She has been called the last of the Baltimore-built, Chesapeake Bay coastal schooners.

Sky Provides Clue To Shock Absorbers

Chicago — Scientists looked to the sky to find the solution to the problem of shock absorbers for bulldozers.

Scientists at the LeTourneau-Westinghouse Co. truck division noted that since hydraulics and air were used by airplanes to cushion landings, the same method could be used for heavy earth-moving equipment.

Ralph H. Kress, manager of the division, said the similarity of problems between airplanes and earth-moving equipment resulted in a new type of suspension that provides for fast travel over uneven terrain with a minimum of shock.

The wheel suspension unit consists of only two parts, he added, a stationary cylinder secured to a frame and a moving piston secured to and operating with each wheel.

License System Would Be Ended

Boston — For about 60 years, Massachusetts has had a unique aristocracy, based on low numbers of automobile registration plates.

No. 1 plate is still in the possession of the family that had it before the turn of the century.

Now, Rep. Charles W. Capraro (D-Boston) has filed in the legislature a bill to end this system. Under his proposal, number plates would be issued in the numerical order of the application.

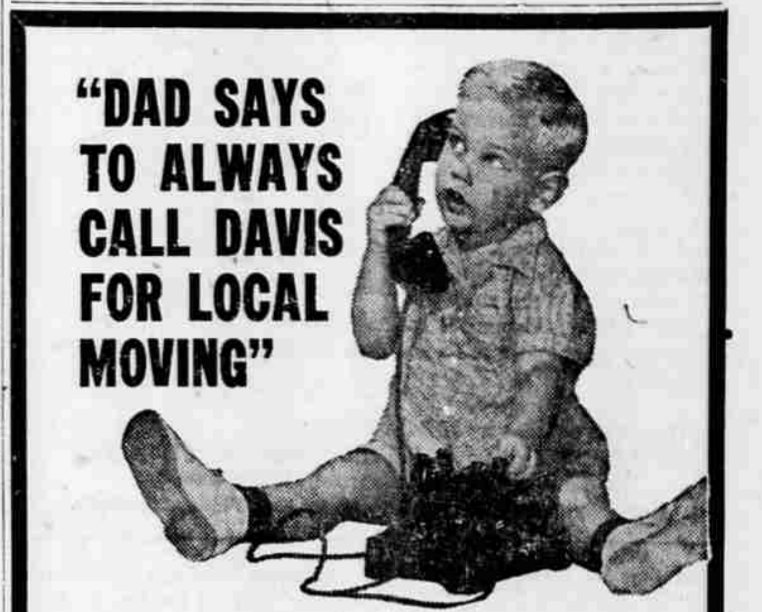

"Every motorist pays the same registration fee for the same type of vehicle," he said, "and all should be treated alike."

Cumberland Forest Has Natural Bridges

Stanton, Ky. — Sky Bridge and Natural Bridge, both located near here, are two of the largest of 12 natural bridge formations to be found in Cumberland National Forest. Natural Bridge towers more than 100 feet high. The center of the arch is 30 to 40 feet thick and 50 feet across.

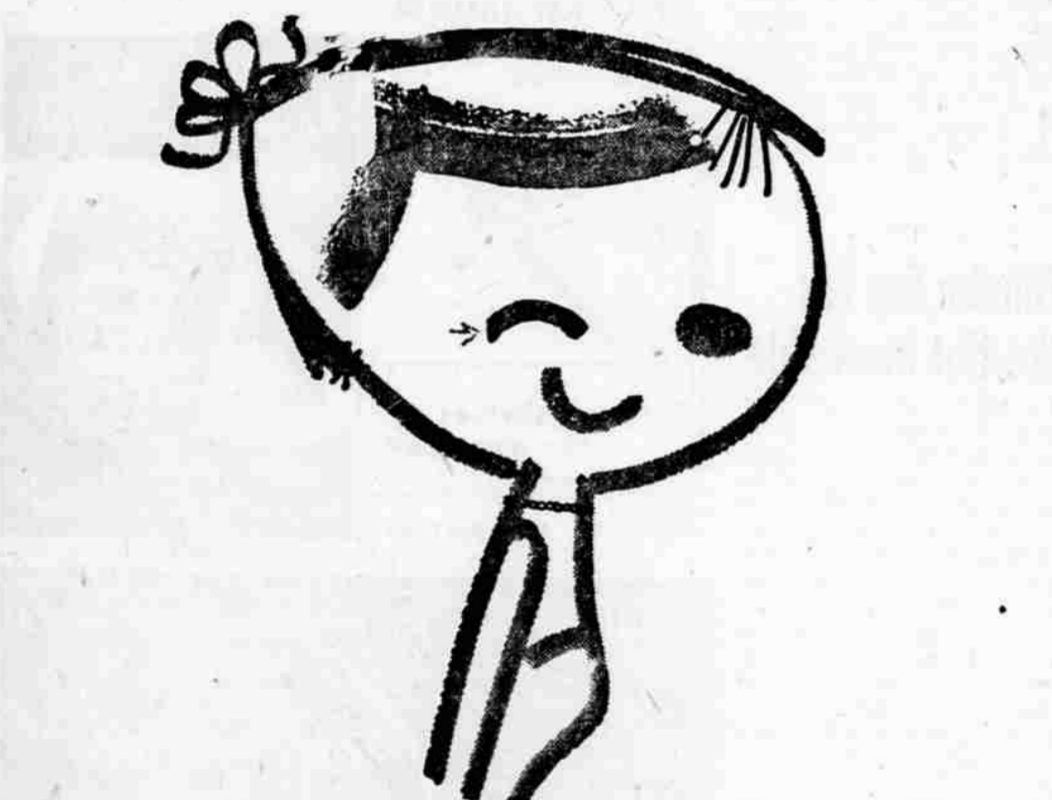

HERMIT BUYS PRIVACY
Washington — A hermit, metropolitan-style, set the dining room staff of the Sheraton-Park hotel on its ear. He reserved 15 tables, and then showed up alone—saying he didn't like people eating around him.

When hiking, rest often, especially before and after eating—so suggests the Boy Scouts of America.
