

## Bank Manager Says Campaign Will Keep The Economy Strong

Medford — Attention high school and college students scouting summer jobs: **UNCLE SAM WANTS YOU!**

A Civil Service Commission list of summer job openings with the government range from typists to park rangers, from veterinarians to engineers, from weather men to graders of meats.

A student anxious to get three-months free of his professor, however, may find his teacher working right beside him. A number of government agencies are also looking for college professors to fill summer jobs.

Most summer workers are hired either as student assistants or student trainees. Student trainees must pass a civil service test. Frequently, they become full-time government employees after graduation. Minimum age usually is 16.

**No Examination**

No civil service examination is required for student assistants. They must seek employment related to their field of studies and are not allowed to work more than 130 days a year.

High school students generally are paid \$246 a month. College freshmen and sophomores get \$264 and college juniors \$284.

Summertime typists and stenographers, hired under a different program, must pass a civil service test.

Teachers primarily are hired for jobs "of a scientific, professional, or analytical nature." They sometimes are retained as consultants after the summer season is over.

Post offices around the country hire their own summertime workers.

**Work-Study Training**

Some federal agencies offer work-study training programs to college students in pairs. One student works while his partner attends classes. At the end of each school quarter they swap places.

It usually takes five years to finish college under this plan—36 months in school and 24 months on the job. Students are paid \$347 to \$306 a month during their work periods.

Further information can be obtained from the Civil Service commission here or from its 11 regional offices throughout the country. The agency for which the student would like to work also can supply the data.

The first automobile with left-hand steering was the Northern Four-Cylinder, produced in 1907 by the North American Car company, Detroit.

sentiment, Hedberg said. There is little mathematical proof that a severe recession lies ahead, but there is evidence that we can talk ourselves into one, he believes. The present local promotion should be of great help to our business atmosphere, he added.

Bank deposits are up 24 million in Oregon for the first three months, compared to the same period in 1957. It is a gain of cash in savings accounts, while there has been a decline in total checking account deposit balances.

This is another sign that some have adopted a wait and see attitude, the local banker said. He feels that spending today for reasonable needs is a healthy stimulant to our economy. From such spending comes business activities that mean work, wages and continued payrolls.

If under normal circumstances you would buy a new car now, go on and do it, Hedberg advised. Don't be influenced by talk of recession, because recessions are continued by those who stop doing what they normally do without particular reason, thus causing unemployment and more recession, he concluded.

The local promotion program will continue through May 10, with dealers agreeing to remain open until 9 p. m. each evening during the campaign. They will not open on Sunday, it was stated.

## Mayor Supports Program to Help

Medford's "Keep Medford's Economy Rolling . . . You Auto Buy Now" campaign, scheduled for May 1 through 10 received endorsement from Medford Mayor John Snider.

"The automobile dealers of this area are to be commended," he said, "for developing what seems to me to be the ideal answer to recession psychology: more sales. I feel certain that the whole business picture here will be benefited by this all-out effort. My best wishes go to the planning committee of the dealers group and to all of the business community for a most successful campaign."

**Planned Display**

Many of the new car dealers have planned unusual displays, in addition to the full line floor models that virtually all of them will be showing at values.

Demonstration rides will be featured highlights of the sales presentations by incentive dealers.

A parade, contests, most awards to the public, new car buyers and to salesmen will be a part of the 10-day promotional period.

Cochairmen of the planning group, Hugh Coleman and Darrell Miller, said, "we are confident that this investment of money and the time of over a hundred community leaders, will be well spent. It can create a lasting benefit for the community."

## Mobile Homes Show Increase in Sales

Chicago — Sales of mobile homes showed an increase for the third straight year, according to the Mobile Homes Manufacturers association.

Robert McMakin, association president, said that the number of mobile homes shipped to dealers during 1957 totaled approximately 140,300 units. He said the increase was slightly more than 600 units over the number produced in 1956.

McMakin noted that over-size units measuring 10 feet in width continued to grow in popularity as the industry turned out an estimated 50,500 of the larger rolling homes in 1957. He said the figure compared with a 1956 total of just over 29,500.

Travel trailers popular with outdoor enthusiasts, accounted for 11 per cent of shipments, McMakin said.

## Civil Service Jobs Available During Summer for Pupils

Washington — Attention high school and college students scouting summer jobs: **UNCLE SAM WANTS YOU!**

A Civil Service Commission list of summer job openings with the government range from typists to park rangers, from veterinarians to engineers, from weather men to graders of meats.

A student anxious to get three-months free of his professor, however, may find his teacher working right beside him. A number of government agencies are also looking for college professors to fill summer jobs.

Most summer workers are hired either as student assistants or student trainees. Student trainees must pass a civil service test. Frequently, they become full-time government employees after graduation. Minimum age usually is 16.

**No Examination**

No civil service examination is required for student assistants. They must seek employment related to their field of studies and are not allowed to work more than 130 days a year.

High school students generally are paid \$246 a month. College freshmen and sophomores get \$264 and college juniors \$284.

Summertime typists and stenographers, hired under a different program, must pass a civil service test.

Teachers primarily are hired for jobs "of a scientific, professional, or analytical nature." They sometimes are retained as consultants after the summer season is over.

Post offices around the country hire their own summertime workers.

**Work-Study Training**

Some federal agencies offer work-study training programs to college students in pairs. One student works while his partner attends classes. At the end of each school quarter they swap places.

It usually takes five years to finish college under this plan—36 months in school and 24 months on the job. Students are paid \$347 to \$306 a month during their work periods.

Further information can be obtained from the Civil Service commission here or from its 11 regional offices throughout the country. The agency for which the student would like to work also can supply the data.

The first automobile with left-hand steering was the Northern Four-Cylinder, produced in 1907 by the North American Car company, Detroit.

**CONGRATULATIONS ARE GIVEN** Mary M. Smith (left), Huntsville, Ala., named "Miss Secretary of 1958" by Miss Leatrice Youth, Honolulu, runner-up, during meeting in Washington, D. C., of National Association and Council of Business Schools. Winner is married. (International)

**IMMIGRATION 'ERROR'**—Mrs. William Heikkila is shown at a press conference in San Francisco holding a radio-photo of her husband as he stood before the passport examiner's window in Helsinki, Finland. Heikkila will be returned to this country at U. S. Government expense, after being forcibly deported "cloak-and-dagger" manner. The U. S. Immigration Service has admitted that the affair was "an error in judgment."

**IN PLANE CRASH DRAMA**—An intensive air and ground search is being conducted in snowy central Oregon plateau country for the wife (right) of orchestra leader Bruce Davis (left), 36, of Fresno, Calif., who stumbled into a Danville, Ore., ranch home after walking more than three days from the scene of his wrecked plane. The Davises had been objects of an intensive search since they were last heard from while on a flight from Fresno to Spokane, Wash. Davis said he believed his wife's condition was good and that no bones were broken. However, he said, she was unable to walk.

An entirely new type of semi-conductor amplifier can handle higher frequencies than the transistor and operate at higher temperatures. In size, it is "four pinheads long and one pinhead wide."

The level of the Mississippi river between dikes in New Orleans is normally about three feet above sea level and is also often well above the average level of the city's streets.

## Chamber Board Supports Drive

The board of directors of the Jackson County Chamber of Commerce voted unanimously to endorse a community-wide program to stimulate consumer buying proposed by the Medford Automobile Dealers association and supported by other business groups.

Endorsement came at a meeting of chamber directors recently in Medford. The presentation of the program was made by Bob Taylor, Medford automobile dealer, and Russ Jamison, public relations consultant and second vice president of the Chamber of Commerce.

The program will be patterned after similar programs which have been staged successfully in more than 100 cities across the country and being considered by "perhaps 300" more, Taylor stated.

The local program will be conducted during the period May 1 through May 10 and will be the first such promotion staged in this area on such an ambitious scale, spokesmen said.

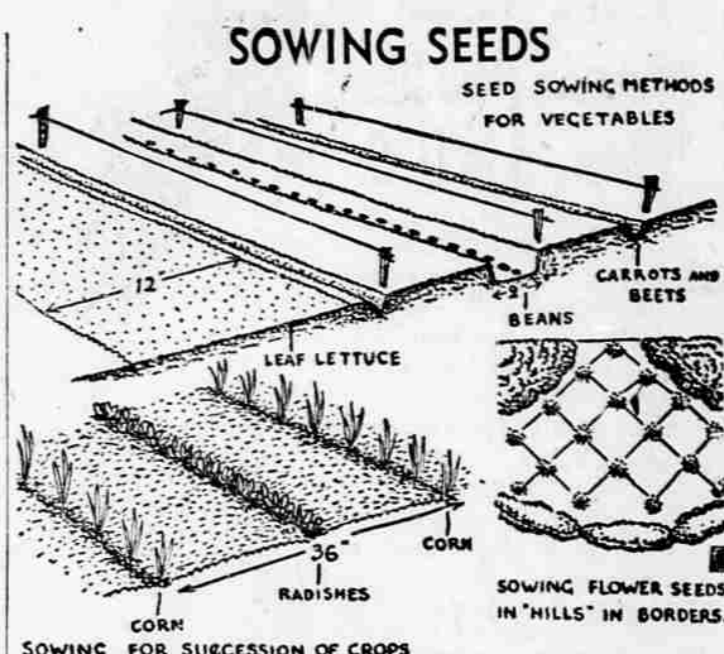

It will be termed the "Keep Medford's Economy Rolling—You Auto Buy Now" campaign to reflect the optimistic business outlook for the area.

## Candy Industry Sets Two Records in Year

Chicago — The average American munched his way through 17 pounds of candy in 1956 and helped the candy industry set two records.

The 17-pound figure is higher than the preceding two years, but the all-time record is 20 pounds per person set in 1944.

The records, according to Encyclopaedia Britannica, were in overall sales—more than three million pounds—and wholesale cost, \$1,200,000,000.

Gardening has a language all its own. You don't need to join the army to "drill." It simply means that seed is sown in a furrow cut in the soil with a hoe or stick. "Broadcast" has nothing to do with radio or television. It means to scatter seed over a wide area of ground. A "hill" is not a hill at all. To gardeners it means that a few seeds are planted in a little circle.

Most vegetables are seeded in drills (or furrows, if you prefer) although a few, such as leaf lettuce (see diagram) are broadcast and some, such as cucumbers and squash, are planted in hills.

Annual flowers for the most part are seeded outdoors by the broadcast method. Seeds large enough to pick up in the fingers, such as marigolds and zinnias, may be placed three to a hill, the hills being spaced about a foot apart as shown in the diagram.

Before sowing any seed outdoors the soil should be turned over, fertilized and raked smooth. As a rule, the smaller the seed, the shallower it is planted.

Tiny petunias and snapdragons seeds can be pressed gently into the soil after the seed is broadcast from the packet. Nasturtiums, sunflowers, beans and corn can either be pressed into the soil about a half-inch or if they are sown in drills, the furrowed soil should be pushed back over them to about that depth.

Fabricated metal products are made by more than 16,000 U. S. factories.

First pure nickel is believed to have been prepared in about 1804.

### GET OUT OF THE RUT!

# YOU AUTO BUY NOW!

Those old car blues got you down? Are you pining to be shining in a sleek, modern motor marvel of the highway? Be blue no longer. "Auto Buy" Week is in town. During this festive event Medford dealers will roll out the biggest bargains since the Dutch picked up Manhattan Island for \$24! It's all part of keeping Medford's economy healthy. If everyone who needs a newer car makes that purchase now it can't help but reflect in a boost in local and national economy.

### Whizzing down the turnpike in your new 1958 Flashmobile can give you a mighty satisfying feeling. Satisfying, too, is the wonderful taste of fresh, cold milk with every meal! Milk is good—and good for you! After all, it's nature's most perfect food! Enjoy some with every meal—and with those in-between snacks, too!

Drink at Least—**3** Glasses of MILK a Day!
