Blight Reported in Hawthorne Bushes

Blight has been reported in the valley hawthorne and pyracantha shrubs, according to Clifford B. Cordy, county horticulturist.

Although the blight also is found in pear and apple trees, the widest infection this year has been found in hawthorne bushes, he said.

A plant infected with blight will have dead branches or twigs with the leaves still clinging to them, it was reported. All dead parts of the shrub must be cut out well below where any discoloration is visible.

He said the infected branch should be nicked with a knife to a spot where no discoloration is noted. Then with another tool the branch should be cut off one to one and a half feet below the infected area. He explained that blight is a bacterial disease which infects the branch before it turns dark.

He added that cutting out of the infected areas is the only cure for blight infections in these shrubs and trees.

Carrier Demands Lead Market Higher

New York —(UPI)—Rails led the stock market higher today.

Demand for carrier stocks developed after Senate-House tax conferees agreed to repeal the 3 percent tax on freight transportation.

Selected industries showed numerous gains running to a point or more. A few were up as much as three points. Chemicals were strong as a group, with DuPont and Eastman Kodak up a point or more each. Chrysler was up around a point in a firm auto section. Eastern Stainless Steel ran up around three points at its high. However, most of the steel leaders lost small fractions.

Oils favored the upside, with Richfield, Shell and Amerasia up a point or more each. Sinclair hit a new high. Kennecott and National Lead ran up more than a point each in the non-ferrous metals.
