Tillamook Fire Burned 250,000 Acres Twenty-five Years Ago

Salem—One o'clock on the afternoon of Aug. 14 marks a quarter of a century since the first Tillamook fire broke out in the Gales creek canyon in northwestern Oregon.

It was 10 days later that it "blew up" and within a matter of 20 hours, an area of 40,000 acres that had been burned over during the first 10 days of the fire had grown to 250,000 acres. More than 12 billion board feet of Oregon's finest timber was killed.

On that early morning of Aug. 14, the sun rose clear and hot. An east wind swept across the valley and into the slopes of the Coast range. As morning advanced, the wind grew stronger. It rustled through the forests. It absorbed the moisture from the slashings, the twigs and moss on the trees and the debris on the forest floor. It was a restless and uneasy day in the forest.

Urged Closing
Foresters urged the loggers to close operations. In those days there was no law forcing such action. It was voluntary only. Up in the Gales creek canyon, 15 miles out of Forest Grove, a logger had a single log to bring in before closing. As the huge Douglas fir ground its way to the landing, the fire had carried to the top of a tall snag nearby. The east wind caught burning debris and carried it half a mile across the canyon into an area of tinder dry slashings. The fire literally exploded. A wall of flame was carried directly into the nearby stand of aged Douglas fir. It halted for an instant and then flamed through the tops of the trees with a roar that could be heard down in the valley.

The fire call rang through the woods. Before the loggers could bring their fire fighting tools from the landing, the fire had carried to the top of a tall snag nearby. The east wind caught burning debris and carried it half a mile across the canyon into an area of tinder dry slashings. The fire literally exploded. A wall of flame was carried directly into the nearby stand of aged Douglas fir. It halted for an instant and then flamed through the tops of the trees with a roar that could be heard down in the valley.

Men were called from the fields, the forests, and the cities. A thousand enrollees from the Civilian Conservation Corps hit the fire. They fought it for 10 days, losing lives, backing up and putting in others. They were heartened during the approach of the first 10 days by a slight rain and it was nearly controlled. By that time, about 40,000 acres had been burned.

Picture Changes
But with the coming of daylight on the morning of Aug. 24, the picture had changed. An east wind blew across the valley floor with a force that picked up dust from the summer fallow. Foresters knew the threat and ordered fire fighters and families away from the west side of the fire.

Over a 15-mile front the Tillamook fire broke out with a fury like the eruption of a giant volcano or the explosion of an atomic bomb. It rolled through the forest with a frightening force, uprooting trees, twisting them off, cracking the cliffs with the terrific heat. Some of the fire crew, with inexperienced men verging on panic, were brought out to safety under the guidance of the experienced men. Families along the Wilson and Trask rivers made their way to safety in the coastal area.

Along the Pacific coast charred needles of the trees, ashes and cinders fell in the streets of the cities to a depth where they could be scooped up in shovels. A choking, blinding smoke settled in the valley and cars crept along in a cloud denser than any fog that ever rolled in from the Pacific.

Fog Rolls In
But late that evening the east wind died down, and a fog rolled in from the Pacific ocean, the first in a number of days. But the 40,000 acres of that morning had grown to 257,000 acres just 20 hours later.

It was on that day that Oregon made the unenviable record of being the location of one of the nation's historic fires of modern times. This one was added to those of bygone days—the Nestucca fire of 1848, the Yaquina fire of five years later, and the Coos Bay fire of 1868.

But the 1933 Tillamook fire was not the end of the tragedy. In 1939 another logger was careless and the second Tillamook fire got away, covering some 200,000 acres, much of it in the original burn. And again in 1945 at the regular six-year interval, the third fire broke out on the burn and 180,000 acres was covered before it was brought under control. Out of these three fires, a total of

350,000 acres of forest land had been devastated and 13.5 billion board feet of timber killed.

But that last fire really made the headlines. The newspapers sent their reporters and photographers out on the fire line. They fed the news and the pictures to the papers. Startling and tragic stories, full of human interest went into the papers and over the air. The editors demanded that something be done to reclaim this lost empire and if the state could not do the job, then it should be turned over to the federal government.

State Meets Challenge
The state met the challenge and the voters in 1948 approved a bond issue without limitation of either time or amount. It furnished the available money to go ahead with the work of forest rehabilitation. In 1949 the legislature passed the enabling bill and the work got under way on July 1 of that year. It was a job that exceeded any that had ever been attempted by any state or federal agency. It was without precedence of a guide for the state forestry department.

But work got under way with two main objectives in mind. The first was to reforest all areas necessary and the second not to plant a tree or seed an acre of land unless there was reasonable assurance that it could be protected from fire.

In line with this policy, a continuous corridor was designated along the primary ridges throughout the burn where all the snags would be felled, fire lines built down to mineral soil, and all inflammable debris cleared for a distance of many feet on each side of this line. A block might be lost during an extreme fire situation but that would be all.

Areas were designated which were suitable for aerial seeding and those where planting would be necessary. As the work progressed, look-out houses were constructed, roads maintained and built, additional crews placed in the field during the fire season, and a 60-man camp established on the Wilson river as a permanent fixture.

Work Accomplished
During the period that the work has been carried out, it has seen 25,000,000 trees planted on 31,000 acres of forest land. 57,336 acres have been aerially seeded, 771,872 snags felled, and 140 miles of fire breaks constructed.

The little trees are beginning to show their terminals above the fern and brush in parts of the forest. They are a promise of future forests, future industry, and future recreational facilities.

The Tillamook burn will eventually become a green forest and a place in which to work and play.

PLANE CRASH SETTLEMENT—Vito Michael Galasso Jr., 14, one of the children injured when a Douglas transport collided in mid-air with a Northrop jet and fell into the yard of the junior high school at Pacoima, Calif., is shown with his parents at the court in San Fernando, Calif., after a \$105,000 settlement was approved by Superior Judge William Neely. Vito suffered burns over 40 pct. of his body when the burning wreckage fell into the school yard.

Ex-Assistant to Ike Takes New Position

Durham, N. C. — Arthur Larson, former special assistant to President Eisenhower, will assume new duties Sept. 1 as director of the new Rule of Law Center at Duke University.

Duke president, A. Hollis Edens, announced the appointment Monday a few hours after Larson resigned from his White House post.

The center was founded to stimulate acceptance of the rule of law at the international level, including its use in settling disputes affecting the world peace.

Larson, 48, became a special assistant to President Eisenhower in 1957 after serving as director of the U. S. Information Agency and as Undersecretary of Labor. He formerly taught law at the University of Tennessee and Cornell university and was dean of the University of Pittsburgh law school.

Harbor Logger Killed In Accident Monday
Brookings —UPI— William Hempel, 35-year-old Harbor, Ore., logger, was killed Monday in the Boulder Creek area when a log fell from loading tongs and struck him on the head.

He was an employee of the Warren-Albertson logging company of Harbor.

NOTICE OF SCHOOL ELECTION UPON QUESTION OF INCREASING TAX LEVY OVER AMOUNT LIMITED BY SECTION 11, ARTICLE XI, STATE CONSTITUTION

Notice is hereby given that an election will be held in School District No. 62 of Jackson County, State of Oregon, from 2:00 P.M. to 8:00 P.M. on August 23, 1958, at schoolhouse in said school district, for the purpose of submitting to the legal voters of said district the question of increasing the tax levy for the fiscal year 1958-1959 over the amount limited by section 11, article XI, of the Constitution of Oregon.

The reasons for increasing such levy are:

As this District has no tax base, the total amount necessary to balance budget is considered in excess of the 8% limitation. Budget has been reduced \$7422.50 since last election.

The amount of tax, in excess of the 8% limitation, proposed to be levied for said fiscal year is \$36,737.87.

Dated this 28th day of July, 1958.

And again in 1945 at the regular six-year interval, the third fire broke out on the burn and 180,000 acres was covered before it was brought under control. Out of these three fires, a total of

350,000 acres of forest land had been devastated and 13.5 billion board feet of timber killed.

But that last fire really made the headlines. The newspapers sent their reporters and photographers out on the fire line. They fed the news and the pictures to the papers. Startling and tragic stories, full of human interest went into the papers and over the air. The editors demanded that something be done to reclaim this lost empire and if the state could not do the job, then it should be turned over to the federal government.

State Meets Challenge
The state met the challenge and the voters in 1948 approved a bond issue without limitation of either time or amount. It furnished the available money to go ahead with the work of forest rehabilitation. In 1949 the legislature passed the enabling bill and the work got under way on July 1 of that year. It was a job that exceeded any that had ever been attempted by any state or federal agency. It was without precedence of a guide for the state forestry department.

But work got under way with two main objectives in mind. The first was to reforest all areas necessary and the second not to plant a tree or seed an acre of land unless there was reasonable assurance that it could be protected from fire.

Week's Sewing Buy Crop Production Up, Land Acreage Down

Washington —UPI— American farmers are producing by far the largest crop in U.S. history this year. And they're doing it on the smallest acreage in 40 years.

The Agriculture Department's August crop production estimate Monday said the 1958 crop will be 113 per cent of the 1947-49 base period. This compares with previous record crops, which were 108 per cent of the base period, in 1948, 1956 and 1957.

The department said gains in yield prospects during July now seem likely to make 1958 the nation's biggest crop year "by far."

Eugene Market Held Up For \$203 Monday

Eugene —UPI—A man wearing a bright plaid shirt and brandishing a revolver took \$203 from Mark's Market here Monday evening and escaped in a car. Police said roadblocks were up around the area.

Mark Smith, owner of the market, said a man with black wavy hair with a gray streak in it walked in about 6:50 p.m. and demanded money. The robber stuffed the bills, all ones and fives, into a brown satchel and climbed into a car outside.
