

Hay Fever Patients now open Nose-Sinus Zone with New 3-Layer Tablet

Clear, free breathing restored in minutes as congested nasal zone is decongested—stops sneezing, watery, itching eyes

Chicago, Ill. (Special) Observers here are hailing a remarkable new advance against the most unrelenting misery of hay fever—congestion in the nose-sinus zone.

A way has been found to decongest this congestion. This is the central fact which has aroused so much interest on the part of hay fever sufferers who have never found satisfactory relief from other medications.

Up to now, nose drops, eye drops, inhalers, sprays and antihistamines have given some measure of relief. But today you can expect much more complete comfort. This new compound reaches all the congested nasal areas from all sides, through the blood stream. It opens stuffed-up, blocked nasal passages. Free breathing is restored in minutes. Stops unpleasant sneezing; watery, itching eyes are cleared.

New Tablet Discovery

It took a new kind of tablet—made in three separate layers—

to combine the special ingredients which make this formula so amazingly effective. Among them is a new decongestant substance so effective it has become the single ingredient most prescribed by doctors for relief of congestion in the nose-sinus area.

Available without Prescription

Now available without prescription—this new 3-layer tablet is called Dristan®. Its unique combination of ingredients—(1) opens up blocked breathing, (2) stops unpleasant sneezing, (3) clears red, watery, itching eyes. At the same time, Dristan helps the body meet the great demands put upon it by the stress and strain of hay fever, and bolsters the body's resistance to infection.

Hay fever sufferers who want faster, more complete relief than they have ever before obtained are advised to try Dristan Decongestant Tablets—satisfaction guaranteed, or money refunded.

*MULTIPLE SCLEROSIS

! If you're near-sighted, try looking down into a mirror when applying mascara, brushing to the outermost tips of your lashes. Use the brush to separate and curl lashes. An eyelash curler is a boon to some. See how eyes can sparkle prettily even through specs when make-up's properly applied to brows, lids, and lashes.

Add Allure

by Nan Cabot

LET'S FACE IT, men are interested in the total woman—not the figure, the legs, or any single feature (in spite of what they say!)—but in her general appearance, her grooming, a pleasing smile and, very important, what lies behind those sparkling eyes.

A pleasing smile and sparkling eyes can't be achieved by the gal who, because of false

vanity, won't wear the eyeglasses she needs. Dull red eyes and squint-lines are her lot.

Gone are the days of Dorothy Parker's couplet, "Men never make passes at girls who wear glasses." Frames are now so beautifully styled, they've become an important fashion accessory, and some women who don't even need spectacles, wear frames fitted with lenses of ordinary, but finely ground glass. They know that a well-chosen frame, like a properly used cosmetic

BIG CANNON Bath Towel
