**Industrial Shares Near High for Year**

New York —(UPI)— Industrial shares all but reached their 1958 high today. Utilities firmed but rails, though several made gains, eased on average because several sold ex-dividend. Steels, chemicals and metals stood out in the main body of industrials. These had gains ranging to more than a point. A long list of specials turned in a good performance. Bell Aircraft, which led the market Tuesday on its new rocket fuel booster discovery, made a new high early in the day on a rise of nearly two points and then backed away on profit-taking. The whole chemical department ruled strong.
