

**STING INSTALLED**—Ground crewmen of the 83rd Fighter-Interceptor Squadron adjust Sidewinder air-to-air missile to wing of F-104 Starfighter based on the Nationalist Chinese island stronghold of Formosa. Also included in the squadron's arsenal of weapons is the Matador guided missile which, with a warhead capable of carrying an atomic explosive, is a deterrent to any Red Chinese attempt at invasion of the Nationalist bastion.

### Skin-Divers To Inspect Barrier At Brownlee Dam

Portland — (UP) — Oregon Fish Commission Director Albert M. Day said skin-divers will inspect the fish net barrier 120 feet below the surface of the lake behind Brownlee dam today. The barrier was recently placed in operation by the Idaho Power Company.

Bell, who will direct the diving operation, said small defects were found in the net before it was lowered into place. He said the testing by divers will determine whether these have been satisfactorily repaired.

steelhead depend on the success of the salvage operations at the damaged Oxbow fish trap. He said the fish trap was "as important for the fingerlings as the Oxbow trap is for the spawners. Both must function well to accommodate one of the finest fall chinook runs in recent times" he said.

### 1959 Miss Oregon Centennial Queen

Astoria — (UP) — The Oregon Centennial commission met here for three hours Monday to discuss an agenda which included the naming of a queen, space problems and to name a new director of promotion and publicity.

The commission tentatively decided to name Miss Oregon of 1959 as Centennial queen after Mrs. Lillian Sweetland said two queens in the state would create an unfavorable rivalry.

### State Apprentice Members Resign

Salem — (UP) — Three members of the 12-member State Apprenticeship council resigned Monday and their places were filled by appointment by Gov. Robert D. Holmes.

The commission tentatively decided to name Miss Oregon of 1959 as Centennial queen after Mrs. Lillian Sweetland said two queens in the state would create an unfavorable rivalry.

### Fishing Trip Fatal To Portland Man, 57

Oceanlake — (UP) — A Portland grocer, Elias Louis Demas, 57, died Sunday after falling from a rock near Nelscott while fishing. Death was apparently caused by heart failure.

Resignations were handed in by William C. Oettinger, Alfred S. Teller and Robert M. Robson, all of Portland. Their positions were filled by W. F. Zimmerman, Pendleton electrical contractor; W. W. Bristow Jr., Eugene jeweler; and E. Glen Craven, executive director of the Painting and Decorating Contractors association in Portland.

William W. Marsh, Portland, was named as the new director of publicity and promotion to succeed D. Donald Lonie Jr., who resigned. The commission reported that 40 firms have signed contracts for exhibition space in addition to 27 foreign commitments already contracted.

Police Chief Al Barzee said Demas was hit by a wave which caused him to lose his balance and fall. He was pulled from the water by James Karussos, Portland, but died shortly afterwards.

Portland — (UP) — About 275 military and business leaders have registered for a national defense resource conference which opened Monday at Portland State college.

## Telegraph Offices Near Colleges Proof Of School Expenses

New York — (UP) — If proof is needed that college students, like their parents, sometimes run short of cash, witness the business being done at Western Union offices conveniently located near a college campus.

"Dear Dad. Send Cash," is one of the more agonized messages that go out.

According to the best information among educators, the financial headache for parents and their children at college will become worse instead of better in the foreseeable future.

A generation ago, a year at college usually cost between \$860 and \$1,000. Today, many families set the most as close to \$3,000. This September, Yale University's all-inclusive freshman fee will be \$2,150, an all-time high.

Cost Will Double Within the next 10 years, reported Dr. Ernest V. Hollis, director of college and university administration of the United States Office of Education, the cost of a college education will be double today's cost. And enrollment, 3,036,936 as of last September, is expected to almost double by 1969, which means that students may get less booklearning for a buck.

Because the financial factor is so important in higher education, many colleges, banks and private organizations have set up installment plans and loan facilities. Dr. Hollis reported that more than two-thirds of the two million young men now in college are helpless to ease the burden by taking part-time jobs, and the average male earns \$486 a year. The summer employment average is \$389 and the weekly income, on a yearly average, comes to \$15.55.

What sort of job to they take? Anything and everything. They may wait on tables, become hospital orderlies, babysitters, library clerks, freelance typists, chauffeurs, retail store clerks, ushers or concessionaires during the sports season, newspaper representatives, choir singers.

And since job possibilities have become scarcer, in general, in recent months, college boys are going into business for themselves. A simple method is to become a door-to-door salesman.

Some Selling Brushes Foster E. Goodrich, first vice president of Stanley Home Products, Inc., of Westfield, Mass., reports that some 200 college men now are selling his firm's brushes, toiletries, mops, brooms, cosmetics and cleaning products. He said many earn \$100 or more a week, while many more are in the \$80-\$90 category.

"Perhaps more important than the money," said Goodrich, "is the experience of getting along with people in a business. My advice to young men who want to go to college but can't afford it is simple," he added. "Don't work your way Sell your way through."

However, the allocation was cut back by Senate-House conferees on the appropriation bill to the original amount of \$310,000 proposed in the President's Budget message.

**HEADS UC LAB** — Dr. Edwin M. McMillan (above), one of America's atomic science pioneers, has been named to succeed the late Dr. Ernest O. Lawrence as director of the University of California's Radiation laboratory in Berkeley. McMillan, 51, won the Nobel prize in 1951.

### Flags Made in U.S. Urged by Union

Portland — (UP) — The Multnomah County Central Labor Council approved a resolution Monday night calling for purchase by various groups and government bodies of flags made in the United States when the new 49-star U. S. flags appear.

Austin J. Haughey, state AFL-CIO label trades director, said he had been informed that Japanese flag makers intended to make many of the new U. S. flags after Alaska is admitted to the union. He urged, and the council approved, a resolution calling on flag purchasers to examine flags to be sure they carry a U. S. label.

### Bull Elk Shot In Portland Area

Portland — (UP) — A wild bull elk which has been roaming in a southwest Portland wooded area was shot and killed by a State Game commission employee Monday to protect property from possible damage.

The elk was believed to have wandered into the Portland city limits from the Coast range. It had four points. The meat will be donated to charitable institutions.

**SMOG-SMARTING EYES** and gas masks were prevalent in Los Angeles Saturday as officials issued smog alert as the ozone content reached .53 per million parts of air. This eye-wiping spectacle was common as temperature hit 90s.

One drop of oil will lubricate 1066 jewel watch bearings.

Stalactites hang down from a cave roof; stalagmites grow up from a cave floor.
