features

REDONDO TRU-SIZE TILE

The REDONDO "Single-fire" Process produces tile with perfect bond between glaze and tile body. This exclusive process insures uniformity, more accurate tile jobs with minimum of labor for tile-laying jobs. REDONDO tile is tougher, stronger, and there is no danger of glaze peeling, chipping or spalling at edges, it is the most "work-free" material on the market.

In YOUR HOME, be sure you have REDONDO Tru-Size Tile for its beauty, cleanliness and ease of maintenance. More and more builders are discovering REDONDO tile's long range economy for baths, kitchens, recreation rooms, laundries, halls and foyers.

Bathrooms of tile are more artistic, more sanitary, more livable. Kitchens can be kept spotless easier and look much better under all conditions. REDONDO tile enhances the value of any property and tends to keep the value higher for longer periods of time . . . gives "sales appeal" to any home, as building contractors are learning and will testify.

Lifetime REDONDO Tru-Size and Wear-Ever Tile is proof against sun, rain, and fire. No other tile can match REDONDO for glorious color range, for accurate true size, for craze resistance, for ease of application, or for ease of maintenance. And, this explains why you should insist on REDONDO Tru-Size and Wear-Ever Tile when you build, buy or remodel.
