

hillcrest house

**Electrically designed
for better living!**

We, at Trowbridge & Flynn, are proud of our part in making Hillcrest House the outstanding new dwelling in Medford! Trowbridge & Flynn's most important contribution is the installation of modern low-voltage remote control wiring . . . plus distinctive lighting fixtures, and the convenient intercom system.

The wiring system with master control is a product of Remcon, with Superior dimmer controls. The lighting fixtures are from Lightcraft of California. Bulldog Electric Co. furnished the breaker type panel switches. Nutone equipment includes bathroom ceiling light, heater and exhaust fan combination; Intercom radio in rooms and entrance; built-in food center, kitchen range hood, built-in bath scale and built-in chord chime and clock.

Trowbridge & Flynn Electric Company

Hillcrest House open daily from noon - - - Open evenings, Sunday and Wednesday
