(1) the date of location;

(2) the book and page of recordation of the notice or certificate of location;

(3) the section or sections of the public land surveys which embrace such mining claim; or if such lands are unsurveyed either the section or sections which would probably embrace such mining claim when the public land surveys are extended to such lands or a tie by courses and distances to an approved United States mineral monument;

(5) the name and address of such claimant and names and addresses so far as known to the claimant of any other person or persons claiming any interest or interests in or under such unpatented mining claim;

Section 4 provides, generally, that unpatented mining claims located after July 23, 1955, shall not be used for purposes other than mining or uses reasonably incident thereto; that such claims will be subject to the right of the United States to manage and dispose of the vegetative surface resources thereof and to manage other surface resources thereof; and that, except to the extent required for mining operations and uses reasonably incident thereto or to provide clearance for such operations or uses, claimants of such shall not use or dispose of vegetative or other resources thereof; and that, except for clearance for such purposes, any permitted severance or removal must be in accordance with sound principles of forest management.
