

Drivers Licenses Suspended Listed

Salem - The department of motor vehicles has released names of 452 drivers whose licenses were ordered suspended during the period beginning Oct. 20 and ending Oct. 24.

Length of suspension varies, depending on charges involved, recommendation of court, discretionary action by the department or requirements of Oregon law. The department said some of the licenses involving financial responsibility and court recommendations may have been re-instated after suspension was ordered.

The department warned drivers that the penalty for driving while suspended is a jail sentence of no less than two days and up to six months, and there may be imposed a fine up to \$500. Under licensing procedures, this will also result in an additional year of suspension.

Those suspended in Jackson county were:

Driving While Suspended—(Includes any conviction for violation of traffic laws, involving operation of motor vehicle, while driving privileges were under suspension)

- Brydon, Allen James, 26, of 2108 Barnett rd., Medford, improper muffler, 1 year

TRADES WAGES UP

Washington - (UPI) - Average wages of union building trades workers rose one and one-half cents to \$3.35 an hour in the third quarter of the year, the Labor Department has said. The wage level Oct. 1 was 4.6 per cent higher than the previous October, the department said, and 63 per cent above the 1947-49 average.

Rider Becomes Effective On GI Insurance Policies

World War II and Korean Conflict veterans who hold GI insurance are reminded that a new total disability income provision rider becomes available to them on Nov. 1. S. T. Brannock, officer in charge, Veterans administration office, Medford, said today.

Engineer Board Certifies 20 To Practice Trade

Portland - (UPI) - The State Board of Engineering Examiners has certified 20 applicants to practice professional engineering.

They included Jack G. Green, Joe A. Purviance and Harry H. Mejdell, all of Corvallis; Walter M. Hercher, Medford; Carroll Hermanson, Milwaukie; Kerwin De Lore Kerr, Tigard; George E. Huckabay, Toledo; T. T. Claudson, Richland, Wash., and the following from Portland - William Akre, Arnold Cogan, Harold Harris, Samuel Holmes III, Philip Keasey, Robert Manseth, Payton Rowell, John Courtney, John Talbot, Harold Clarke, Theron Ragsdale and Milton Sachs.

Several applicants were certified to practice professional land surveying. They included Jean W. Hawthorne and Gail Thomas, both of Bend; Duane A. Smeltzer, Butte Falls; Remo Minato, Chiloquin; Thomas Kidwell, Coos Bay; Forrest Hales, Coquille; Peter Barendregt, Dufur; Claude Masters, Grants Pass; Lloyd T. Williams, Salem; Donald C. Kyle, Stanfield, and R. A. Balch, Thomas O. Managhan and Clair Pense, Portland.

The new rider became available by Public Law 85-678, Brannock said, and provides up to \$10 per month per \$1,000 of insurance in the event total and permanent disability is suffered by the insured before reaching age 60. The previous maximum amount was \$5 per month.

No payment may be made for disability incurred after age 60, and no premium charge is made for this benefit after age 60, or the end of the premium paying period of the policy, whichever comes first, Brannock stated. However, the TDIP payments continue so long as total disability persists, beginning with the seventh consecutive month of disability.

Brannock said approximately 5 million veterans of the over 5 1/2 million having GI insurance may qualify for the new rider.

There are approximately 85,500 veterans who have the old \$5 per month rider attached to their policies. Those who meet the health requirements may increase their coverage to the new \$10 limit for a slight increase in premium.

Dividends will be paid on the TDIP rider in addition to those on the basic policy, Brannock said.

Complete information and assistance in making applications may be had at the local Veterans administration office, Sixth st., and North Riverside ave., Medford, Brannock stated.

Western Union Venture Into Serendipity Pays Big Dividends

By ELMER C. WALZER
UPI Financial Editor
New York - (UPI) - This is a story of Western Union's venture into the realms of serendipity.

Elmer C. Walzer

It's a little venture into a new communications medium that the company says soon will be producing \$2 million in annual revenues.

This serendipity stuff is the process of finding out new things that you weren't looking for. It comes from a 204-year-old fairy story about the three princes of Serendip who always were discovering new things by accident.

This WU item is called Intrafax. It's a leased facsimile system with which businesses can speed their intra-company communications.

It is capable of transmitting full letter-size pages containing letters, drawings, lists of statistics, maps or blue prints - in fact anything a company wishes to circulate in its various plants and warehouses.

Five years old, Intrafax has 2,000 installations and according to the Western Union its demand is growing rapidly. The father of this device is the compact desk-fax machine used by 35,000 firms to send and receive telegrams in "picture" form at the touch of a button. It produces a product about half the size of a telegram, about half the size of the Intrafax product.

Intrafax, says Western Union has revolutionized the

purchase of the shipping department of an electrical manufacturing company to big systems connecting dozens of scattered offices or plants.

With business spreading out in wide areas, the system of intercommunication for the various units presents more and more of a problem.

The same applies to the armed forces. Just now Western Union is installing a 12,000-mile nationwide facsimile network for distribution of weather maps to 49 Air Force bases. In 21 Air Force bases in 17 states, Intrafax systems speed messages from communication centers to distant points in the same bases.

Federal Reserve banks transmit billions of dollars

range from simple transmission between two points in one plant or city, such as from the sales to the order department of a textile company, or

daily by Intrafax in money transfers to member banks. Thirty-six branches of the County Trust Co. of Westchester county, N.Y., verify signatures with central book-keeping department when cashing checks. Many banks expedite credit information and loan approvals by the machine.

Airlines use Intrafax for reservations. Brokers are using them for orders between branches. Railroads transmit reserved space tickets and insurance companies transmit policies and other forms.

The uses are so varied that even Western Union is surprised at the lucrative business its venture into serendipity is producing.
