Ex-Skating Star Declares Sportswear Needs Changes

By GAY PAULEY
UPI Women's Editor
New York—Three years ago Sheila Muldowny traded her ice skates for a sketching pad.

Today, the New York debutante and figure skating artist is a successful designer of clothes for the active sportswoman.

"I'm trying to put some fashion into sports wear," she says. "More and more people are taking it up." She said. "Did you know that last winter Wollman Rink, a public rink in Central Park, drew 375,000? And look at the crowds always in Rockefeller Center."

Her first collection of skating wear was in wool jersey, but now she includes wool plaids. All are designed for mix and match co-ordinating.

With Silver Spoon
Sheila Muldowny has been skating since she was five—"I think I was born with a silver skate in my mouth," she laughed.

She also was born with silver spoon. Her father is chairman of the board of Teleray Tube company, which makes television tubes. She attended fashionable Brearley, a private school on Manhattan's Upper East Side. She made her debut at the Junior Assemblies in 1953.

The designer, who is five feet two inches and a well-proportioned 110 pounds, is a U.S. gold medalist in figure skating, won the Eastern States' Senior Women's championship in 1953, and the Swiss international title in 1954. She also designed the first uniform to be worn by a U.S. Olympic figure skater team.

She feels that skating alone offers a big sales potential. "More and more people are taking it up," she said. "Did you know that last winter Wollman Rink, a public rink in Central Park, drew 375,000? And look at the crowds always in Rockefeller Center."

Children and Sitter Should Be Prepared

Champaign, Ill. —(UPI)—Both the youngsters involved and the baby sitter should have some preparation before children are left in a sitter's care, a child development specialist warns.

It's often wise, says Miss Jeanne Jackson of the University of Illinois, to have the new baby sitter come in during the day and get acquainted with the children. That way, Miss Jackson said, she can find out about the children's habits, routines and problems. She can also tour the house and see where switches and appliances are located.

Miss Jackson said the children should be prepared for the sitter's arrival even if they are acquainted with him or her. But it's unwise, she said, to tell them too far in advance because they may be over-anxious.

Make definite arrangements with the sitter about what time she should come, when she may go home; give clear directions on where parents may be reached in emergencies; and specific directions for meals and baths.

WHICH Wash-n-Wear? WILL TURN DIRTY YELLOW

Select Wash-n-Wear Shirts Carefully...

if you choose to buy them. One brand may launder satisfactorily. Another may turn dirty yellow or fall apart. This may happen to dress or sport shirts, blouses, work or play clothes, or other wash-n-wear fabrics and garments, white or colored, normally bleached for stain removal and retention of original whiteness.

According to AMERICAN INSTITUTE OF LAUNDERING, inferior wash-n-wear garments may be made with certain resin finishes that absorb chlorine from hypochlorite bleach, commonly used. This can't rinse out and heat from ironing creates an acid which yellows or destroys the fabric.

If you buy wash-n-wear or other washables, be sure they carry the CERTIFIED WASHABLE SEAL of American Institute of Laundering. It certifies we can launder them to perfection.
