Bomb Threat Closes Schools

Oshkosh, Wis. –(UPI)– Some Winnebago County schools were shuttered today—a day ahead of the planned Christmas holiday — because of a telephone bomb threat.

Sheriff Charles Lowry recommended the schools be closed after a man telephoned the sheriff's office here Thursday night and told the radio operator on duty "there is a bomb in a school in Winnebago county. This is no joke."

Lowry said the bomb scare —Wisconsin's 16th in 13 days —might be a hoax, but "we must take precautions." Several schools in the county were checked, but no explosives were found.

A number of school officials believed the call was a hoax, but it was uncertain how many schools would open today.

All 15 previous bomb scares have been hoaxes.

The first post office in Canada was established at Halifax in 1755.

The Medical Roundup

by Walter Alvarez

Emeritus Consultant in Medicine, Mayo Foundation
Emeritus Professor of Medicine, Mayo Foundation

Is Aspirin Safe?

Quite a few people ask me if it is safe to keep taking aspirin, year in and year out. So far as I know, it is. The only people I know of who are harmed by aspirin soon know they must not take it. They seem to be, in a way, allergic to it. I know a woman whose face swells up whenever she takes aspirin. In recent years we have had a good chance to find out if aspirin is at all dangerous because many doctors have used the drug in enormous doses in an attempt to help people with rheumatoid arthritis.

Dr. Alvarez

Actually, as I remember, when my friend, Dr. Harold G. Wolff, years ago made a study of human sensitiveness, he showed that it hardly pays to take more than two aspirin tablets at a time, because after that it doesn't work any better. The amount of the calming effect obtained with two tablets is the same as that obtained with 70 tablets.

There are a number of drugs like that. They make me think of the man who has one key to his front door in his pocket. It doesn't help him to carry 10 more keys. They wont' do him any more good than the one does. The one does the job it was made to. It is the same way with vitamins. For instance; the amount of Vitamin B12 which will relieve the symptoms of a person with primary anemia is so small that one can hardly see it with the naked eye. Experts tell me that it does not do any good to take a handful of the stuff.

Enough Is Enough

I recently read an article on the serious injury done some infants by their mothers who, hoping to make them big and tall and powerful and healthy, gave them huge doses of vitamins. With many drugs, enough is enough, and more is only harmful.

What does a person do when he can't take aspirin? There are other drugs that are almost as good, drugs such as phenacetin, acetanilid, and antipyrine. Most of the patent pain-killers cannot help the sensitized person because they almost all consist mainly of aspirin. Aminopyrine is a good pain-killer, but it has to be used with care because sometimes it does harm.

Dr. Alvarez hopes his readers will understand that it would be impossible for him to answer requests for information or to attempt to diagnose by mail.

(Released by The Register and Tribune Syndicate, 1958)

No Soviet Answer To Agenda Proposal

London–(UPI)–Prime Minister Harold Macmillan told the House of Commons Thursday he still had not received any answer from Soviet Premier Nikita Khrushchev on the agenda of a proposed summit conference.

Macmillan had been asked whether a Soviet note delivered to NATO members Saturday could form the basis for a summit conference agenda.

The Prime Minister said "the Soviet mention of summit talks appeared to be a passing one" but the NATO powers were giving the message serious study.

FOREIGN CAR LOST

Miami – (UPI) – Robert H. Battle is still looking for his little foreign car which he parked for a $1 fee in someone's backyard last Saturday night while he attended a football game. He can't find the house.

Los Angeles Area Passes Chicago

Los Angeles –(UPI)– Population of the metropolitan Los Angeles area has surpassed Chicago by 55,000, making it the second largest city in the nation, the Los Angeles Chamber of Commerce announced Thursday.

According to figures compiled by the chamber's research department, there are now an estimated 6,450,000 persons living in the Los Angeles area, compared with 6,395,000 in Chicago.

James S. Cantlen, research committee chairman, said the figure was based on surveys showing that some 240,000 new residents arrived in Los Angeles each year. He said the figures would be substantiated by the 1960 census.

In 1950, Chicago led Los Angeles by 1,100,000, but its rate of growth was only about 100,000, Cantlen said.

Both cities, however, still have a long way to go to catch up with New York, which has an estimated 14,500,000 residents.

Cancer-like diseases are found in many kinds of plants and also among types of commonly known animals.

NOTICE

About Feb. 1, 1959, "Hi-Fi" background music will be offered to Medford Stores, offices, clinics, industrial plants, etc., for a nominal installation charge and a very modest monthly service charge. Inquiries welcome at SPring 3-5355.
