Ike Emphasizes Importance of Individual's Role in Economy

(Continued From Page 1)

The President assigned to individual consumers the "important role" of "shopping carefully." Housewives can do much to protect their own pocketbooks, he said, by insisting on quality merchandise at fair prices.

The government economists believe the outlook is for "good, but not spectacular" economic growth in 1959. They said rapid expansion like that of the 1955 boom "is not in the cards." But "the general feeling is that things will improve as we go along, and that 1960 will be better than 1959 by a long shot."

The President reiterated his budget message proposals for extending present corporation and excise taxes and for increased gasoline taxes and postal rates.

The 225-page economic report, prepared with the help of the President's three-member Council of Economic Advisers, said the nation's recovery from the 1957-58 recession began last May. By the end of December, it said, "most of the ground lost had been regained."

During the fourth quarter of last year, the gross national product was at an annual rate of \$453 billion, the highest in history. Even when translated into "constant value" non-inflated dollars, this output level is nearly equal to the highest pre-recession period.

Unemployment, which had climbed above the five million mark in April, began to drop in September. By last month, it was down to 4,100,000. This figure still represents 6.1 percent of the labor force. Before the recession, unemployment averaged from 4 to 4.4 percent of the labor force.

Individual Strength Lifts Stock Prices

New York—Strength in individual industrial favorites lifted prices on the stock market today.

U. S. Steel and Chrysler ruled strong late in the day with gains of more than a point. DuPont formed after an early decline of more than a point. Standard Oil of California rose nearly two in the oils. Motor shares generally ruled strong.

Firestone rose two to a new high. Nopco Chemical was up three. Champion Paper gained more than two points. North American Aviation was up more than two in its sector.

Smart looking? You bet! And comfortable, too!

Sure, styling is important in a new car. You expect a new car to be sleek and smart—but not at the expense of comfort. Yet in trying to design a car as low and modern looking as the Swept-Wing Dodge, some '59 cars have practically designed out the people. Not Dodge. It's designed around you. It's easier to get into (no protruding door posts), easier to get out of (no high door sills to trip over), more comfortable to sit in (there's room to spare). All this and Swivel Seats, too!
