Man May Establish Own Space Planets For Human Beings

Los Angeles—UPI—The nation's No. 2 civilian space chief said today that man may establish his own world in space "if we find other planets inhospitable."

The artificial worlds would be "inhabited spheres far out in space orbiting around the sun rather than the earth or moon."

This vision was conjured up by Dr. Hugh L. Dryden, deputy administrator of the National Aeronautics and Space Administration in an address prepared for the Western Space Age Conference here.

Man-made planets supporting communities of human beings, he said, are possibilities of the distant future.

"Our immediate aim is to establish man in space—to give him a bridgehead, so to speak, from which he can study the terrain, and then push on to more remote objectives."

"As we master the required technology, we will send an expedition to the moon, and later on to Mars, to Venus, and to more distant reaches of the solar system."

If existing worlds turn out not to be suited to colonization, Dryden said, man might then build worlds of his own.

"Man's only natural habitat," he said, "is the cosmos. His 'normal environment' is the one he creates for himself."

NASA's immediate man-in-space program is called Project Mercury.

The agency already has contracted for a dozen space cap-

Flying Boxcar Crash Kills Eight

Cherry Point, N.C.—UPI—A Marine Corps Flying Boxcar crashed and burned today while trying to make an instrument landing during a violent rainstorm. Eight of the nine men aboard were killed.

The plane, whipped by heavy winds and blinding rain, crashed into a dense swamp only a few yards from a busy highway. Names of the eight victims were withheld pending notification of next of kin.

The lone survivor was identified as Sgt. Ralph Mauro Jr., Hamden, Conn. He was a radio operator in the crew of six aboard the transport plane which also carried three passengers.
