

Personnel Management Problem Is College Extension Course at MHS

Problems in personnel management, carrying three hours of under-graduate or graduate college credit is being offered at Medford High school Tuesday evenings, 7 to 9:45 p.m.

Enrollment was unusually low on the first class meeting and the class will be cancelled on April 7 if enrollment does not increase greatly, according to school officials.

Original publicity stated prerequisite requirements for this course, but later information shows that this was erroneous and there are no prerequisites to enrolling in the class.

Every organization, no matter its function, whether large or small, has problems in getting things done because some members aren't cooperating as much as they are able to, officials noted. To help these groups become more effective, and to help employees become more effective in securing their own objectives, it is essential to study ways of dealing with the human problems presented. This is done most effectively by taking a look at specific case problems, asking what should be done and why, officials said.

Each student proposes solutions, and group solutions are attempted through class discussion, in the light of various viewpoints and sound personnel principles.

Dr. Scott D. Walton, associate professor of business administration at the University of Oregon, will instruct the class. The fee is \$27 whether the student takes the course for credit or non-credit.

For further information call MURDOCK 2-4611, Ashland, General Extension Division.

Other college extension courses include business English, 7-9:45 p.m. Tuesdays, room 249, Medford High school; constructive accounting, 7-9:45 p.m. Wednesdays, room 229, Medford High; and education seminar, social foundations of education, 7-9:45 p.m. Wednesdays, room 201B, Medford High.

Six adult education courses sponsored by the Medford school system started at Medford High school last week, Lindsay M. Vinsel, director of adult education, has announced.

Courses which started include refresher shorthand, which is being held between 6:30 and 7:50 p.m. Monday

and Wednesday in room 232; and intermediate typing, between 9 and 9:30 p.m. Monday and Wednesday in room 225.

Study of Keeping Buildings Planned

A committee to study the possibility of organized support for Jacksonville in maintaining the historical nature of certain buildings there has been named by the Jackson County Chamber of Commerce.

Russ Jamison was named chairman of the committee, with Clarence Young and Gordon Hudson serving with him. Jacksonville officials and other interested groups will be contacted to discuss means of coordinating county-wide activities, Jamison said.

Hugh Coleman, president of the chamber, asked that some action be taken as soon as possible to take full advantage of renewed interest in Jacksonville for Oregon's Centennial observance.

News About Books From the Library

In 1958 former presidents Herbert Hoover and Harry S. Truman issued the following message on the occasion of the first observance of National Library week.

The Bible tells us that the truth shall make men free. We Americans know that if freedom means anything, it means the right to think. And the right to think means the right to read—anything, written anywhere, by any man, at any time.

Men die; devices change, success and fame run their course. But within the walls of even the smallest library in our land lie the treasures, the wisdom and the wonder of man's greatest adventures on this earth.

National Library week, April 12 to 18, will greatly serve if it makes us pause and remember these things. New books added to the Jackson County library during the past two weeks are as follows:
