## Man Uninvited To His Own Party

San Carlos, Calif. - (UPI) - James Sanduval hosted a fabulously successful party at his residence Wednesday night, but the strangers who attended didn't even invite him.

Sanduval, 28, arrived home to find a car and two motorcycles parked in his driveway. The garage door was open, and his patio furniture was missing from its storage area.

He found the furniture in the back yard occupied by five men and two women, who were nonchalantly drinking highballs and chatting gaily.

"What's going on here?" Sanduval asked. The party broke up immediately - in seven directions. All that remained was three empty bottles from Sanduval's liquor cabinet.

## Godfrey Takes News of Cancer In 'Good Spirits'

New York - (UPI) - Arthur Godfrey was told today that he had a part of his left lung removed because of cancer and he received the news in "good spirits."

A spokesman for the Columbia-Presbyterian Medical Center said that Godfrey, 55, had come through the post-operative period satisfactorily.

Five Hours of Surgery  
The entertainer underwent five hours of surgery Thursday after an exploratory operation revealed that a tumor in the upper lobe of his left lung was malignant.

The surgeons would make no prediction about the possibility of a recurrence of the cancer.

Issue Medical Report  
The morning bulletin on Godfrey today read:

"Mr. Godfrey was taken from the recovery room to his room in Harkness Pavilion this morning at about 7 a.m. His doctors stated that his condition is entirely satisfactory and he has been doing fine in post-operative recovery.

"He has been told the results of the operation and had no special comment about it. He was described as being in good spirits."

Indefinite Convalescence  
Godfrey will spend an indefinite convalescence in his \$40 a day bedroom-living room suite at the hospital. His physicians said Thursday that he might possibly resume some of his TV-radio duties in two months.

His doctors declined to speculate Thursday on the chances of full recovery for the red-haired radio and television personality, or on the possibilities the cancer already had spread to other parts of his body.

A cancer generally is considered by specialists to be "cured" if there is no recurrence within five years of its arrest or removal.

"Our studies show that more airline seats will be needed by 1962 and that financing can be accomplished by 1963," he said. "The airlines may not desire to re-equip this early, but it takes only one airline order for a supersonic jetliner and they will all come around."

He said the sonic boom problem would be serious but that it would only come as a
