

PLANTING SOYBEAN
Madison, Wis.—U-P-A Group of University of Wisconsin researchers report that soybeans can be planted by the "wheel track" method as successfully as corn. With the new method, soybean seed is planted in wheel plowed ground—in the wheel tracks of the tractor. The researchers say that soybean yields can be increased by as much as 15 per cent simply by placing the rows closer.

Egyptian banks are opening branches in Damascus, Latakia and other places of what was once Syria but is now the northern part of the United Arab republic.
