To the man who may have stopped looking ahead

(without really meaning to)

You're not the sort of man who deliberately closes his eyes to the future. Not at all. In fact, you started buying U. S. Savings Bonds because you knew they could mean a better life for you and your family in the years ahead.

But then something happened. For one reason or another, you lost the Savings Bond habit.

And yet today there is more reason than ever to invest in Bonds. And millions of Americans know it. In 1958, the amount of money they owned in

Bonds reached an all-time high—over 42½ billion dollars. Despite the "recession", they bought more Bonds—and cashed fewer—than the year before.

Americans know regular savings is the surest road to a secure future. And there's no better, safer, easier way to save than with U. S. Savings Bonds.

Think it over. Isn't it time you got back into the Savings Bond habit—and started looking ahead again?

Facts you should know about U. S. Savings Bonds

- 1 Bonds are as safe an investment as you can make. The government guarantees them.
- 2 They pay more interest than ever, and E Bonds mature in less time than ever.
- 3 You can buy Bonds through the Payroll Savings Plan; or where you bank; or where you go to school, through the School Savings Plan for U. S. Savings Stamps.
- 4 Bonds are indestructible. If your Bond is lost, stolen, or mutilated, the government replaces it free.
- 5 Any bank will cash them—but the average saver tends to hang on to his Bonds. So chances are you won't find yourself frittering away Bonds—but will hold them until you really need the cash.
- 6 Bonds help strengthen America's Peace Power. Peace costs money. Money for military and industrial strength. Money for science and education. Money saved by individuals to keep our economy strong. That's why every Bond you buy helps strengthen America's Peace Power at the same time it's helping build your personal financial security.
