Louisiana Governor Suffers Breakdown

Galveston, Tex. (UPI) - Gov. Earl K. Long of Louisiana, suffering from "a breakdown in his health," was undergoing tests in a Galveston hospital today.

His nephew, U. S. Senator Russell B. Long (D-La.), angrily told the Louisiana Legislature in an unusual appearance Sunday night that his 63-year-old uncle became ill because the burdens of his office "have been more than he could stand."

Gov. Lether Frazer took over as acting governor. Ironically, Frazer would have inherited the governorship under Long's plan to resign because his term ends, then start campaigning again so he could circumvent a Louisiana law that prohibits an incumbent governor from succeeding himself.

Portland - (UPI) - A water-soaked quilt which may belong to the missing Ken Martin family of Portland was found Sunday in the Columbia river near Bradford Island, just below Bonneville dam on the Washington shore.

Deputy John Brown said it was to be shown to relatives of the Martin family today to determine if it came from the station wagon driven by Ken Martin when the family vanished last Dec. 7.

Portland - (UPI) - A water-soaked quilt which may belong to the missing Ken Martin family of Portland was found Sunday in the Columbia river near Bradford Island, just below Bonneville dam on the Washington shore.

Deputy John Brown said it was to be shown to relatives of the Martin family today to determine if it came from the station wagon driven by Ken Martin when the family vanished last Dec. 7.

Quilt May Be Clue To Martin Family

Portland - (UPI) - A water-soaked quilt which may belong to the missing Ken Martin family of Portland was found Sunday in the Columbia river near Bradford Island, just below Bonneville dam on the Washington shore.

Deputy John Brown said it was to be shown to relatives of the Martin family today to determine if it came from the station wagon driven by Ken Martin when the family vanished last Dec. 7.

Portland Livestock

Portland - (UPI) - Cattle 1500. Average to high choice 1163-1241 pound fed steers, 29.50; choice around 1050 pounds 29.75; good 900-1175 pounds 29.50-29; low choice 892 pound fed heifers 28; utility cows 18-20; canners and cutters mostly 14.50-18.50; Holstein cutters to 18; utility bulls 23-24.50; high yielding bulls to 25.

Calves 150. Good to low choice weaners 29-34; standard 26-29.

Hogs 1500. U.S. No. 1 and 2 butchers 190-225 pounds 18.75-19; some higher, mixed 1.2 and 3 lots 180-235 pounds 18-18.50; few 240-260 pounds 16.50-17; mixed 1.2 and 3 grade sows 310-400 pounds 13.50-15.

Sheep 2500. Choice spring lambs 160-180 pounds 22-25; good 160-180 pounds 24; good with some choice 180-190 pound old crops lambs 18-18.25; good 180-190; culls to good slaughter ewes 3-6.

Explorer Dies

New York - (UPI) - Dr. Morton C. Kahn, 63, explorer, bacteriologist and public health specialist, died Saturday.

What Is The Law?

This column is prepared as a public service by the College of Law, Willamette University, Salem, to explain basic legal principles, not to provide legal advice. The reader is cautioned not to apply these cases to his own problems without an attorney's advice, for differing facts may change the outcome.

Obligation to Pay Debts

John Smith had a run of bad luck. Two years ago he broke his leg in an automobile accident and the plant where he worked closed down. By the time his leg had healed and he was able to walk, most of his life savings had been spent and he owed debts amounting to \$3,000. Some of his creditors filed suits and obtained judgments against him. He got a new job but soon lost it for the reason that several of his creditors brought "garnishment proceedings," seeking to collect the amounts due them from his wages. His employer simply would not be bothered by the garnishment proceedings month after month.

John finally filed a petition in bankruptcy. In due time a discharge in bankruptcy was given to John and he managed to get and hold a good job.

One day after John secured his discharge in bankruptcy

and after he got his new job, another garnishment proceeding was brought seeking to collect from John's wages. John boiled with anger and went to his employer and said: "They can't do that to me. I went through bankruptcy and was discharged from my debts." John's employer urged him to see a lawyer and John did so. The lawyer examined the records in the court and learned that John had been sued by one of his old creditors for a debt he owed when he filed his petition in bankruptcy.

When the lawyer told John about the suit, John told the lawyer that he remembered having been sued, but that he had thrown the summons in the wastebasket and had done nothing to defend the suit. He told his lawyer: "That creditor couldn't sue me. I've been through bankruptcy and have a discharge which wipes out the debt I owed to that creditor."

John is wrong, unfortunately. While the discharge he secured did discharge most of his debts, it did not wipe them out completely. The moral and legal obligation to pay the debts still exists. The discharge is a good defense to a discharged debt but it has no effect unless it is raised when suit is brought on the debt.

John should have answered the summons. In his answer he should have set forth the fact of his discharge. He should then have appeared at the time the case was tried and should have offered his discharge in evidence.

MILLIONS OF AMERICANS ARE IN DANGER!

Yes, millions still have not had any polio shots. They are unprotected as the 1959 polio season approaches. What about you?

Polio isn't licked yet! In fact, cases of paralytic polio - the worst kind - increased slightly in 1958 over 1957 among people not vaccinated.

Remember - polio strikes all ages. Play safe. Your neighbor's polio shots will not protect you. See your doctor or health department NOW before it's too late.

DON'T TAKE A CHANCE - TAKE YOUR POLIO SHOTS!

The Inquiring Mind

This series of articles, on many different subjects, results from work by senior students at the school of journalism at the University of Oregon. Each is a condensed version of a full-length thesis written as partial requirement for graduation at the school.

BASEBALL IS DYING FAST

Two friends meeting on the street:

"Hey Fred, let's go to the baseball game this afternoon."

"Like to, Pete, but I want to watch the big league game on T.V. Besides, the traffic."

"Yeah, guess you've got a point there. Maybe we can have a game of golf one of these days. Just got a new set of clubs."

And so two more Americans did not go to the ball park that day.

Organized baseball, still known as our "national pastime," is headed toward an inevitable death if the downward trend in game attendance throughout the nation continues.

In the next decade the major and minor league baseballs, which broke all-time attendance marks 10 years ago, now actually face the possibility of non-existence within the next decade.

The home-town slugger, the seventh-inning stretch and the barking umpire may be just a memory by 1969 if nothing is done to halt the game's decline.

The minor league topped 42 millions in total attendance in 1949. But today they draw less than one-third that many through the turnstiles.

And even the major leagues which have resorted to desperate franchise transfers since 1952, have fallen in annual attendance from 22 to 17 millions since 1948.

These figures, shocking as they may seem, do not represent the end figure of the decline.

Trend May Continue

Unless baseball men take a serious and objective look at the ever-weakening condition of organized baseball, there is reason to believe that this downward attendance trend will continue until the game finally goes bankrupt.

Thus far, little action has been taken to put an end to the decline.

Baseball men must realize that the game's decline is caused for the most part by their own selfish actions and their stubborn resistance to reform.

The actions of major league owners is the biggest reason for organized baseball's current situation. In three ways these owners have, almost exclusively, caused the current plight of the minor leagues.

First, they have invaded minor league territory with weekly telecasts of major league games.

The result has been that the fans in minor league towns sit at home watching top-flight major league baseball on television while home town minor league clubs play in almost-empty parks.

Fans Trained

Even worse, these fans are being "trained" to stay at home and it may soon be too late to lure them back to local ball parks, whatever is done.

Second, big league owners have hurt fan interest by constantly manipulating minor league talent through the farm system and through the drafting of players. Often, a minor league team ends a season with a completely altered lineup from that with which it opened.

This not only disrupts the organization of minor league clubs, it tends to discourage fan loyalty, with serious consequences to attendance.

Third, five of the big league owners, in an effort to keep their own teams from losing money, have moved to former minor league cities.

Such moves have forced large-scale shuffles in the minors and thus have hurt attendance figures for the smaller clubs. And there is talk of still more big league franchise shifts.

In addition to major league

actions that have hurt minor league attendance, all of organized baseball has suffered financially from changing cultural conditions in post-war America.

Along with population increases in most American cities, there has been a distinct rise in suburban living. And these increases have gone hand in hand with discouraging attendance at baseball games.

For the suburbanite, the ball park is too far away; for the city dweller, the ball park is too difficult to reach because of increased traffic and parking problems.

Furthermore, a high post-war prosperity has given the potential fan the opportunity to participate in a wider range of leisure time activities.

Finally, many ball park neighborhoods have deteriorated to the point where fans feel it is "risky" business being near them.

All these factors have contributed to baseball's present predicament and baseball men must recognize them in order to attack the problem of halting attendance declines.

They must keep in closer touch with the problems which constantly confront the game at its different levels.

They must become more tightly knit.

And they must give the commissioner of baseball more power so that individual and selfish interests do not have a chance to exploit the game.

If these things are done with the best interests of baseball as a whole always in mind, then organized baseball can and will continue to entertain America as our "national pastime."

Tomorrow: Competitive Sports for Youngsters

Hunt Reported Seen in Utah

Portland - (UPI) - A man resembling Richard Allen Hunt, recently added to the FBI's list of the 10 most wanted fugitives, was seen hitch-hiking Sunday in Utah, state police said today.

Hunt, 26, is wanted for kidnapping one police officer and wounding another in the Brownsville-Harrisburg area last March 24. In adding him to the list last week, the FBI said Hunt had a long criminal record in several western states.

Oregon state police said they were advised that the man answering Hunt's description was seen heading north on Highway 91 between Kayesville and Ogden, Utah. Soon afterward, a black sedan was stolen at Ogden and was seen later Sunday and early today in Boise and Payette, Ida.

CRIME EXPERT DIES

Gainesville, Fla. - (UPI) - Dr. C. B. Pollard, 59, noted scientific crime detection expert, died Sunday. Pollard was an authority on toxicology and snake venom and had written four books on scientific crime detection.

Obituaries

JAMES VIOLANTE
The body of James Violante of Crescent City, who died in a local hospital, was forwarded by Conger-Morris funeral directors, to Crescent City for services and interment.

HARRY S. HARRISON
Ashland - Harry Samuel Harrison, 76, of 190 Vista st., died Sunday at the local hospital. He was born Feb. 27, 1883, in Colorado.

EMMA AUGUSTA HAGER
Ashland - Mrs. Emma Augusta Hager, 77, of 472 Phoenix dr., died May 30 at a local hospital. She was born June 15, 1881, at Atkinson, Neb.

BIRTHS
FREE - To Mr. and Mrs. Gary, 35 Chestnut st., Medford, May 31, 1959, a girl, 7 pounds, at Osteopathic hospital.

ROBINSON - To Mr. and Mrs. Roy R., Buena Park, Calif., May 29, 1959, a girl, 7 pounds, at Sacred Heart hospital.

METTERNICH - To Mr. and Mrs. James G., 819 West 14th st., Medford, May 29, 1959, a boy, 8 1/2 pounds, at Sacred Heart hospital.

BRANNON - To Mr. and Mrs. John R., Hills, Calif., May 31, 1959, a boy, 6 1/2 pounds, at Sacred Heart hospital.

DELISLE - To Mr. and Mrs. Earl D., 222 South Holly st., Medford, May 31, 1959, a boy, 7 1/2 pounds, at Sacred Heart hospital.

28 Most Wanted Inventions Listed by National Council

Washington - (Science Service) - A "Buck Rogers" rocket device that can be worn by man to shoot him across rugged land, or to double as a parachute in case of airplane trouble, was one of the 28 most-wanted developments named by the National Inventions Council in an appeal to the nation's inventors.

The Council said it also is seeking pressure-sensing devices, and techniques for converting inedible products of the earth into edible food using invisible microorganisms. The object is to figure out a way for military personnel and civilians to "live off the land" if necessary, such as in an atomic war.

The Council, composed of distinguished civilian scientists and engineers and the heads of research of the Army, Navy and Air Force, serves as a liaison between the civilian inventor and the military. Since 1940, it has been capitalizing on the brainpower of the American public to solve military technical problems.

The armed forces also want a way to keep bread from hardening, a better fungicide for clothing, insect repellants that can be "built into" clothing, ways to stabilize muddy soils, a reliable long-life cathode tube, and other devices.

Currently, damaged submarine communications cables must be fished out of the sea for repairs. Consequently, a method is wanted that causes sea water to react with some kind of exposed chemicals in the damaged cables to make this portion of the cable rise to the surface.

A mechanism to measure angle of flight and cause deceleration at hypersonic speeds in the fringe of the earth's atmosphere, a method of using a rocket to check wind speeds up to 100,000 feet above the earth, and a device to measure the height of large water waves are also sought.

Inventors having solutions to any of the 28 new problems

listed in the Council's "Supplement to Technical Problems Affecting National Defense," should write up the idea and send it to the Council. The suggested solution will be evaluated and, if it appears promising, will be turned over to the proper military agency for further evaluation.

The Council also cancelled 66 problems which it had named earlier. Among them were: Transparent cockpit enclosures, high-voltage power supply and components, chemical for melting snow or ice, machinery for fabrication and method of welding titanium and smokless rocket propellants.

A Council spokesman said the cancellations did not necessarily mean solutions had been provided by American inventors. The project to which the problem applied may have been cancelled, he said, or the problem may have grown obsolete through advanced technology.

Gold Hill Sets Class Promotion

Gold Hill - Promotion exercises for the A. J. Hanby elementary school will be held Wednesday, June 3, at 8 p.m. in the Hanby school gymnasium.

Charles A. Meyer, superintendent-elect, will speak on "Inventory." He will be introduced by H. P. Jewett, retiring superintendent of District 6C.

Gordon Banry, student body president, will give the welcome following the class procession. The invocation will be given by Chester G. Mack and the class will be presented by Russell Carr, eighth grade teacher, who will also make the class awards.

Tommy Davis will present highlights of the school year. The program will open with music by the Hanby school band under the direction of Charles Cook. The Choralettes and Choraleires, pupils from Mrs. Ruth Brewster's music classes, will sing. Joyce Dye will play a piano solo.

C. Norman Gail, chairman of the board of District 6, will present the diplomas to the 30 eighth grade students.

Benediction will be given by the Rev. Thomas White.

Drugs, Care Reduce Recurrences of Rheumatic Fever

Chicago - Science Service - Drugs have reduced recurrences of rheumatic fever from 20 per cent to less than one per cent.

A rheumatic fever patient who visits his doctor regularly, takes care of himself and takes preventive drugs should never have a recurrent attack, a pediatrician reported here.

Penicillin Best

The most acceptable drug is penicillin, Dr. Benjamin B. Berman of Granite City, Ill., told scientists at the Illinois State Medical Society's annual meeting here. When it cannot be used, sulfonamides, tetracyclines and erythromycins are also effective preventive treatments.

He explained that since rheumatic fever attacks are directly related to the presence of a type of streptococcus destructive to red blood cells, the patient must take these drugs as long as the possibility of such infection exists. This may range from five years to a lifetime, Dr. Berman said.

Problem of Parents

"Since most patients are children," he said, prevention of recurring attacks "becomes the problem of the parents." With education they should be aware of the dangers of these attacks of rheumatic fever and should insist on preventive program.

Dr. Berman pointed out that Illinois patients who cannot pay for drugs or a doctor's care may obtain treatment through the crippled children's division of the University of Illinois.

Former Liquor Commissioner Dies

Portland - (UPI) - Funeral services will be held Tuesday for Lloyd Justin Wentworth, 86, former chairman of the Oregon State Liquor Control commission, who died at his home Saturday.

Wentworth was vice president and manager of the Portland Lumber company for 30 years and later was Portland manager for the Douglas Fir Export and Exploitation company until 1926 retirement in 1946.

TIBETAN REBELS FREED

London - (UPI) - Chinese Communist troops so far have released 515 captured Tibetan rebels, according to a Peiping Radio broadcast. The broadcast monitored here said 96 Tibetans were released Saturday after promising to "turn over a new leaf."

Service Men GRADUATED

William L. Olson, son of Mr. and Mrs. Glenn B. Rodgers, 190 Bigham dr., Central Point, was recently graduated from recruit training at the Naval training center, San Diego, Calif.

IN TRAINING

Wilfred C. Boye, son of Carl F. Boye, route 1, box 184, Gold Hill, is currently undergoing Army basic infantry training at Fort Ord, Calif.

Boye, who entered the Army in February, attended Crater High school and is a graduate of Oregon State college.

EMERGENCY ACTION

Stanford, Calif. - (UPI) - Stanford student Douglas Kilpatrick III needed a ride home in a hurry. Police arrested him a little while later for stealing a \$15,000 ambulance. Moreover, he has to pay damages caused when he crashed it into a tree.

Portland Produce

Portland - (UPI) - Dairy market: Eggs - To retailers: Grade AA large, 38-39c doz.; A large, 37-38c; AA medium, 32-34c; A medium, 27-28c; cartons 1-3c additional.

Butter - To retailers: AA and Grade in packages: 24-lb. carton, 1 higher; B prints, 63c.

Cheese - Medium cured - To retailers: 4-lb. brick, 40-42c; processed American cheese, 5-lb. loaf, 40-43c.

Poultry, Rabbits - Live Chickens - Quoted to grower at Portland, Salem and south to Eugene: Light, ranch, No. 1 quality fryers, 2 1/4-4 lbs., 18c; quoted lower; light hens, 8-9c; heavy hens, 10-11c.

Dressed Chickens - No. 1 grade drawn, 33-35c lb.; cut up, 29-35c lb.; heavy type, whole drawn, 35-38c; light type, cut up, 29-35c lb.

Dressed Turkeys - To retailers: Frozen, ready to cook A grade young toms, 40-43c lb., according to weight; A grade young hens, same lbs., 38-40c lb.

Breeder Turkeys - To producers: (Nominal) A grade hens, 23c on an avicrated basis; A grade toms, 25c on the same basis; to retailers, A grade hens, 35-36c.

Rabbits (Average) - To growers (f.o.b. killing plants) - Live white, 3 1/2-4 1/2 lb., f.o.b. Portland, 19-21c; colored, 18-20c; under 4 lbs., 18-20c; fryers to retailers, 56-58c lb.; cut up, 60-62c.
