

Four-Day Work Week Scheduled By Two Firms

Portland—UPI—The Long-Bell Division of International Paper Company has announced four-day work weeks in their plywood plants in Oregon would go into effect right away.

Affected would be the Coos Bay and Roseburg plants of Evans and the Vaughan and Gardiner factories of International Paper.

Shrinking orders and lower prices were major factors in the decisions in the 20 per cent cutback.

Evans' president E. S. Evans Jr. said the four-day work week was ordered throughout the firm's Pacific coast operation.

Output Catches Up
The plywood industry recently was on an overtime basis to meet buying demands. Industry sources indicated output now has caught up with the demand.

The recent demand was attributed to a boxcar shortage which failed to develop and to low warehouse inventories at the start of the spring season.

Plywood sheathing has dropped about \$6 to \$8 from its \$112 to \$114 peak level on 1/2-inch CD grade. Sanded panels still were at their \$85 price on 1/2-inch AD index grade.

Back Stairs: Ike and the Senators

By RAYMOND LAHR
UPI Correspondent
Washington—UPI—Now that the Washington Senators are fielding an exciting if not championship baseball team, President Eisenhower may make more use of his gold-plated season pass.

He has visited Griffith Stadium to watch the ball-playing Senators only 11 times since he moved into the White House six years ago last January. On six of those occasions, he went to perform the ceremonial function of throwing out the first ball at the opening game of the season.

Wants 'Fighting Chance'
During a news conference last year, the President made no secret of the fact that he thought Washington should have "a little better ball club" than the perennial tail-enders in the American League.

He admitted that he was not a paying customer but said that he would be attending "a good number" of night games if the team "had a fighting chance, on the average, of getting into the first division."

Eisenhower stunned many baseball-minded politicians his first year in office by announcing that he was going to Georgia for a golfing holiday instead of exercising his prerogative to throw out the first ball to open the major league season. They were sure he was offending those millions of baseball fans who follow what the sport writers call our national pastime.

On Hand for Pitch
Rain forced a postponement of that 1953 game, however, and the President found himself in Washington—to deliver a speech—when the

opening game was played. He was on hand to pitch the first ball. He was in the stands too, for each of the next five opening games but was in Georgia again this year when the opening game was played.

He made it to the ball park for the first time this year on May 29 when the Senators were indeed fighting to get

Central Point City Fire
Chief Don Turner reminded residents to turn off sprinklers and hoses when the fire whistle blows. Extra water pressure is necessary for proper efficiency in controlling a fire. Hoses may be turned on, Turner said, when one short blast of the whistle indicates that the fire is out.

Many Central Point residents have been cutting weeds and grass along alleys and in vacant lots. Late cloudy weather has caused the grass to reach an unusually tall height, before heading out, thereby becoming a fire hazard if left to dry, Fire Chief Don Turner said.

The Central Point city council met Tuesday and approved loaning to the Jacksonville Museum two antiquated check protectors and an old mimeograph machine.

Fire Near Boiler Damages Building
Fire around a butane gas heated boiler did considerable damage to the boiler unit and resulted in smoke damage to the building at Jiffy Car Wash, 2054 North Pacific Highway Thursday morning. Firemen said that gas apparently had been left turned on in the steam cleaning unit and the automatic control valve appeared to have been defective, allowing excessive heat to develop.

The fire was discovered by Gordon Huttner when he came to work at the Big Y market. The alarm was turned in about 6:10 a.m.

Donald E. Burelson is operator of the car wash.
