We expect our clothing to become soiled from wearing but we frequently overlook the fact that clothes are likely to collect soil while just hanging in the closet! Unless your home is hermetically sealed—and few are—tiny particles of dust are constantly floating through the air and eventually a certain amount is bound to settle on your hung-away garments.

These floating units and pipe or cigarettes also send minute particles into the air and the sediment is deposited on clothing. Very often heat and air affect colors, leave them dull looking. If left for any length of time, all of these elements permeate the surface of the fabric and affect the delicate fibers.

To keep a garment looking its best, and insure the maximum length of wear, have it thoroughly expertly cleaned before wearing if it has been hanging away for awhile. This will brighten the colors, remove the danger of deep-down soil weakening the fabric, and take out any "hidden dirt."

See us for efficient, economical cleaning. We stand behind all our work and give every article you send to us extra care at no extra cost. Remember... the best dressed people in town send their clothing to us! BIG Y CLEANERS, 1928 Table Rock Rd., Phone SP 3-1919—S&H Green Stamps.
