KILLING small rattlesnake near Sunnyvale, Calif., home, pet cat of Patterson family is credited with saving young Shawn's life.

Test Operations Start on System Of Air Navigation

Test operations of the bearing and distance measuring features of the Tactical Air Navigation system (TACAN) started near Medford last week, the Federal Aviation agency has announced.

The TACAN is operated in conjunction with the very high frequency omnidirectional radio range (VOR), and together is known as VORTAC, which has been designated as the "common system" short range navigation system to meet civil and military requirements.

The facility is located 10 miles north of Medford, the FAA said.

It was installed and will be commissioned by the FAA as part of the nation's air navigation system.

Enclosed in Cone

The facility is enclosed in a 16-foot high plastic cone mounted atop a 10-foot building. From within the cone, the VOR antenna emits static-free radio signals in all directions for guiding pilots.

The radio signals from the ground station radiate a pattern defining an infinite number of courses that may be flown as well as distance information from the common ground site. The signals from the ground station when received in the aircraft are converted into a reading in degrees and mileage for the pilot.

The ground stations cover about a 50-mile radius at the lower altitudes around the transmitter and greater distances at the higher altitudes such as those being used by the new jet airliners, the FAA said. Normally the stations are placed about 100 miles apart along the airways.

Portland Man Kills Prowler

Portland—UPI—A man prowling a drive-in restaurant was shot and killed by its proprietor early Friday after striking the owner on the arm with a hatchet, police reported.

Deputy Coroner Ross Woodward identified the dead man as Larry Eugene Riggs, 31, Portland. Police said Riggs has a previous record.

Phil Anderson, 37, told police he and his wife, Jean, were awakened by a loud pounding about 3:30 a.m. They live near their drive-in cafe at 633 S.E. Powell Blvd. His wife looked across the street and saw a man stick his head out of one of the restrooms and then close the door.

Anderson said he got his .38-caliber pistol, went over and opened the door of the rest room. He said the prowler lashed out with a hatchet and struck him on the right arm, then rushed past him toward Powell Blvd.

Anderson fired and the man collapsed in the middle of the boulevard. The bullet entered the base of the spine and police said it probably ranged upward to the heart. Anderson said he aimed low and did not mean to kill him.

The Rhode Island State House in Providence boasts one of only four marble domes in the world. The others are atop the Taj Mahal in India, St. Peter's in Rome and the Minnesota State Capitol in St. Paul.

Britain has about 2,400 miles of navigable canals carrying a yearly freight of 12 million tons.
