

SMILE FOR THE CAMERA—Carol Long, 32, leans mockingly at photographer as she sits down in police paddy wagon, after a gambling raid at New York's fashionable Hotel New Yorker. Four girls and forty-five men were arrested in a mirrored, seven-room suite which rented for \$76 a day in the big downtown hotel. The women were indicted on prostitution charges.

Antibiotic Found To Work on Fungus Infections of Skin

By DELOS SMITH
UPI Science Editor
Atlantic City, N.J. — (UPI) — Athlete's foot and other fungus infections of the skin can now be cured from the inside by an antibiotic from the family of fungus which produced penicillin. For almost 20 years since its discovery, it was thought of no medicinal value except for some diseases of lettuce and tomatoes. But four medical scientists reported to the annual meeting of the American Medical Association today that when taken as a pill it attacks and destroys the surface fungus of human beings from underneath.

They cited the case of a girl with a fungus infection of the scalp. Usually the head is shaved for that, but this presents difficulties for a pretty girl. She took the antibiotic by mouth and in due course

it was found in her hair. Meanwhile, the fungus disappeared. Dr. Harvey Blank, reporting for himself and his associates at the University of Miami School of Medicine, listed 200 cases in which superficial infections by the variety of fungi which cause athlete's foot, ring worm, and such afflictions were cleared with a pill a day for three weeks to six months. **Acts Against Bacteria** Penicillin acts marvelously against bacteria but not fungus. This new antibiotic, which is named griseofulvin and is related to penicillin, won't harm bacteria, but it is death for surface fungus. But, disappointingly, it is not effective against the fungus which now and then infects the deep organs of man. He said none of his patients had had any "significant toxic manifestations." Nevertheless, he recommended that other doctors should make regular blood counts for anyone taking the pills—as he does.

On the average, 40,895 Europeans and 327,000 natives are on the job every day in South African gold and uranium mines.

In 1618, two years before the Pilgrims landed at Plymouth Rock, the French explorer Etienne Brule reached Michigan.
