Texas Man's Plan Eliminates Monthly Check Writing Chores

By ELMER C. WALZER UPI Financial Editor

New York—That monthly chore of writing separate checks for gas and electricity, telephone, gasoline, credit cards, and the like would be eliminated under a plan drawn up by a Texas advertising man.

Leonard E. B. Andrews of Dallas, writing in the American Banker, daily banking newspaper, outlines a method whereby customers would tell their creditors to send bills to their bank. The bank would pay the bills and send a record and the bills for scrutiny to the depositor.

Such plan, it is explained, would generally eliminate the use of a clearing house, cut down the number of checks sent and incidentally build business for the bank.

received for you and you indicate if you want them paid, return the slip, and the deed is done.

Bank Would Charge Fee There's a little catch in all this—the bank would charge a fee which Andrews didn't work out.

Here's one example of a big saving in the operation as outlined. Suppose 1,000 of a bank's customers had their telephone bills sent to the bank for payment.

The telephone company wouldn't send 1,000 separate envelopes with four-cent stamps on each of them to the bank. It would send over the 1,000 bills in one package which would be like a deposit if it had an account in the bank. And the bank wouldn't even have to write a check to pay them.

Also the customer wouldn't need to fear over-drawing his account. The bank would see that he didn't.

Andrews points out that the bank in no way interferes with the customer's credit relationship with his creditors.

"The bank acts only as a credit clearing house for its customers and their creditors. If a customer is unable or chooses not to pay a particular merchant during the month, the merchant rebills him as he normally would."

The system would involve more bank bookkeeping, but there would be better income for the bank and the service rendered would be a valuable asset for the customer, Andrews indicates.

CENTRAL POINT Woman Honored at Events

BY DORIS HUGHES Central Point Mrs. O. T. Wilson recently attended an outdoor barbecue at the home of her nephew and niece, Mr. and Mrs. Stephen J. Dodge, Medford.

Relatives who visited Sunday at the home of Mrs. O. T. Wilson to help her celebrate her birthday were Mr. and Mrs. Stephen Wilson and son, Richard, Camp White; Mr. and Mrs. Harry Tonn, Mr. and Mrs. Richard Dunn, all Central Point; Mr. and Mrs. R. E. Nealon, Table Rock; Mr. and Mrs. Ernest Leavitt, Old Stage rd. and Mr. and Mrs. Dave Schneider and son, Davie, who have just moved here from China Lake, Calif.

Of interest to local residents is the appointment by Gov. Mark Hatfield of William P. Grimes of Klamath Falls and James W. Morrell of Portland to the state hydro-electric commission. Grimes, who succeeds Fred C. Dillard, of Tillamook who resigned, is the son of Mr. and Mrs. Lewis Grimes, Gold Beach, and a graduate of Central Point High school. Mrs. Grimes is the former Avis Ayers, daughter of Mrs. Arthur Ayers, Central Point.

Grimes is an instructor at Oregon Technical Institute. Mr. and Mrs. Grimes and their sons, David and Danny, will leave for Corvallis where Grimes will attend the summer session at Oregon State college.

Guests recently at the home of Mrs. Ayers were Mr. and Mrs. Lewis Grimes, Gold Beach.

Visitors at the home of Mrs. Don Thumler were Mrs. Sid Baker and children Jeanie, Judy and Jack, Rogue River. Jeanie remained a few days to visit and to attend Bible school.

Mrs. Andrew Haugen of Sheridan, Ore. left for her

home recently after visiting a week at the home of her son-in-law and daughter, Mr. and Mrs. Donald Lacy. Mrs. Lacy's sister, Mrs. Phillip Scott, McMinville, arrived with her father to visit the Lacy family and to take Mrs. Haugen back to Sheridan. The Lacy's new daughter, Brenda Ann, was born June 8.

Last Sunday, Mr. and Mrs. John Clark were hosts to Mr. and Mrs. Oscar Minnick for dinner in Ashland and a drive to Hyatt lake, Howard Prairie reservoir, and Lake of the Woods road.

Guests at the home of Mr. and Mrs. Henry E. Renfrow were Mr. and Mrs. Gregg Call of Campbell, Calif. The families took a fishing trip to Squaw lake and also visited the Jacksonville Museum. The visitors left early Monday morning to return home by the coast route.

Mrs. Mae Robison, director, and Mrs. Francis Johnson, assistant director, accompanied the Theta Rho Girls to the Theta Rho Assembly held in Lebanon June 19 and 20. Girls leaving June 18 on the trip were Mary Elin Burkhardt, Patty Kime, Judy Wilson, Donna LaFever, Rosalie Wilson, Karen Renfrow and Sandy Renfrow.

Guests Tuesday afternoon at the home of Mr. and Mrs. J. R. Brown were Mrs. Maude Simmons, Ashland, and Mrs. Richard Simmons and Mrs. P. E. Simmons, both of Medford.

A new business in Central Point is the Max-Pat Launderette, which is owned by Charles Patton and William Maxwell, Grants Pass. The firm is open 24 hours a day. Ready for use are 8 double load washers and 4 regular load washers, and 4 50-pound driers.

The proprietors also own a launderette in Grants Pass.

Price Regulation By Food Chains Slated for Study

Washington—(UPI)—House investigators have vowed they would dig "deeper and deeper" into charges the big food chains have conspired to set prices which the housewife pays for the family groceries.

A witness told a House Small Business subcommittee that he was "positive" there was such collusion. Rep. James Roosevelt (D-Calif.), chairman of the house unit, said his investigators plan to make a detailed inquiry of the allegation and also other charges. Among them is the claim that small businessmen are being "frozen out" of new shopping centers because lending institutions will finance only the big food chains.

Wants Testimony Rep. Charles H. Brown (D-Mo.), a member of the subcommittee, said he wants food chain officials called to testify on the "collusion angle" and other price setting matters, especially as they affect the farmer.

One witness before the subcommittee, Donald P. Lloyd, of Salt Lake City, called it "an evil trend" which might develop "a huge monopoly controlling the nation's food industry." Lloyd is past president of the Cooperative Food Distributors of America which has its headquarters in Chicago.

4-H Club News

Sams Valley Livestock Club The Sams Valley Livestock club met on Tuesday, June 16, at the Sams Valley schoolhouse. It was decided that pictures of club members shall be taken to put in our scrapbook.

The next meeting will be held at the McDonough home on June 30. Connie McDonough, Reporter

Teena Paige Sewing Club The meeting was held June 1, at the home of Sharon Trautman. Five girls attended, with Mrs. Boes and Mrs. Thompson visiting.

Mrs. Ashton discussed having a picnic and going swimming afterwards. We will have it at Hawthorne park, and will invite Mrs. Frank Myers' sewing club.

We discussed our patterns, while refreshments were being served. Mrs. Sidener told us Pre-fair would be held July 15. Sharon Trautman, Reporter

Grange News

Griffin Creek Grange The Griffin Creek Grange will meet Thursday night, June 25. A covered dish dinner is scheduled for 6:30 p.m., to be followed by a children's program and the regular Grange meeting.

An invitation is extended to anyone wishing to attend and children are asked to take part in the program.

The Dyna-Soar, the spaceship designed to orbit a man around the earth, will have a top speed of 18,000 miles per hour.

Small Worlds Around Us

By Lynn M. Watkins

Are You a Mosquito Raiser?

Before you "blow your top" because your sensitive skin is being punctured by the sharp stinging of the female mosquito, look closely and carefully at your back yard and see if you are not being raised on your own home grounds. The chances are that many of them are.

By general spraying we might eventually kill off most of the mosquito-eating insects. We could, and have, pretty well reduced the population of bats, and a great many of the birds who feed on insects and mosquitoes. Eradication of these beneficial creatures is relatively easy, but we still have the mosquitoes.

Even drainage will not entirely solve the problem, and part of the reason is that we are apt to look too far away from home.

Harboring Them

Some of the people who harbor the loudest because somebody "doesn't do something about it" are sheltering and harboring the pests on their own lots, and around their own homes. Mosquitoes don't need a stagnant pool in which to raise their young; they are raised in goodly numbers in empty tin cans, flower vases, and a wide assortment of miscellaneous receptacles that can be found in or around nearly every home.

Even a hole in a concrete wall or sidewalk, where your garden spray keeps it comfortably wet, can become a nursery for mosquitoes. A low spot in your yard or garden, where water stands for a time after a rain, or after the lawn is sprinkled, makes an ideal place for mosquito larvae to develop.

Walk along the beach, back away from the water's edge.

High waves and flooding tides have left countless empty sea shells lying there, and each one of them that happens to be open side up will collect dew or rainwater and become just the nicest place in the world for the use of a female mosquito. Each shell becomes a little ocean in which a family of baby insects can be raised.

A Coincidence?

Once, just before a heavy rain, I found empty shells on a beach that were perfectly dry but which contained many mosquito eggs. It may have been coincidence but I suspect that some way or other, the mosquitoes anticipated the coming rain and laid their eggs in shells that would later become little pools of water.

They seemed to know that the egg pressure could be relieved by hunting out the empty shells and at the same time the elements would furnish the necessary water in which the larvae could develop.

If you have a pool in your backyard, it, too, is a magnet that will draw the attention of the mosquitoes. But if you had the foresight to place fish, even goldfish, in the pool, then you have nothing to worry about. Let mama mosquito lay all the eggs she wants to, as fast as they hatch and turn into larvae the fish will gobble them up, and you can have the last laugh for the joke will be on the mosquitoes.

County Delegates to Attend Convention

Several Jackson county delegates will attend the 38th annual convention of the Department of Oregon Disabled American Veterans in Salem June 24-27. The delegates are from Jackson County Chapter 8, DAV, and from the Ladies auxiliary.

Those leaving for Salem Wednesday are Pat Graham, department commander, and Mrs. George Simmons and Mr. and Mrs. James Lillie.

Departmental policies for the coming year will be acted upon at the convention. Featured at the convention this year will be a Centennial ball, with prizes for beards and costumes. The DAV fun society, the National Order of Trench Rats, will hold their annual rendezvous on Thursday. Also present will be the auxiliary, the Order of Alley Cats.

Meteorites have been found to contain 10 to 90 per cent of iron. Of Italy's one million licensed drivers, only about 40,000 are women. MAIL TRIBUNE, Medford, Ore. Wednesday, June 24, 1959

We checked ALL imported cars before we picked DATSUN. Datsun \$1798*. Autos are our business—our only business. We watched the growing preference for imported cars here in the West. Then we checked all makes—carefully. We wanted a true economy car. One that was well engineered, carefully built, and backed by a strong, long established manufacturer. And priced right. Datsun scored 100% on all these vital points. We invite you and your family to test drive the new Datsun. See us today—*Delivered in Medford. DARRELL MILLER CO. 415 S. Riverside Medford

MEMO TO ADVERTISERS The Hallmark of Circulation Value. In the same way that STERLING on silver signifies a standard of known value, so is the A.B.C. emblem a symbol of integrity for the circulation of newspapers and periodicals. It means that circulation so identified is measured according to the rules and standards of the AUDIT BUREAU OF CIRCULATIONS. The A.B.C. is a cooperative and non-profit association of 3,450 publishers, advertisers and advertising agencies. Organized in 1914, these buyers and sellers of advertising brought order out of advertising chaos by setting up standards for paid circulation and establishing rules and methods for measuring, auditing and reporting circulations. Therefore, the work of the A.B.C., of which this newspaper is proud to be a member, provides you with a direct and valuable service. You can buy advertising as you would make any other sound business investment—on the basis of well known standards, known values. At regular intervals one of the Bureau's large staff of experienced circulation auditors makes a thorough audit of our circulation records. The results of this exacting audit show: How much circulation we have; where our circulation goes; how it was obtained; and many other FACTS that you need in order to know just what you get for your advertising dollars. This audited information is published by the Bureau in easy-to-read A.B.C. reports which are available to our advertisers on request. Ask for a copy of our latest A.B.C. report.
