

Nation Not Ready For Atomic War, Scientists Claim

Washington—(UPI)—Scientists said today that an atomic attack would catch America's 177 million men, women, and children totally unprepared and unprotected.

They said much could be done to shelter the population against many of the death dealing hazards of atomic war. They said it is not being done. If such a war comes, they said, millions may die who might have been saved.

This appraisal of the nation's civil readiness for the H bomb was presented to a Congressional Atomic Energy subcommittee which has been taking expert testimony the week on the effects of an exchange of nuclear blows by Russia and the United States.

Big Killers

All witnesses before the subcommittee agreed that the big killers in an H bomb war would be blast, heat and fire, instantaneous nuclear radiation, and gamma radiation from fallout coming down in the first hours or days after an attack.

But the experts insist shelter is feasible against the more distant effects of blast, heat, and fallout radiation. Charles K. Shafer of the Office of Civil Defense and Mobilization said eight inch thick concrete shelters in basement corners might save 96 million lives in a nuclear holocaust.

Smogless Auto Being Tested

Los Angeles—(UPI)—A so called smogless car being tested in smoggy Los Angeles has been described to the Air Pollution Control Association convention by an engineer who said it would reduce gasoline vapor emission.

Fred L. Hartley, research vice president for Union Oil Co., said the idea was aimed at eliminating up to 124,000 gallons of hydrocarbon emission daily in the local atmosphere.

He said Wednesday it would work like this:

The external carburetor vent is closed:

Gasoline in the carburetor bowl is drained back automatically into the gas tank when the motor stops;

The gas tank vent is kept shut while the car is driven;

The gas tank is insulated from the heat of the adjoining exhaust pipe.

Hartley said an afterburner would be needed to handle gas vapors which escape from two other vents, crankcase and exhaust.

Dr. Stuart L. Ridgway and John C. Lair, inventors of an afterburner now under development by Thompson-Ramo-Woodridge and Chrysler Corp., said their device had proven itself in testing but still needed work.

Sleep Walker Kills Husband With Gun

Tampa, Fla.—(UPI)—An attractive young mother with a history of epileptic seizures told police today she shot and killed her husband early today while sleep walking.

Mrs. Lucille Barnett, 32, said she awoke to find herself standing with a smoking rifle over the mortally wounded body of her husband, William, 29.

She sobbed that she didn't remember anything from the time she went to bed until after the shooting. She said she apparently got up in her sleep, went to a closet, took out a rifle, loaded it and shot her husband.

Relatives said they had no knowledge that Mrs. Barnett had any history of sleepwalking. But they said she has been subject to epileptic seizures for years.

California Men Drowning Victims

Reston, Fla.—(UPI)—Two California technical representatives for North American Aviation company drowned five miles east of here Wednesday while swimming in the Gulf of Mexico.

The men were identified by sheriff's deputies as Ephraim E. Takvorian, 46, and John W. Ladd, age unknown.

Deputies said Takvorian's body was recovered by two tourists and that an Eglin Air Force Base helicopter later retrieved Ladd's body.

The bodies were taken to a mortuary at Fort Walton Beach.

Long Beach, Calif., was once a cattle range area.
