Two Experts Behind Wheel Say Women Safest Drivers

By GAY PAULEY
UPI Women's Editor
New York - (UPI) - Two experts behind the wheel, a man and a woman, put the ladies before the men in driving ability.

Although I must confess that Carl C. Crim, the "1959 Driver of the Year," was reluctant to discuss the women motorists.

"You're trying to put me on a spot," laughed Crim, when I asked him who in general was the safer driver—man or woman.

"The woman is quicker, her reactions are fast," he said. "She is more alert. Not easily flustered."

Crim, who lives at Okmulgee, Okla., owns his own tank truck and leaves it on jobs. He has had 28 years of accident-free driving. Covered more than a million and one-half miles, and this record—plus his life-saving efforts on and off the highways—won him the American Trucking association's national citation.

The lady expert is Miss Patricia Jones, a 30-year-old stunt driver touring with Jack Kochman's hell drivers. Miss Jones, a tall blonde from Wichita, Kan., proved this year that she can drive with thrift as well as thrill by piloting a Dodge to victory in the annual economy run. She has used the same make of car in the seven years she has been a stunt driver and estimates she has logged half a million miles.

"To get to be 30 in this business, you have to be careful," she said.

"I do all the stunts the men drivers do, but maybe I'm a little bit more cautious and less aggressive behind the wheel—and the same holds for the 60 million women drivers across the nation. Statistics show they're naturally safer than men."

Many male drivers are "overconfident," she said. She believes the courtesy factor is the prime reason for the low accident rate among women drivers.

Her advice to the woman driver is this: Don't assume that there is a lot of chivalry on the open road.

"You may think your femininity entitles you to go first. But don't risk it. Let the man driver cross ahead of you, cut in or pass," she said.

As for Crim, he believes the rules of the road apply to either sex in the same degree.

Crim said, "I give a lot of the credit for my driving record to my wife. She gets up and fixes me a good breakfast . . . and that's something, for I begin work at about four in the morning. She never starts out with an argument."

Said his wife: "At that hour, who's awake enough to argue!"

Bardot's Sister To Make Film in U.S.

Space Age in Kitchen

New York - (UPI) - The space age in kitchenware gets another boost with a new knife blade developed in the course of missile and rocket research.

A thin strip of tungsten carbide applied to one edge of the stainless steel blade provides a self-sharpening action in use, says the manufacturer. The manufacturing method, called flame plating, has been used widely to add toughness and durability to jet engine, rocket and missile parts.

Presidents Named At 4-H Session

A total of 1,853 boys and girls from every county of the state are delegates to this year's summer school. They attend daily classes in agriculture, home economics, forestry, health, and related subjects. Daily assemblies and music and recreation activities are included as part of the program.

Volatile
New York - (UPI) - If warmed brandy doesn't flame when you pour it over cold food, you may have heated the brandy too much before igniting it. A few seconds in a shallow pan over a low flame are usually enough to raise brandy to the correct temperature without burning away the alcohol permanently.
