Salem Men Start Mexico Bike Jaunt Salem (UPI)—Two young men left Salem Friday on a 4,000-mile bicycle jaunt to Southern Mexico—they hope. Ron Reeves, 24, and Dale Thomas, 26, left here because they were "fed up with a conventional life of hi-fi and foam rubber cushions." They plan to poke around some of the old Mayan ruins near Yucatan. "Once we made up our minds we just decided to go through with it," the pair said. They plan to make about 50 miles a day through California, Arizona and on into Louisiana. From there they will take a boat across the Gulf of Mexico to Yucatan. Reeves, a former reporter for the Oregon Statesman here, plans further travels. Thomas hopes to find a business career in Mexico City.

Test of Man's Worth Is Service He Renders

"The test of a man's worth to his community is the service he renders it," Eugene Emunson declared in a talk to Medford Kiwanians Wednesday at the Rogue Valley Country club. Emunson, San Francisco, a consultant and campaign specialist here for the Jackson County Chamber of Commerce "Keep Pace With Tomorrow" program, spoke on "Mr. Kiwanian" at the luncheon. Stressing that "leadership makes the difference," Emunson said, "Think about yourself and the niche you occupy in the community." He pointed to the Kiwanis club slogan, "We Build," and mentioned that a community reflects the personality of the people who live and do business in it. The consultant stated that the tangible things of a community are a reflection of an idea and an expression of personality. Individuals need not money to leave monuments in a community, Emunson maintained. They can be left through leading and working for the community, he said. Emunson added, "Your efforts will last forever." From leadership comes organization, from organization comes program and from program comes community development, the speaker told the club. He outlined agricultural, industrial, trade, civic and publicity elements of development. Emunson listed 16 revolutions basic for the prosperity of America. These, he said, are expanding research, population explosion, the rush to the suburbs, spreading of income, harnessing of paper work with business machines, efficient farms, new style selling, automatic factories, plentiful power, abundance of metals, transportation speed up, tomorrow's weapons, the radio-television area, better education, management changes and government planning.
