

Clackamas May Be First To Get Hill-Burton Funds

Portland (UPI) — First chance at about \$1,400,000 in Hill-Burton act general hospital construction funds will apparently go to Clackamas county. This was indicated by the proposed 1960 revision of the state medical facilities construction plan made public Friday.

The funds are expected to be allocated to Oregon for the fiscal year beginning July 1.

According to a health board spokesman the proposed plan probably will be accepted at the next regular meeting of the state Board of Health Aug. 1.

Amount Undecided

The amount of the allocations to Oregon has not yet been decided by Congress, but the spokesman for the health board indicated that it is to be slightly less than \$1,400,000 for the current fiscal year.

About \$1,441,000 of the 1959 funds were to be for general hospitals with \$193,658 for nursing homes and chronic disease facilities, \$100,000 for diagnostic and treatment centers, and \$93,658 for rehabilitation centers.

Clackamas county was the only area given a Class A priority for general hospital money in the proposed plan.

This Week's Home of Distinction

Persons planning to build a home today are much more plan conscious than those who built only a few years ago.

They not only look for, but demand, a really workable floor plan arrangement. Regardless of other requirements, a center hall design is nearly a "must" with today's builder. This home meets this need and offers many other excellent design features.

A dining ell off the living room is sufficiently large to convert into a separate dining room by constructing a wall between these two rooms.

Three closets plus a linen storage and furnace closet open onto the hall. A large closet which can be used for

storing family silver, china and table linens opens into the dining area.

The latest built-in appliances are features of the compact kitchen. A long bar for family meals is located between the kitchen and family room.

Large sliding glass doors in both family and living rooms open onto the patio, which extends across the entire rear of the home.

The service area has been eliminated to save space and the washer and dryer placed in a closet off the family room. Storage shelves have been provided above the washer and dryer.

The centrally located water

heater and forced air heater will save money during construction as well as during operation.

The master bath offers a pullman lavatory with storage below, a tub with shower over, and a semi-private water closet.

A dressing room with "Mr." and "Mrs." wardrobes and a three-quarter bath are features of the master bedroom suite. A private bath with large tile shower and pullman lavatory opens directly off the dressing room.

Cedar shakes top the gable roof and the exterior is completed beautifully with both horizontal and vertical siding

as well as used brick veneer and planters.
