

Pendleton Round-up To Play Host To Indian Gathering

Pendleton - The nation's Round-up City will play host to the largest Indian tribal congress in the United States when the National Indian Encampment opens in Pendleton, July 18-26.

Oregon's Gov. Mark Hatfield has invited members of 2,300 tribes in North America to participate in the encampment, which is being presented as one of the Oregon Centennial's most popular tourist attractions.

Activities will include authentic reproductions of Indian tribal ceremonies, dances, traditions, as well as special arts and crafts that have become almost extinct today.

The Encampment will be held at the Pendleton Round-Up grounds and will be open to visitors each day. Indian families will be housed in decorated tepees which are being set up within the grounds, in reproduction of an authentic Indian village.

Dances To Be Presented
The tribal ceremonies and dances will be presented during a two-hour show each afternoon and evening, with tickets available at the gate prior to each performance.

Two Different Worlds
The British Crown and the American Presidency are two different worlds. Standing on the deck of the royal yacht Britannia together, the President and the Queen were cheered lustily by workers along the St. Lawrence Sea-

way. "Hi Ike," roared the workers. The President responded with a broad grin and waved both arms in the air.

There were "three cheers for Her Majesty" and cries of "God bless Her Majesty" but the Queen didn't show a flicker of recognition or emotion. So schooled in the dignity of a monarch, she seemed totally unaware of the people cheering her only a few feet from the deck of her yacht.

Arch Criminals?
Maybe it was the hot weather, or the sudden nature of the trip, but when the President went to New York this week to visit the Soviet exhibit of science and culture, the New York Police behaved as though the people traveling with Eisenhower were arch criminals.

The President entered an elevator in the New York Coliseum, but several of New York's "finest" grabbed indiscriminately in the waiting crowd and began forcing anyone within grasp away from the area.

Among those pushed aside and told to stay back were the President's son, Maj. John S. Eisenhower; Maj. Gen. Howard McC. Snyder, the President's physician, and Secretary of Commerce Lewis L. Strauss.

'Throw 'em Out'
The New York Police have long had a difficult attitude toward Washington reporters traveling with a President. The Washington men wear distinctive white lapel tags which carry the legend, "Trip of the President."

At the Coliseum, one big police captain shouted to his men, "grab any of those guys with white tags and throw 'em out!"

A Secret Service agent who tried to intercede was shoved up against a wall. And a New York police sergeant rapped a night stick in to the palm of his hand and growled, "I'd like to hit one of 'em just once - hit him real good just once."

Hoffa's Union Aids Tillamook Strikers
Portland - (UPI) - Teamster President James R. Hoffa has announced his union is giving financial support to Oregon teamsters in their strike against the Tillamook County Creamery Association.

ANTHRACITE PLENTIFUL
New York - (UPI) - There's enough anthracite underground in eastern Pennsylvania to furnish the fuel needs of the U.S. for more than 200 years, according to a statistical survey released by the Anthracite ureau.

UO Method Tests Blood Before Transfusions

Portland - (UPI) - The University of Oregon Medical school here has announced a fast, simple method for testing the compatibility of donor and patient blood before transfusions. Authorities said it could mean the saving of lives when speed of transfusion is essential.

More Accurate
Because the method is faster and more accurate than present ways, it is expected to become the preferred method in hospitals throughout the world.

Present methods require up to two hours to complete, involving three tests at three different temperatures and nine test tubes. The newly developed method used a group of enzymes from the pineapple stem prepared in a concentrated powdered form called bromelase, the Medical School scientists here said. They have devised a single test requiring 15 minutes showing an excellent sensitivity and a wide range of activity including detection of virtually all antibodies presently known to blood specialists.

Dr. Bernard Pirofsky, assistant professor of experimental medicine, and Melvin E. Mangum Jr., laboratory assistant, said that in cases of emergency, the test may be performed immediately without the 15-minute wait with only a slight loss of sensitivity. They reported on the new method in the current issue of a scientific journal, Proceedings of the Society for Experimental Biology and Medicine.

During 1946, 4,600,000 United States workers were involved in strikes.

SAFE AT HOME
New York - (UPI) - Youngsters playing sandlot baseball can now run for home plate instead of the hills if they accidentally break a window, according to Frank C. Russell, president of a Columbiana, Ohio, window-making firm. Russell said his firm guarantees free replacement, provided the youth carries a card from a Rusco dealer. About 500,000 of the cards are being handed out free this year, he said.

FEELING FINE—President Eisenhower (left) and Soviet First Deputy Premier Frol Kozlov seem to be in excellent spirits at the end of their hour-and-ten-minute meeting at the White House. Kozlov expressed the hope "that peace will prevail throughout the world."

Back Stairs: Ike Greets Canadians

By MERRIMAN SMITH
UPI White House Reporter

Washington - (UPI) - Back stairs at the White House: When President Eisenhower was in Canada last week to meet Queen Elizabeth II, members of his party heard what was told as an absolutely true story which demonstrates the still great differences between Americans and their British cousin.

It seems that loyal Canadians have been writing their local radio stations, asking disk jockeys not to play one of the current hit tunes in the United States these days, "The Battle of New Orleans."

The callers say the record should be silenced while the Queen is in Canada. The British lost at New Orleans and the theory seems to be that Her Majesty shouldn't be reminded of this nasty affair.
