# The Medical Roundup

by *Walter Alvarez*

Emeritus Consultant in Medicine, Mayo Clinic  
Emeritus Professor of Medicine, Mayo Clinic

## Glaucoma

A recently read article on the early diagnosis of chronic simple glaucoma, by Dr. W. H. Havener, of the Ohio State University in Columbus. I must keep emphasizing in this column the tremendous need for people's paying quick attention to the early symptoms of glaucoma, because if they don't, they can go blind. It is one of the common causes of blindness. Every so often I am horrified when persons write, as they do, saying, "I saw your column on glaucoma and I wonder now if I have it. For the last several months I have had trouble with my vision and I have had some pain in my eyes, but I have been going to a quackish person who

Dr. Alvarez

promises to cure me with Bates' Eye Exercises." Instead of playing around with such a man, he should have been walking as fast as he could to the office of the best ophthalmologist he could find. There, the doctor would measure the tension in the eye-balls with an instrument called a tonometer. In cases of glaucoma, the tension is increased.

"Thief in Night"  
As Dr. Havener says, glaucoma is present in about 2 per cent of persons over 40 years of age. The chronic simple form of glaucoma is the most common type of the disease. It has been termed "a thief in the night" because, without warning, it can destroy vision. Its approach is usually painless or, at most, it causes slight occasional aching of the eyes. Complete blindness can result without any acute attack. What happens is that the pressure inside of the eyeballs gets too high. It is easier for fluid to get into the eye than to get out of it. The increased pressure interferes with the nutrition of the retina (the seeing-part of the eye). What is horrible about neglecting this disease is that, in its advanced stages, it does not respond well to medical or surgical treatment, and it may go on to blindness. In the early stages, it usually can be controlled with medicine. Persons should be particularly watchful for glaucoma if it runs in their family. It is hereditary.

Iris Bows Forward  
As Dr. Havener says, it comes usually in older persons, and older persons with a family history of the disease. An expert will notice often that the anterior chamber between the cornea and the lens is shallow, and the iris (colored curtain in the eye) seems to bow forward, toward the cornea. Often the patient, by the time he gets to an ophthalmologist, says that he has been changing glasses every so often without getting better vision.

## Gold on Display At Bank During Month of July

Gold, which built the West and a good share of the East is being displayed locally in the lobby of the U.S. National bank, Medford branch, Main st. and Central ave. It is a joint endeavor of the Northwestern Council and the Roxy Ann Gem and Mineral club. The display shows many types of gold, in various forms. It includes placer gold, which is gold as it comes from the streams and earth and needs no special processing; while the quartz and gold is ore as it is found in pockets and veins, and usually has to be milled or processed to free the gold from the quartz.

Watch and Ring  
Also on display is a beautiful watch and a ring, both of which are encrusted with gold nuggets. Another solid gold watch on display dates back to the time of Abraham Lincoln and carries Lincoln's signature in the back of the case.

The largest of the gold and quartz specimens weighs about 40 pounds and is made up of dog-tooth quartz with a line of gold through it. It is reported to be rare and unusual.

Among the donors to the display are Delmar Smith, W. V. Johnston, Bert Pankey and Jerry Smith, Gordon and Leona Talbot, George and Fred Brewer, Glenn Hall, Fred Residori, J. H. Mapston and H. J. Ernst. The display will be in the bank through July.

## Portland Boys Injured in Blast

Portland — (UP) — Two Portland boys were injured, one seriously, early Thursday night when an unexploded blast rocked the area around N.E. 11th ave. and Oregon st. in Portland.

Injured were 9-year-old Gregory Beck and 5-year-old Ted Michael Borgan.

The Beck youth was admitted to Providence hospital for surgery to a badly mangled left hand and wrist. The Borgan boy suffered gashes in his arm, his chest, and his hip. He was treated at a nearby doctor's clinic.

Police said a burned spot and some discarded matches were found in the vacant lot where the blast occurred.

# Project to Receive Bids for Surfacing

Bids for the surfacing of operating roads on the Talent division, Rogue river basin project, will be received until 10 a.m. July 28, at the Bureau of Reclamation at Camp White, according to J. A. Callan, project construction engineer.

The Deadwood tunnel access road and roads along a portion of the South Fork collection canal will be involved in the surfacing operations.

Plans call for the preparation of 10,500 linear feet of subgrade for operating roads, furnishing and applying 50,000 gallons of water, and furnishing and placing 2,400 cubic yards of cinder surfacing. Completion time will be 60 calendar days.

Philadelphia — (UP) — Livingston Ludlow Biddle Sr., 80, big game hunter and patron of the arts, died here Tuesday.
