

In the Day's News

By FRANK JENKINS

Progress notes on Nixon:
He carries his "peace and friendship" message to Novosibirsk, deep in the heart of Russian Siberia, the so-called Wild West of the Soviet Union. Novosibirsk is 1,750 miles east of Moscow, and is often described as the Chicago of Siberia.

Not only that.
His party was accompanied by two other big Russian jets carrying foreign newsmen. This is undoubtedly the largest number of foreign correspondents ever to travel so far into the heart of Russia. When they get home, they can tell what they saw.

ON SATURDAY night, Mr. K (after the history making spat) turned over his country estate to the Nixons and then played friendly host at a river cruise and a dinner for them.

Mr. Nixon prevailed on Russian officials to permit Admiral Hyman Rickover, America's crusty father of the atomic-powered submarine, to "see everything he wanted to see" in the Soviet's big nuclear-powered ice-breaker. Rickover's statement that "it hasn't got anything we haven't got" was permitted to be sent out by the correspondents without censorship.

AND so on. Our vice president seems to have been permitted to use on the Russians all his concededly great talent for breaking down suspicion and ill will and building up admiration and good will.

AS TO Mr. Nixon, let's not lay it on too thick. To do so would sound like political puffery. Paraphrasing Mark Antony's "Friends, Romans, and countrymen, lend me your ears; I come to bury Caesar, not to praise him," we can say we're not seeking at the moment to elect Mr. Nixon President of the United States. We're seeking to APPRAISE him. We're making up our minds as to just how good he is. What we want above everything else is an OBJECTIVE look at him.

These are too serious times for political puffery. We're looking for the TRUTH—about Mr. Nixon, and about the Russians. That's why the accounts of the Nixon visit to Russia are getting such intensive reading in America and throughout the western world.

WE KNOW we mustn't permit the wool to be pulled over our eyes.

This is WAR we're in—even if it is cold war. Cold war can lead to hot war. Strategy is superimportant in war—whether cold or hot. One of the basic purposes of strategy is to FOOL your enemy in the hope of getting him into a state of false security in which you can hit him when he isn't looking and put him out of business. That may be what the Russians are aiming at now.

Still—
Let's watch what is going on over there with interest and not TOO MUCH cynicism—meanwhile keeping our minds busy and our fingers crossed. These are dangerous times, and we need to learn everything we can learn about what is going on.

As Mr. Nixon himself said the other day: "If we and the Russians can't learn to LIVE together, we'll have to DIE together."

Body of Three Year Old Found in Creek

Pendleton—UPP—The body of John Paul Jacobsen, 3, son of Mr. and Mrs. Dale Jacobsen of Pendleton, was found in McKay creek about two miles south of here Wednesday afternoon.

The boy had been missing since Wednesday morning and his body was recovered a few hundred yards from where he apparently toppled into the creek—which is running bank-full with irrigation water.

Sheriff's deputies, city and state police, volunteers and skin divers all joined in the search for the boy.

Three-Dimensional 'Paintings' Designed

St. Louis—(Science Service)—Translucent three-dimensional "paintings" are being designed from the plastics styrene and polyethylene.

Developed by William Lang, director of design, Monsanto Chemical company here, the forms are held in place in a frame by thin, almost invisible, threads of nylon. Lang gets the colors, textures, and patterns he desires by "throwing things into the mixture—a dash of contrasting color, or something to create air bubbles or streaks."
