# Local and Personal

**Barometer Taken** – Harry Edward DeVore, 3120 North Pacific highway, Medford, told Medford police Sunday that someone entered his home some time Sunday and took a barometer combination valued at $17.50.

• • •

**Fender Skirt Taken** – Gene Reuben Roethler told Medford police Sunday that a green fender skirt was taken from his car recently while it was parked on North Fir st. between West Main st. and West Sixth st. The article is valued at $25.

• • •

**Skunk Lost** – Colleen Yvonne Roberts, 1321 Sewart ave., Medford, told police Sunday that her descented pet skunk named "Violet" had disappeared from the garage to the rear of her home. Police were unable to find the animal.

• • •

**Entry Charged** – A 15-year-old Medford youth was arrested by Medford police Sunday on charges of illegally entering the Old Armory building, 410 North Bartlett st. The youth had entered through a window in the northeast corner of the building, they reported.

• • •

**Driver Cited** – Edgar Robert Walker, route 1, box 8B, Jacksonville, was cited by Medford police for following too close. A car driven by Venzel Lockard, 210½ Washington st., Medford, was hit by a car operated by Walker as the Lockard car was driving east on West Eighth st. near South Holly st.

• • •

**Auto Accident** – A car driven by Katherine Velma Crismon, 1001 South Oakdale ave., Saturday night struck a parked car owned by Floyd Edward Hayner, 722 Pennsylvania ave., Medford, city police said. Katherine Crismon told police that an oncoming car blinded her as she was going north on Oakland ave. She said she did not see the car parked on the east side of Oakland ave. and just south of the intersection of 11th st. and Oakdale ave.

• • •

**Cars Collide** – Harold F. Johnston, Camp White, was cited by Medford police Sunday morning for improper lane usage following an accident that morning on North Central ave. between Beatty and Clark sts. William David Weaver, Talent, told police that he had been traveling in the left lane and was south bound on Central ave. at Beatty st. when Johnson's car traveling in the right lane changed into the left lane, hitting him on the right front side with the left rear portion of his car.

**Patient**–John Holloway, 2-year-old son of Mr. and Mrs. Floyd Holloway, Bandon, Ore., is a surgery patient at Medford Osteopathic hospital.

• • •

**Bicycle Missing** – David Earnest Forbes, 85? Stewart ave., reported to Medford police Monday that his bicycle was missing from McLoughlin Junior High school racks Monday afternoon.

• • •

**Lost Documents** – John Harold Eller, route 1, box 447, Central Point, informed Medford police Sunday that he had lost a brown envelope containing documents from the state on Front st. about 4 p.m., Saturday.

• • •

**Dinner**–The first fellowship dinner of First Christian church this fall will be held tonight at 6:45 o'clock at the fellowship hall. The dinner will be potluck with the Chi Rho Fellowship in charge of the program.

• • •

**Hubcaps Taken** – Geraldine Rae Willson, 1506 West Main st., Medford, complained to Medford police Sunday that two hubcaps were taken from her car while it was parked in front of her home Saturday night. They were valued at $16.

• • •

**Bothering Children** – Medford police Monday said a boy was reported bothering small children on Newtown st. A 17-year-old boy was cursing children and an adult, police said. The matter was referred to the Jackson county juvenile department.

• • •

**Being Held** – A 16-year-old Jacksonville youth is being held in the Jackson county juvenile detention home on charges of obtaining money under false pretenses, Medford police reported Monday.

Police said the youth attempted to cash a check in a local store Sunday.

• • •

**Charges Assault** – Elmer Vernon Tompkins, Coleman Creek rd., complained to Medford police that he was assaulted by an unidentified man Saturday at the corner of Main and Front sts. Tompkins said the man pushed him down on the sidewalks and hit him. Police are investigating.

• • •

**Window Broken** – Lawrence Milton Wilson, 666 Iowa st., Ashland, reported to Medford police Sunday that a window was broken at the First Presbyterian church at Eighth and Holly sts. The stained glass window is located on the church's south side. A flood light over the back door was broken also. Minimum estimated repair cost is $100, police said.

• • •

**Dog Bite** – Twelve-year-old Marvin Lee Watson, of 1699 Grand ave., was bitten by a dog Sunday on Grand ave., Medford police were informed by the boy's father, Douglas Junior Watson. The father said the boy was talking to a friend when the dog, on a chain, jumped and bit the boy on the left elbow. The dog was being held by Dianne Lea Heidmann, 1553 Grand ave., who was talking to the boy. The dog's owner was informed.

**UN WELCOMED**—Members of the four-nation UN fact finding team arrived at Vientiane Wattay Airport, Vientiane, Laos and receive the traditional welcome flowers from kneeling Laotian girls. Receiving flowers (left front) is Shinichi Shibusaway, chairman of the mission.

## Obituaries

**CHARLES J. FRY**

Funeral services for Charles J. Fry, 86, of 323 Chestnut st., who died in a local hospital Saturday, will be held at Perl Funeral home Wednesday at 1:30 p.m. The Rev. Duane Alvord of the St. Mark's Episcopal church will officiate. Interment will be in the Jacksonville cemetery.

Mr. Fry was born in Fort Wayne, Ind., April 9, 1873, and was a retired miner. He moved to Scott Valley, Calif., in 1894 and was active in plaster and quartz mining until he came to Medford in 1910, and was active in copper mining on the Upper Applegate. In the early 1920's he operated a pear orchard on South Peach st., and in 1930's he operated coal property on Roxy Ann butte. He was in the Alaskan Gold Rush in 1898 and in the Thunder Mountain Gold Rush in Idaho in 1906.

Survivors include on stepdaughter, Berta Cooper, of Walnut Creek, Calif., and one brother-in-law, John Hamilton of Portland and several nephews and nieces.

**DEFICIT SPENDING**

Rio de Janeiro, Brazil–(UPI)– The Brazilian government has announced that henceforth it will substitute coins for all one and two cruzeiro notes. It said it cost 1.2 cruzeiros to print a one cruzeiros note.

## Portland Livestock

Portland—(UPI)—USDA—Cattle 400. Average to high good 1121 lb. fed steers 27; 1209 lb. 24.50; standard-low good 960 slaughter steers 25; canner-cutter and utility steers and heifers 16-21; canner-cutter cows 12-13.50; utility bulls 1150 lb. 23.50.

Calves 100. Good-low choice vealers 27-30; standard 23.26.

Hogs 400. No. 1 and 2 butchers 200-220 lb. 15.25-15.50; mixed 1, 2 and 3 at 180-235 lb. 14.50-15; No. 2 and 3 at 240-265 lb. 14.

Sheep 900. Good-choice 85-95 lb. shorn slaughter lambs 18.50-19; cull-good ewes 2-5.

## Portland Produce

Portland—(UPI)—Dairy market: Eggs—To retailers: Grade AA extra large, 52-55c doz.; AA large, 50-51; A large, 44.48c; AA medium, 40-41c; AA small, 26-28c, cartons 1-3c additional.

Butter—To retailers: AA and Grade 3 Prints, 70c lb.; carton, 1c higher; B prints, 68c.

Cheese, medium cured—To retailers: A grade cheddar single daisies 41-51c; processed American chese, 5-lb. loaf, 40-43c.

**Farm Market**

Best local celery sold to retailers at 3⅜3.25 a crate with California offerings of 2-2½ dozen stalks at 4-4.50; California large tomatoes sold at 4-4.25 to retailers; first Hood River Yellow Newtown apples offered at 2.75 for extra fancy.

**Poultry, Rabbits**

Live Chickens—Quoted to growers at Portland, Salem and south to Eugene, f.o.b. ranch, No. 1 quality fryers, 2¾ 4 lbs., 17-18c lb.; hens, 7-8c; heavy hens, 9-10c lb.

Dressed Chickens—No. 1 grade dressed to retailers: Fryers, whole drawn, 34-37c lb.; cut up, 39-42c; hens, heavy type whole drawn, 35-38c; light-type cutu p, 29-34c lb.

Dressed Turkeys—To producers, A grade young hens, up to 28c lb. on an oven-ready basis; A grade young toms, 26c lb on same basis wth 28ci lb. offered for 24-pounders or over. To retailers, A grade young toms, 34-45c lb., depending upon weight; to producers, A grade fryer-roaster turkeys, mostly 28c; to retailers, 39-42c lb. on basis of volume purchased.

Rabbits (average to growers, f.o.b. killing plants)—Live white, 3¾-4½ lbs., f.o.b. Portland, 19.21c; colored pelts, 5c under. Fresh killed fryers to rtailers, 56-58c lb.; cut up, 60-62c.

## Portland Hay

Portland—Wholesale Hay Prices: New crop No. 2 green alfalfa, baled, f.o.b. Portland and Seattle, $34-35 ton; some to $37 at Portland.

# New Methods for Water Evaporation Control Studied

Santa Fe, N. M. –(Science Service– Castor oil may soon be helping to save thousands of gallons of water.

One form of the oil is under study as a water evaporation retardant, two researchers reported here to a conference on the evaporation problem.

Not only does its chemical structure make it appear to be a promising thin film that could reduce water losses but the castor oil also is bacteria– and fungus–resistant. This means that devices designed to dispense the castor oil compound over the water surface will resist attack by these micro-organisms. It lasts longer because biochemical oxidation of the retardant is reduced.

The compound, 10-undecen--ol, is obtained by dry distillation of castor oil. Robert R. Cruse of the Southwest Research Institute and Charles L. Shrewsbury of the Southwest Agricultural Institute described the compound together with other recent developments in reducing water evaporation.

Hexadecanol, a white, waxy solid used in cosmetics, detergents and emulsifiers, is one of the most widely tested and best of the chemicals used for coating water surfaces. Applied as a one-molecule thick film to farm ponds, it caused as much as a 35 per cent reduction in evaporation losses. All retardants tested, including hexadecanol, were completely non-toxic to men or animals, the scientists pointed out.

**Not Economical**

They also said that the one-layer thick film is not economical in places where there is continuous high relative humidity. Other factors which affect the success of using the chemical retardants include: temperature of air and water, area of water surface, wind velocities and the type of dispenser or method of application.

Future studies were suggested as a result of past field and laboratory research. The scientists said they need to know more about the compounds being used. Impurities reduce the water evaporation retardants' effectiveness. Irradiation of hexadecanol as well as an evaluation of compounds that kill bacteria or slow down their growth were mentioned as promising projects.

## Weather

**FORECASTS**

Medford and vicinity: Fair tonight and Wednesday, except for morning cloudiness. Warmer Wednesday. Low tonight 42. High Wednesday 82.

Western Oregon: Clear tonight, except for patches of fog tonight and early Wednesday, becoming mostly sunny Wednesday afternoon. Low tonight 40-50; high Wednesday 70-80. High along the coast near 65.

Northern California: Fair tonight and Wednesday, except local coastal fog in the morning.

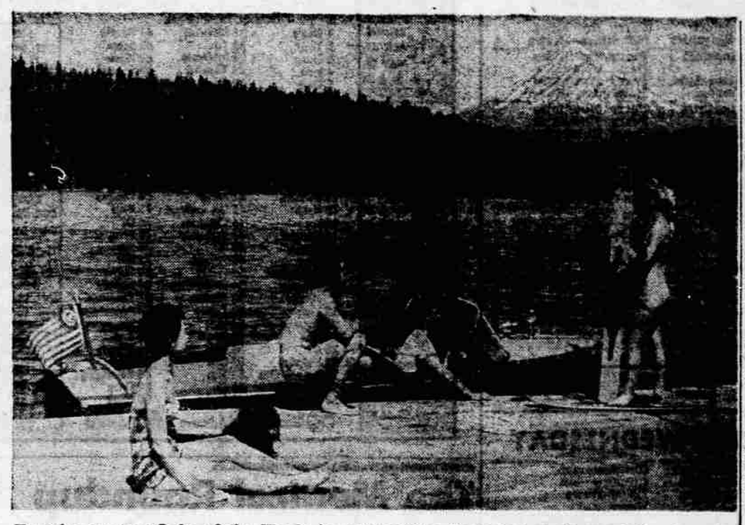
| West Coast Tel. | 24⅜ | 26 |
| Weyerhaeuser | 41¾ | 44⅛ |

# Klamath Scenic Lures Plentiful



**Favorite sport at Lake of the Woods is water skiing. Lake is just off paved forest road 31 miles northwest of Klamath Falls. Swimmers and fishermen flock to scenic lake.**

The following is a condensation of a motorlog that appeared in The Oregonian, one of an annual series sponsored jointly by The Oregonian and the Oregon State Motor Assn. These travel articles describe vacation trips and vacation spots of particular interest to out-of-state visitors coming to Oregon for the Centennial celebration.

By PAUL LAARTZ
Night City Editor, The Oregonian

Klamath and Lake counties are among Oregon's southern gateways, and through them have been pouring thousands of visitors — many more than in years past — to share in the state's Centennial year.

Though similar in general, characteristics, the two counties are distinctive in the tourist and scenic features they have to offer.

Klamath County is well known, of course, for its lumbering and business—as a leader in these fields in southern Oregon.

But it's rightfully proud of its beautiful lakes and scenic attractions.

**Lake Formed in Caldera**

Topping the list is its world-renowned Crater Lake, a national park since 1902. However, along the broad back of the Cascades are also scores of other lakes, notably Diamond, Crescent, Odell, Lake of the Woods. And in the center, of course, Klamath Lake.

Though all these lakes are gems in their own category, the best known of these jewels is unbelievably blue Crater Lake, the deepest lake in North America.

It's only 56 miles north of Klamath Falls, via the lush Wood River Valley — which some term one of the richest cattle-feeding areas in the world — past historic Fort Klamath and Klamath Agency, and up on the spine of the Cacades.

Crater Lake was created several thousand years ago when mighty Mt. Mazama, a 12,000-foot volcano, discharged a tremendous quantity of ash and lava. The mountain top collapsed, creating a caldera which contains today's Crater Lake.

The awesome lake is about six miles wide, 20 square miles in area and has about 20 miles of shoreline. The uneven crater rim — about 7,000 feet elevation — towers as much as 2,000 feet above the lake.

**Many States Represented**

Increasing thousands visit this creation of nature annually. On any day, one can see auto licenses from Virginia, Kansas, Texas, Alaska, with California and Oregon predominant.

To the north, some 20 miles, is Diamond Lake, another beauty in the chain of lakes up and down the backbone of Oregon's Cascades, and a mecca for fishermen. Rainbow and Kamloops trout are plentiful. There are lodge, restaurant, camping and like facilities.

A longtime favorite among southern Oregonians and northern Californians is Lake of the Woods, some 35 miles west of Klamath Falls.

It's beloved for its water sports, camping, family outings.

However, one of the most amazing stops on this Oregon State Motor Assn. Oregonian Motorlog was a visit to the Lava Beds National Monument, 41 miles south of Klamath Falls and near Tulelake, Calif. Calif.

Not only does it show off nature's flaming wrath of centuries ago, when volcanoes in what is now northeastern California spewed forth great masses of molten lava, which in cooling left weird and rugged masses of rock.

**Natural Fortress Used**

But it incorporates what might well be described as an infantry soldier's nightmare. It was in these twisted, mishapen lava belches — in 1872-73— that one of the Pacific Coast's last and most famous Indian wars was fought. It was also one of the most costly Indian campaigns engaged in by the United States.

Into these lava masses, which had formed natural trenches and strongholds in solid rock, some 71 fighting Modoc Indians, under a leader known best as Captain Jack, fought off a U.S. cavalry unit 15 times their number.

The Modoc War started in 1872 when a small band of Modoc Indians, angered at having to share a reservation with their hereditary enemies, the Klamaths, clashed with U.S. troops near Lost River in Oregon, near the Oregon-California border.

**Indians Win Battles**

After raiding adjoining settlements, Captain Jack's crew retreated to the natural lava-bed fortresses and, safe in the rockribbed trenches and caves, withstood all attempts of the whites to dig them out.

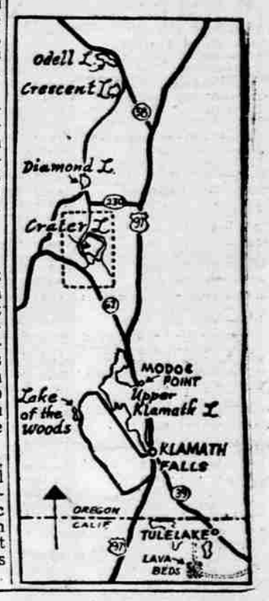
The Indians, in the process, won two battles. In one, two-thirds of the white command was killed or wounded.

Gen. E. R. S. Canby was killed during a parley with Indian leaders under a flag of truce. The Canby Cross was later erected there to his memory.

**Visitor Has to Walk**

It was only when the white men were able to cut off the Indians' water supply that they won the final battle. The Modocs got their water from Dry Lake, since pumped dry by the white man's Bureau of Reclamation.

A few weeks later, Captain Jack was captured. In the fall of 1873, he and three other leaders of the band were hanged at Fort Klamath.



# Hair Spray Held To Be Hazardous Aid to Beauty

London –(Science Service)– Breathing in hair spray was responsible for one woman's symptoms of cough, loss of appetite and suspicious shadows on her lungs, a British scientist reports here.

Other cases of similar shadows which show up in X-rays and have no known cause may be due to inhaling hair spray, suggests Dr. B. G. Edelston, physician-in-charge at the Folkestone and Dover Hospital's chest clinics.

**Long History of Cough**

All tests for tuberculosis and other diseases, blood tests and physical examinations were normal in the woman studied. However, she had a year-long history of cough, loss of energy and appetite and a general "un-well" feeling. Chest X-rays showed enlargement of the lymphnodes in both lungs. The patient said that she had used two well-known brands of hair spray beginning about 12 months previously. She had used them perhaps twice a day for about six months, and then stopped.

Several researchers have found that natural and synthetic resins–the "varnish" in the hair spray–can produce granulatoma or granule-like lumps in the lungs, Dr. Edelston reports. Although laboratory experiment have shown some of these substances can cause cancer-like growths in rats and mice, their effects on human beings is still not clear. Possibly 15 to 30 years may have to pass before such tumors develop in a person, Dr. Edelston points out.

**New Medical Problems**

"The increasing use of cosmetics in all countries may create new medical problems because some constituents used in their manufacture are unknown," the British scientist says. "Usually these formulas are jealously guarded secrets and the makers are not as a rule in a position to estimate the possible dangers to users of their products. Hair sprays thus come into the category of hazardous aids to beauty, despite the careful directions for their application on the containers."

Manufacturers might advise women to use face-masks before using the hair sprays and to move out of the spray as quickly as possible, Dr. Edelston suggests.

Several months after the patient's first X-rays, her lungs appeared almost normal. The irritant may have been removed from the lungs and stored elsewhere in the body, possibly in the liver or spleen. The ultimate effects of the irritant can be determined only by long observation, Dr. Edelston concludes.

## Steel Negotiators In Short Session

New York – (UPI) – Top-level steel negotiators met briefly today, then adjourned until Wednesday to confer with union and management subcommittees.

No progress toward settlement of the 70-day steel strike was reported at the conclusion of today's 20-minute meeting, the shortest since the strike began.

Top negotiators for both sides were meeting later today with representatives of 12 subcommittees which have been discussing local work rules on a company by company basis. A general review of the subcommittee's work is expected to be made when top-level negotiations resume Wednesday.

## Roseburg Women Injured in Crash

Portland–(UPI)–Two Roseburg women were injured, one critically, Monday when their small foreign car went out of control on the Baldock freeway eight miles from Wilsonville near Donald road and crashed.

Listed in critical condition at Portland Sanitarium today was Mrs. Lesta May Follett. Her passenger, Pauline Nash, 20, was listed in good condition.

State police said the car went on a shoulder and traveled for 400 feet, flipping over. The auto was northbound.

## Ceramic Pressed Into Any Shape

Schenectady, N. Y.–(Science Service)–A new ceramic has been developed that transmits light, is strong, can be pressed into any shape during manufacture, resists heat and is easy to make.

Dr. Guy Suits, vice president of General Electric company here, described the new ceramic as "history making" in its combination of properties.

A first cousin of sapphire and ruby gem stones, the ceramic is made from powdered aluminum oxide. Its polycrystalline form enables it to withstand high heat without deforming. In this respect Lucalox, as it is called, is expected to extend the range of instruments now limited by heat-resistance of missile nose cones.

## Murder Suspected In Death of Girl

New York – (UPI) – A St. Louis professor said today his assistant, whose nude body was found in Boston Harbor, was murdered.

"I saw the body. It was not suicide," Dr. Stanley Spector, professor of Oriental studies at Washington University, said.

Police and federal agents have questioned Mrs. Juanita Spector, who made the trip from the Far East aboard the Dutch ship Utrecht with Mrs. Lynn Kauffman, 23, whose body was found on Spectacle Island in Boston Harbor early Saturday.

Spector said Mrs. Kauffman, his research assistant in the Orient for the past two years, had been happy and eager to return home. He said there was no doubt in his mind she was murdered.

**EX-SURGICAL CHIEF DIES**

Bridgeport, Conn. –(UPI)– Dr. Andrew M. McQueeney, 77, former chief of the surgical staff of St. Vincent's hospital in New York, died Monday.

The only diamonds mined in the United States are found at Magnet Cove, Ark.

**ARSONISTS BURN FARMS**

Frankfurt, Germany –(UPI)– Police were hunting today for a band of arsonists who have caused more than $500,000 damage to farm property in Schleswig-Holstein in the past 10 days. Police said 17 farm houses, six village dwellings and tons of hay have been destroyed by fires set by the band.

Rome –(UPI)– Foreign Minister Giuseppe Pella left Monday by plane for the United Nations General Assembly in New York.
