Steel Shortages Force Layoffs in Auto Production

Detroit—(UPI)—Steel shortages in the auto industry have boosted the number of laid off workers to 17,400 today and threatened to idle another 4,100 Wednesday. The most recent layoffs came as the Chevrolet manufacturing plant in Flint where General Motors sent home 2,400 hourly-rated employees because of material shortages caused by the nation-wide steel strike. Another 4,100 workers will be laid off Wednesday at the plant.

Production Slowed
To date the layoffs have been confined to General Motors' supplier plants. None of the assembly lines turning out 1960 models has been halted although the production pace has been slowed to conserve steel supplies in some cases. GM's parts plants were the first to be hit by the shortages because it laid in a smaller supply of steel in anticipation of the walkout and because its parts plants were operating six weeks ahead of the final assembly lines. Chrysler and Ford were operating their parts plants only about two weeks ahead of final assembly and American Motors and Studebaker-Packard were operating even closer to the belt.

Supplies Dwindling
Chrysler said it could continue production with current supplies "into November." Ford said its supplies would last at least until Nov. 15. American Motors and Studebaker-Packard said they had enough steel to continue until November. GM earlier estimated that parts shortages caused by the steel strike would hit its final assembly lines about Oct. 20.

Prineville Doctor Target in \$200,000 Suit for Malpractice

Prineville—(UPI)—Witnesses were to take the stand today in a \$200,000 malpractice suit filed against a Prineville doctor by Mrs. Clara Mitchell. The defendant, Dr. Norman Coleman, Monday heard himself accused of negligence, carelessness and lewd conduct which allegedly caused severe and permanent damage to Mrs. Mitchell. Dr. Coleman treated the woman for a mental disorder beginning in March of 1957. Mrs. Mitchell listed two causes of action in the suit. She asked \$75,000 general damages and \$3,814 special damages in the first cause of action and \$75,000 general damages and \$50,000 punitive damages in the second cause of action.

High Court Hears Of Three-League Gulf Coast Boundary

Washington—(UPI)—Texas Attorney General Will Wilson told the Supreme Court today that the United States recognized a three-league (10 1/2 mile) seaward boundary for its state when it entered the union. The Texan headed a list of officials from five Gulf States appearing in a second phase of arguments on the multi-million dollar tidelands oil dispute. The general framework of the case was outlined Monday to the court by U. S. Solicitor General J. Lee Rankin and attorneys for both Texas and Louisiana. The issue is whether the states or the federal government will receive huge sums from oil companies which drill in the offshore area. The court took up the tidelands oil issue after acting on a big batch of cases in its first business session of the term. The justices agreed to rule later on whether it is fair to a union member if his dues under a union shop contract are used for political activities he doesn't approve.

Appeals Turned Down
The court turned down four school segregation appeals, two from North Carolina and two from Virginia. Thus, it adhered to the "hands off" formula that has been followed since its historic school decisions in 1954 and 1955. In the field of subversion, the tribunal agreed to hear a second case challenging the constitutionality of the "membership clause" in the Smith Anti-Communist Act. The law makes it a crime to be a member of any organization dedicated to the violent overthrow of the government if the member is aware of this aim.

Britain Orders Probe in Crash Of Secret Plane
London—(UPI)—The government ordered a thorough investigation today of a crash which wrecked the second secret British jet fighter which has come to grief in two weeks. An American was killed in the latest crash. A supersonic NA39 navy twin-jet fighter-bomber, designed to "smuggle" atomic bombs into enemy territory at levels too low for efficient detection by radar, crashed and exploded during a test flight Monday. Pilot, Mate Killed. The two men aboard, American pilot William A. Ford, Hampton, Va., of the U. S. Office of Naval Research's London branch, and a British crewmate were killed in the crash. Less than two weeks ago, a radar-equipped P1 fighter was wrecked during a test flight. Its pilot bailed out at 40,000 feet and reached shore in the plane's rubber dinghy. Both planes were on the "secret" list.

Terror Bombings In Venezuela
Caracas, Venezuela—(UPI)—More than 3,000 troops and police patrolled the streets here early today, seeking to end a wave of terror bombing regarded as a possible prelude to revolution. More than 100 persons had been arrested in Caracas and Maracaibo, and an undetermined number of others were reported in jail elsewhere in the country. The government blamed the disorders on supporters of ousted ex-President Marcos Perez Jimenez. Responsible sources said most of the prisoners were former agents of Perez' now-dissolved secret police. No large-scale disorders have been reported, but the city has been rocked by repeated bombings over the Columbus Day week end. At least three bombs were set off Monday, causing some damage but no reported casualties.

Typhoon Charlotte Close To Philippines
Manila—(UPI)—Typhoon Charlotte with winds of 150 miles per hour roared close to the Philippines today, threatening northern-most Luzon and the Batanes islands with heavy rains and strong winds. The Manila Weather Bureau located Charlotte 200 miles east of northern Luzon early today. The typhoon had increased in strength from 130 to 150 miles per hour as it swept along.
