### Wall Street Chatter

New York—In the end, the most important effect of the steel strike will be to prolong the buoyancy of the economy, says Standard & Poor's Outlook.

"It is inconceivable that definitive government action to achieve a settlement will be withheld if the injunction period passes without result," says Outlook.

It points out that this would usher in an extended process of rebuilding inventories, and would help the current uptrend in capital expenditures to pick up momentum thereafter.

Good earnings, both in the third and fourth quarters, plus year-end stock splits and extras, will supply the fuel for a rising market trend from current levels, says Stock Trend Service.

Moody's recommends switching Kaiser Aluminum to Bethlehem Steel for intermediate appreciation possibilities. It says big business and office equipment stocks—Addressograph, IBM and National Cash Register—hold good growth promise.

E. F. Hutton observes that the overwhelming demand for the government's new 5 percent notes—oversubscribed 5 1/2 times—underscores the fact that investors are becoming more sensitive to yield than to growth.

### Rossellini Files Annulment Appeal

Rome—Roberto Rossellini has filed a new appeal to have his marriage to Swedish actress Ingrid Bergman annulled, it was revealed today.

The move came in the face of a court ruling here ordering the Italian film director to return their three children to Miss Bergman.  
 The complicated legal situation between the famous pair involves a series of marriages, divorces, court rulings in different countries, and the three children.

Court sources said today that Rossellini's lawyers handed the Rome Court of Appeals Tuesday night a new request for an annulment of his marriage to Miss Bergman. The request was based on the ruling of a Swedish court in Stockholm that Miss Bergman's 1950 Mexican divorce from her first husband, Dr. Peter Lindstrom was not valid in Sweden.

## Khrushchev Return To Terrorist Rule Seen as Downfall

Washington—U.S. officials believe that any effort by Soviet Premier Nikita Khrushchev to bring back the late Josef Stalin's terrorist rule would mean the downfall of Khrushchev.

The keenest American observers of Soviet affairs believe the West is only beginning to see the consequences of Khrushchev's abolition of mass terror.

If Russia continues to become more normal internally, they feel, there is official hope that the West can eventually work out some of its problems with Soviet leaders.

More and more, they say, Khrushchev and Soviet leaders must answer to the will of the Soviet public. There will be no democracy in Russia, they believe, but each step of freedom necessarily leads to another.

These observers are convinced that Khrushchev cannot set back the clock to 1952 when Stalin held the Soviet Union in an iron grip. If he tries, they say, it will be the end of Khrushchev.

U. S. officials are looking to the future with some optimism because they believe the Soviet Union's internal changes mean that time is on the side of the West.
