Nation-Wide Search For Science Talent Made in Schools

Washington (Science Service) – The annual nation-wide search to find potential research scientists among the country's high school seniors is under way.

The Nineteenth Annual Science Talent Search is being launched with an invitation to seniors in 30,000 public, private and parochial schools throughout the United States to compete for a five-day visit to Washington and $34,250 in Westinghouse Science Scholarships and Awards. The results of the search will reveal the nation's leading scientists of the future among this year's seniors, and will stimulate other students to undertake scientific training.

The Science Talent Search is conducted by Science Service through its Science Clubs of America and supported by the Westinghouse Educational Foundation. Science Service is the press association specializing in science news that serves the Mail Tribune.)

More Vitally Important

Watson Davis, director of Science Service, in announcing this year's search, stated that "discovering, honoring and helping the nation's youngest creative research talent becomes more vitally important and rewarding each year. The world already is richly benefiting from the work of scientists whose education and careers were assured through recognition by the Science Talent Search during the earlier years of this unique program."

Principals and science teachers in secondary schools throughout the country now are receiving suggestions on "How You Can Search for Science Talent." This material will help them in recognizing science talented students and encouraging those boys and girls to enter the Nineteenth Annual Science Talent Search.

They will request, and after Nov. 15 receive, more than 30,000 sets of entry materials for their most promising seniors. Of these, it is estimated that 4,500 students will complete all entry requirements. About ten per cent will be named members of the Honors Group, from which 40 winners will be chosen to receive five-day, all-expense-paid trips to Washington, D.C., to attend the Annual Science Talent Institute.

The winners and other members of the Honors Group will be recommended to colleges, universities and technical schools of their own choice. As in the past, it is expected that all will receive offers of financial assistance for college education from other sources on the basis of this honor. Unlike many scholarship competitions, the Science Talent Search has no rule prohibiting those who receive its honors from accepting additional scholarships from colleges, universities or industry.

Georgia-Pacific Has Record Sales

Portland –(UPI)– Georgia-Pacific Corporation Thursday reported record nine-month period sales. At the same time the firm informed stockholders it has consolidated its $93 million cash purchase of the Booth-Kelly Lumber company at a net cost of about $40 million.

Control of Booth-Kelly was purchased in July and 100 per cent of its stock has since been acquired.

Georgia-Pacific's net profits after taxes for the nine-month period ended Sept. 30 were reported at $11,336,069. Net sales for the period were $140,491,848.

On a per-share basis, profits for the nine-month period after adjusting for the 25 per cent stock split last June were $2.15. This compared with $1.52 last year.

Southeast Oregon Disaster Region

Washington –(UPI)– President Eisenhower has certified drought-stricken sections of Oregon as major disaster areas and eligible for the Agriculture Department emergency feed grain subsidies.

Oregon Gov. Mark Hatfield asked the President on Aug. 13 to make the certification. The affected area is in southeast Oregon, including Harney and part of Malheur counties.

Tentative Pact In Shipyard Strike

San Francisco –(UPI)– Negotiators for management and three unions have reached tentative agreement for ending the final phase of the seven-week-old Pacific Coast shipyard strike.

The agreement paves the way for 15,000 workers to return to work Monday, pending ratification by the unions' membership.

Federal mediator V. Wayne Kenaston said voting on the proposed contract should be completed by Saturday. Details of the pact will be announced at that time, he said.

A tentative agreement was reached between management and the Metal Trades Council, which includes 10 international unions, a week ago.

Mystery Radio Signals Reported

Paris – (UPI) – A prominent French astronomer said Thursday observatories in Western Europe have been receiving mysterious radio signals for months from some unidentified source in outer space.

The astronomer, who asked that his name not be used, said several observatories have made extensive studies of the signals but have been unable so far to determine where they come from or what they mean. They appear to come a moving body in space.

The newspaper Paris-Jour speculated that the signals might come from a secretly launched Russian "skyhook" catellite – one which moves at the same angular speed as the earth, so that it appears to be fixed indefinitely above some point on the earth's surface.

The astronomer discounted this theory, however, saying that the signals indicate that the source is moving with respect to the earth.

Monthly Death Rate – At Peak in August

Salem – (UPI) – The highest monthly mileage death rate so far this year was reached during August when 8.9 persons lost their lives in each 100 million miles driven in Oregon.

The State Motor Vehicle Department said the August rate surpassed the previous high for the year recorded in May by more than two full points.

LAOS EX-VICEROY DIES

Vientiane–(UPI) – Prince Petsarath, 69, one time viceroy of Laos, died in Luang Prabang Province Wednesday of a cerebral hemmorrhage.
