FEWER HOBOES

Britt, Iowa (UPI) – Prosperity and government welfare programs are cutting into the ranks of the hoboes. This year only about 55 bona fide "professional tramps" swung off freight cars here for the 59th annual hobo convention. However, 20,000 other persons were on hand for the free stew.

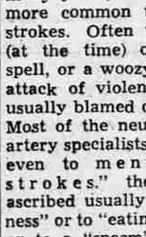
The Medical Roundup

by Walter Alvarez

Emeritus Consultant in Medicine, Mayo Clinic
Emeritus Professor of Medicine, Mayo Clinic

Cerebro-Vascular Accidents

People ask what is a cerebro-vascular accident. And the answer is that it means a stroke. In recent years, the experts on neurology and on artery diseases have been trying to get rid of the word "stroke." For some unknown reason, they hate and despite it and refuse to use it. One reason, perhaps, for this behavior is that we doctors, as we become very scientific, have a horror of using simple ordinary English words that our patients can understand! Also, many of us adore the long words; and, better yet, a chain of long words, like cerebro-vascular accident. Another objection to the word stroke is that still so many people and even educated people, think of God's having struck the man down, and this implies that God was very angry with him – because of some skulduggery of the man that his neighbors don't know about. Of course, this is utterly stupid – it is a relic of very ancient, even pre-Biblical ideas. A man has a big stroke usually because an ulcerated artery in his brain ruptured and the blood, coming out under pressure, destroyed some of the brain. The nature of the symptoms depends on the part of the brain thrown out of action. Other strokes are due to the plugging-up of an artery, in the brain or the neck, with a blod clot (thrombosis).



Dr. Alvarez

'Little Strokes' Common

The "little strokes," the results of which I have been studying and describing for many years, are many times more common than the big strokes. Often they produce (at the time) only a dizzy spell, or a woozy spell, or an attack of violent vomiting – usually blamed on some food. Most of the neurologists and artery specialists today refuse even to mention "little strokes." the spells are ascribed usually to "nervousness" or to "eating something" or to a "spasm" in a blood vessel. Most of them go unrecognized, while hundreds are supposed to be heart attacks. One can easily see that a little stroke was not a heart attack when, after it, the patient has no symptoms of heart trouble, but several symptoms of brain injury, such as great irritability and irascibility, loss of memory, and loss of ability to work.

I may be peculiar, but I usually prefer the old Anglo-Saxon word for a symptom. I know the long words, but I do not need to use them to make me feel like a very wise man. Often I am too conscious of the fact that when I say a woman has "hebephrenia transitoria hemicranica" I do not know a tiny bit more than if I had said, "she has the brief moody spells that come to many women with sick headaches."

Tend To Explode

I am a peaceful man, but every time I send a paper to be published in a medical journal, and some girl in the editorial office changes my "hiccup" into "singultus," my "vomiting" into "emesis;" my "urination" into "micturition;" and my "burp" into "eructation," I tend to explode in wrath, and to demand of the august editor that he leave an order to the effect that my English be left as it is. It may not be as good as the girl's, but I like it the way it is. It is 58 years since my first long essay was published in a newspaper and ever since then I have been trying hard to learn to write with clarity.

Court Records

CIRCUIT COURT

Emilie M. Ricks vs. Billy Max Ricks, divorce decree.

Shirley L. Townsend vs. Frank H. Townsend, divorce complaint.

Lucile Warner vs. Donald E. Warner, divorce complaint.
