

President Plans To Ask Increase In Space Outlays

Augusta, Ga. (UPI)—President Eisenhower told a news conference today that he plans to ask Congress for higher appropriations next year for the American space program.

The chief executive also said that if Maj. Gen. John B. Medaris, who has announced his retirement as head of the Army Ordnance Missile Command, has any complaints he would like to hear them personally.

The President touched on a broad range of space and missile topics today as reporters pined him with numerous questions stemming from his announcement Wednesday that the Army Ballistic Missile agency will be shifted to the civilian control of the national aeronautics and space agency "to strengthen the national space effort."

Mildly but still plainly, Eisenhower rejected the theory of Medaris as stated by a reporter, "that we are straddling the issue of competing with Russia in space."

The chief executive said he does not think the space program should be regarded purely as a competition with some other nation.

He had no apologies whatever for the military missile program and said the agency's switch ordered Wednesday merely represented the fact that the development of the "super-boosters" rockets for outer space should now be the sole concern of the civilian agency, with the Army continuing its own development of strictly ordnance missiles.

As for Medaris' use of the word "straddling," Eisenhower said with a trace of annoy-

ance that he does not know exactly what this meant, but he thinks Dr. T. Keith Glennan, administrator of the space agency, well defined the American program for major space exploration and that this was a "positive, progressive program."

On the question of money, he was asked flatly whether he planned to ask for an increase in space funds. He said definitely he would seek something more than Congress provided in the current fiscal year.

The president recalled that for fiscal 1960 he asked \$590 million. Congress cut this, he continued, by about 68 million, and then restored some of the cut.

Praises Rocket Experts

The President could offer no specific figures, but he said his request for fiscal 1961 definitely would be something more than the government got for the current year.

He paid particular tribute to what he called the brilliant scientific work of Werner von Braun and his team of rocket experts, saying they were now free to concentrate on the development of one powerful booster. Presumably this was a reference to the Saturn project.

In the meantime, he said the strictly military projects of the Army would remain under the Army ordnance research program which would proceed with all possible help from NASA.

Some scientists believe the dust layer on the moon is only inches deep. Others think it may go down as far as five miles.

OUTSIDER OFFICIAL—Russell Langelle, U.S. official ousted from Russia by the Soviet government, carried his daughter Mary, 2, onto United States soil Wednesday. Langelle, 37, denied the Red charge that he had used his job as security officer at the U.S. Embassy in Moscow as a front for espionage activities. (UPI Telephoto)

Quick Congressional Approval Hoped for Space Effort Shift

Washington (UPI)—Administration sources said today they hoped Congress would give quick approval to President Eisenhower's latest reshuffling designed to speed the nation's space effort.

The administration wants to avoid a long drawn-out congressional inquiry into the transfer of the famed Werner von Braun rocket team from the Army to the civilian space agency when the Senate and House reconvene in January.

But initial reaction from congressional military experts indicated the lawmakers want to take a careful look at the shift. The reorganization would become effective 60 days after Congress was officially notified of the plans

unless rejected by the Senate or House.

Call For Studies

Chairman Chet Holifield (D-Calif.) ordered the staff of his House Military Operations sub-committee to make a thorough study of the shift. Sen. Stuart Symington (D-Mo.) called on Chairman Lyndon B. Johnson (D-Tex.) of the Senate Space committee and Chairman Richard B. Russell (D-Ga.) of the Senate Armed Services committee to undertake separate investigations.

Von Braun said he looked forward to working with the civilian agency. He said the "major concern" of his team was to continue to take part in the U.S. space program.

One of the chief advantages of the shift, administration sources said, could be a speed-up in development of the Saturn rocket booster which will have 1,500,000 pounds of thrust—more than twice the power of the rockets Russia is believed using in its Lunik programs.

Major Army Project

The Saturn is the major project at the Army Ballistic Missile agency in Huntsville, Ala., where the team of scientists and technicians headed by Von Braun is based.

Eisenhower announced at his vacation headquarters in Augusta, Ga., late Wednesday his decision to reverse a 1958 ruling and transfer the main part of the Army Ballistic Missile agency to the National Aeronautics and Space Administration (NASA).

Electronics Stocks Skyrocket in Market

New York (UPI)—Electronics stocks soared on the stock market today after President Eisenhower told his news conference he would seek additional space funds when Congress reconvenes.

Net gains in the electronics issues at the highs ranged to 10 points in Texas Instruments. Ampex at its best was up 3 1/2; Beckman, 2 3/4; Litton, 5 3/4; Motorola, 5; Raytheon, 2 3/4; Varian, 3 3/4; and Packard-Bell, 4 1/2.

Elsewhere the net changes held to small amounts for the most part with the leading issues lower on average except in the utility group. Steels registered losses ranging to nearly 2 points. Chemicals were highly irregular. In the motors, Chrysler, Ford and General Motors eased. Studebaker-Packard issues made small gains and American Motors ruled firm.

Mack trucks, which declared a 5 per cent stock dividend, ran up more than 3 points. General Outdoor Advertising ran up more than 3 on a 100 per cent stock dividend and a higher cash payment. Cessna fell off despite a stock split.

DOW-JONES AVERAGES

New York (UPI)—Dow-Jones final stock averages: 30 industrials 625.59, off 7.10; 20 railroads 154.92, off 2.26; 15 utilities 87.45, off 0.26 and 55 stocks 208.75, off 2.19. Sales today were about 3,060,000 shares com-

pared with 2,730,000 shares Wednesday.

Dedication of Bells Set at Homecoming

Corvallis — Dedication of new campus Carillon Bells will highlight the annual Oregon State college Homecoming program Oct. 31.

The \$19,000 set of bells, purchased with alumni and student contributions, will provide music between classes and during the noon hour, will sound the start and end of classes, and will be played for special campus events.

Alumni and parents coming to the campus are also invited to attend some of the 200 Saturday morning classes, which are being used on an increased scale at OSC to assure maximum use of classrooms.

Other traditional events will include the football game, this year with Washington State university; campus tours and open house in the various living groups; reunion meetings for the classes of 1939, 1945, 1949, and 1954; house sign competition; and a student talent show.

Glass Cut Fatal To Portland Boy

Portland (UPI)—A four-year-old boy died Wednesday after he shoved his arm through the glass of the back door of his home.

The victim, Russell Mullan, died two hours after the accident. Police said the tot suffered a four-inch-deep cut in his armpit from the jagged glass.

Officers said young Mullan was bleeding badly when police arrived. A compress was applied on the wound, which was too far up to permit use of a tourniquet.

OFFERS CONDOLENCES

Washington (UPI)—Soviet Ambassador Mikhail Menshikov as expressed his condolences on the death of Gen. George C. Marshall. Menshikov spent 10 minutes Wednesday with Under-secretary of State Robert Murphy.

The Boy Scout movement in Canada numbered more than 250,000 in 1958, compared with 110,000 in 1949.
