

A story on the removal of snags from around Fish Lake appears on page 14 of today's Mail Tribune.

To report improper or non-delivery of the Mail Tribune in Medford phone SP 2-6141, in Ashland MU 2-1021, Yreka VT 2-4077, and in Grants Pass GR 6-6173 before 6:45 p.m. daily and 12:30 p.m. Sunday.

Truman Calls For Resumption Of Bomb Tests

By HARRY S. TRUMAN North American Newspaper Alliance, Inc. I do not think it makes any sense to continue our self-imposed ban on all nuclear tests, and we ought to lift it immediately.

Kennedy Flails Administration On Housing Need

Coquille - (UPI) - Sen. John F. Kennedy (D-Mass.) Friday night accused the Republican administration of failing to provide for the need of the essential housing industries in United States.

"There are 17 million American homes today which are sub-standard," he continued. "Hundreds of thousands of families are looking for new places to live."

Kennedy also accused the administration with "neglecting" the Urban Renewal program. He said Congress must move ahead on making more rental housing for elderly people available.

Kennedy said 200,000 new housing units would produce more than a half million jobs and markets for 2 1/2 billion feet of lumber and 400,000 tons of steel.

Pendleton, Ore. - (UPI) - Sen. John F. Kennedy (D-Mass.) urged new starts in federal hydroelectric projects in the Pacific Northwest at a press conference here Saturday.

The Massachusetts senator said the Northwest cannot stand much more of the "seven years status quo" of no new federal power projects.

The timber committee of the Southern Oregon Conservation Tree Farm association will discuss Christmas tree trespass problems at a 7 a.m. breakfast meeting at the Jackson hotel Monday.

The main discussion topic will be plans on how the association can effectively prevent trespassing on its members' land. Dick Swan of Ross Lumber company is chairman of the committee.

our security and possibly jeopardize the peace. Prefers Peaceful Use I do not like to think of nuclear testing in terms of military application only and, of course, I would prefer that we concentrate all our efforts on the peaceful development of the greatest potential source of energy so far discovered by man.

Scientists have found that important nuclear tests can now be staged and controlled underground with all the fallout sealed in. Whatever risks of further contamination of the atmosphere from fallout there may be from tests in the open, there seems to be no longer any valid reasons for stopping experiments underground.

Not Always Detectable I am informed by scientists that underground nuclear explosions are not always detectable and may be mistaken for earthquakes. That is all the more reason why we should not handicap ourselves unilaterally at this time.

I regard as a constructive approach to international cooperation the recent suggestion of British Foreign Secretary Selwyn Lloyd that the United States, Britain and the Soviet Union hold a joint series of underground nuclear tests.

I do not see why France ought not be invited to take part in such joint ventures. From all indications, France is about to take her place as a nuclear power and I think that this is all to the good. I, for one, am glad to see that a nation that has been for so long so valiant a champion of freedom can become a stronger ally for peace.

France is reaping the fruits of the invaluable contributions her scientists have made to nuclear research. (Continued on Page 6)

Trespass Problem Due for Discussion

The timber committee of the Southern Oregon Conservation Tree Farm association will discuss Christmas tree trespass problems at a 7 a.m. breakfast meeting at the Jackson hotel Monday.

The main discussion topic will be plans on how the association can effectively prevent trespassing on its members' land. Dick Swan of Ross Lumber company is chairman of the committee.

Timber owners from southern Oregon have been invited to attend the meeting, SOCTFA officials announced.

New Delhi (UPI) - Communist Chinese troops are preparing winter quarters eight miles from the Indian-held village of Chushul in the Ladakh sector of Kashmir, official sources here reported.

missiles or tanks shown. The only new weapon paraded was a four-wheeled army rocket launcher. It was a far cry from the massive military muscle-flexing of past anniversaries.

A Thick, Poisonous Blanket Of Oxygen And Strontium 90 Utterly Precludes The Possibility Of Life On This Particular Planet

Engineer Sees No Reason for Agate Dam Interference

Col. W. L. Winegar, Portland, district engineer of the U. S. Army corps of engineers, has reported that he sees no reason, from an engineering standpoint, why authorization and construction of Agate dam and reservoir would have any effect on progress of other water projects in this area.

He also revealed that Agate has been excluded from the corps' studies of potential basin water development. Colonel Winegar, who has been in charge of the corps' studies of proposed development of the Rogue River basin, gave this view in a letter to Don Lane, secretary of the state water resources board.

He entertains a similar belief about the proposed Merlin and Sucker creek projects, all of them proposed or under study by the bureau of reclamation, he told Lane.

Some proponents of over-all basin development have declared that such action might imperil broad development of the basin's water resources, from either an engineering or political standpoint.

Colonel Winegar's letter said: "Based on data furnished by the (reclamation) bureau, the relatively limited acreage of lands under the Agate project could have been irrigated by the use of stored water from the potential Lost Creek and Elk Creek reservoirs

Sports Bulletin

Ashland - Southern Oregon College Red Raiders came to life in the fourth quarter with four touchdowns to score a 34 to 6 victory over Eastern Washington College of Education in a football game here Saturday night. Score at the end of the third quarter favored SOC 7-0.

Mayfield Returns From European Trip Dr. Leonard B. Mayfield, superintendent of Medford schools, arrived in Medford Saturday afternoon after a month-long trip which took him to several European and Russian cities.

He participated in an education tour of Europe and Russia where he visited school officials and points of interest. Dr. Mayfield also attended a national meeting of school administrators in Chicago after his return from Europe.

Washington - (UPI) - President Eisenhower has formally announced the appointment of veteran diplomat Walter O. Dowling as new U.S. ambassador to West Germany.

Hustler Jet Bomber Explodes Over Oklahoma

Two Crewmen Die In Test Flight

Lawton, Okla. - (UPI) - A \$10 million supersonic Convair B-58 Hustler jet bomber cracked the sound barrier and exploded "like a skyrocket" over Lawton Saturday killing two crewmen making a test flight.

One of the bodies was found 14 miles west of Duncan, Okla., about 26 miles southeast of Lawton. An unopened parachute was found nearby. The second body was found in a 25-foot piece of fuselage that missed a farm house southeast of Lawton by only 200 yards.

Testing New System The two civilian employees were testing a "new type system" aboard the bomber. Convair declined to go into details.

The bodies were identified as Donald Arthur Siedhof, 25, Fort Worth, a test flight engineer, and Raymond Fitzgerald, 35, Sweetwater, Tex., chief pilot for Convair.

A Convair official said the company had a tele-metering device aboard the plane and was in constant contact to it from the ground up until the instant of the explosion.

The official said the company would try to determine the cause of the blast through the data collected by the device.

Showered Wide Area Eye witnesses said the plane had exploded with such force it showered a wide area with minute particles of debris.

The largest piece found measured approximately one foot by three feet. Investigators at the scene said wreckage would probably be found scattered over a 20 to 25 mile area.

Convair estimated the plane exploded at 45,000 feet or even higher. Two men said they saw the plane trailing fire just before the blast. Several persons said it had just cracked the sound barrier.

Convair officials said the Hustler does not carry nuclear bombs.

Ashland Girl Said Recovering

Portland - Seven-year-old Renelle Thompson of Ashland, who underwent major heart surgery at the University of Oregon medical school hospital Thursday, was reported "responding normally" Saturday.

The daughter of Mr. and Mrs. Ronald Thompson, she underwent open-heart surgery to close an aperture the size of a half dollar, believed to be the largest such gap closed during an operation at the medical school hospital.

It took a surgical team about four hours to perform the operation. The heart was stopped about 15 minutes, with a mechanical heart pumping blood through her body.

Although the operation was considered a success, the girl was on the critical list for 72 hours, which is normal after major surgery of that kind. The ventricular septal defect, a common condition in a congenital disease, does not permit the blood to absorb oxygen properly, a doctor said, and could be fatal if not corrected.

Oregon Schools Study Scheduled

Portland - (UPI) - The Legislative Interim Committee on Education, backed with an additional \$25,000 from the State Board of Education, has indicated it will study not only a solution to the state's school finance problems but also the quality of public schools in Oregon.

The committee will tackle curriculum, teacher utilization, personnel practices, and the quality of education itself.

A group of about 35 persons appeared to protest the 1957 state school reorganization law. Most members were from the David Douglas district east of here, recently consolidated, and others came from Salem and Silverton.

SEEK BODIES - Rescue teams Friday in the east end of Montreal, Canada. Three searched for bodies of workmen killed when men were killed, one was missing and 20 an almost completed factory roof collapsed were reported injured. (UPI Telephoto)

Ashland Boys Sentenced for Theater Damage

Ashland - Three Ashland boys, two 15 and one 16 years old, spent most of the week end in the Ashland city jail for damage done to the Oregon Shakespearean Theater Halloween night, city police reported.

The three youths were to be paroled to the custody of their parents today for the remainder of a 15-day sentence they received in municipal court Friday.

The three did approximately \$120 damage to the new theater building, it was reported. The trio jumped the wall into the theater grounds and armed with pressurized cans of blue enamel paint sprayed the outside of the first floor of the theater and the dance platform which covers the control booth. They also sprayed the lights and back of the theater with the paint and broke some of the lights along the path to the theater.

When the paint cans were empty, the containers were reported dropped down the air vent on the roof of the public rest rooms.

Fathers of the three boys worked at the theater Saturday removing the enamel paint from the buildings, it was reported. They also repainted needed areas, it was stated.

Home Crusade Session Monday

The Home Crusade division of the United Medford Crusade will hold its kick-off and training session at 10 a.m. Monday, Nov. 9, in the Red Cross building, 60 Hawthorne ave.

Home soliciting will start Tuesday, and is expected to be completed Wednesday.

Richard H. Travis, who led last year's UMC campaign, will conduct the training session. Delbert T. Landing, this year's UMC general campaign chairman, also is expected to attend.

Home Crusade captains appointed for area sections this year include Mrs. Art Coulter, Mrs. Alvin Edwards, Mrs. Warren Holbrook, Mrs. George Joyce, Mrs. William Myers, Mrs. John Price, Mrs. John Lusk, Mrs. Russell Brown, Mrs. Parker Woods, Mrs. Oscar Halboth, Mrs. Emil Mohr, Mrs. Thomas McFadden, Mrs. John Collins, Mrs. H. L. Root, Mrs. Ernest Conrad, Mrs. Raymond Reter, Mrs. R. J. Wolfe, Mrs. H. W. Morrow, Mrs. Reynold L. Hanson, Mrs. Charles E. Jones, Mrs. Martin Gates, Mrs. Fred Sears, Mrs. Robert Chris, Mrs. Calvin L. Smith, Mrs. Ward Lampkin, Mrs. Ray Garnier and Mrs. Walter Olson.

Discoverer VII Goes Into Orbit; Capsule Recovery Planned

Vandenberg Air Force Base, Calif. (UPI) - The "weatherproof" Discoverer VII satellite, carefully groomed for a significant U. S. scientific breakthrough, roared into orbit Saturday.

The goal of the shot is to recover a 310-pound capsule from the 19-foot long satellite, after the satellite has made 17 passes over the earth's poles.

The recovery attempt, a 700-to-1 shot at best, will be made this afternoon by planes and ships in a massive "ballpark" in the Pacific ocean, southwest of Hawaii.

The near-fantastic capture attempt will be made 27 hours from the time of launch, according to calculations. Unlike previous satellites in the program, the Discoverer VII has been weatherproofed with special equipment, including heaters, insulation and absorbent paint. This was done to keep dry mercury batteries warm. The batteries, which should cause the parachute to pop open at 40,000 feet, apparently did not operate in two previous Discoverer shots because it was too cold.

The Air Force announced that orbit had been achieved three hours after the Thor-booster Discoverer VII arched into the sky at 12:28 p.m. (PST).

The recovery attempt was paramount in U. S. preparations for the shot, although the fact the satellite entered orbit is in itself regarded as a particular success.

It would be the first recovery of a man-made object from orbit - "the most significant achievement to date in space," Air Force officers said.

Young Republicans To Meet on Monday

The November meeting of Jackson County Young Republicans will be held at 8 p.m. Monday, Nov. 9, at the Joseph Walsh home, 3247 Bursell rd., Central Point. All club members are requested to participate in the club's "pyramid" membership drive by bringing prospective members to the meeting.

Spokane Woman Brutally Beaten

Spokane, Wash. - (UPI) - A 28-year-old housewife was brutally beaten in an apartment here Saturday.

Mrs. Gloria Brie, still unconscious 12 hours after the vicious attack, was found by her husband who had left their apartment shortly after 4 a.m. and returned with a hunting companion half an hour later, police said. Police indicated they had no leads in the attack, which one physician termed "the most brutal I have ever encountered."

London - (UPI) - Western diplomats Saturday pinpointed the month of May as the likeliest time for an East-West summit conference.

Steel Union President Orders Workers to Return

Court Ruling Brings Compliance Pittsburgh - (UPI) - United Steelworkers President David J. McDonald ordered his men back to work Saturday and America's major steel plants prepared to resume production halted by the longest steel strike in history.

U. S. Steel Corp., the world's largest producer, said it would be "several days" before all employees could be called back. The company asked its workers to remain home until they are contacted individually.

Comply with Ruling Miles apart at the contract table, union and management moved quickly to comply with a U. S. Supreme Court ruling upholding a Taft-Hartley, back-to-work injunction.

Two hours after the court announced its decision, McDonald ordered the 500,000 striking steel workers to "resume work forthwith." R. Conrad Cooper, management's chief negotiator, said the companies would "move immediately to reopen the plants."

Picket lines across the nation, up since July 15, began to disband. Jones & Laughlin Steel Corp. immediately started recalling maintenance and supervisory personnel.

U. S. Steel Corp., Bethlehem Steel, Republic Steel and others alerted maintenance men to stand by for an early recall to work. Unionists Opposed USW members here in the nation's steel capital generally were opposed to the Supreme Court decision.

"The government can force me back to the mills, but no one—not even President Eisenhower or the courts—can make me say that I'm happy about it," said John Ikat, a U. S. Steel employee.

Another U. S. Steel employee, Ed Pavlan, said the injunction was "just a shrewd move to try to break the union."

The 80-day cooling off period will not be a quick cure for shortages and layoffs. During the early days of the strike, McDonald said his men would walk out again at the end of the injunction period if a settlement is not reached.

Industry experts predicted that at least 40 days will have passed under the cooling off period before full production can be attained.

Peak Searched for Japanese Climbers

Katmandu, Nepal - (UPI) - A Nepalese search plane with a cabinet minister aboard, circled the rugged Himalayan peak of Gauri Shanker Saturday but failed to find any trace of 32 members of a Japanese expedition missing in a bid to scale the 23,440-foot mountain.

The Nepalese government also ordered ground rescue parties to the peak, which touches on Red China, to search for the climbers who were feared to have been buried by an avalanche or swept away by high winds.

The first search plane, a C-47, flew at 19,000 feet and within three-quarters of a mile of the mountain, officials said.

It made six trips around the peak near the area where the expedition was to have set up a camp.

Half-Million Russians March in Red Square in Observance of Revolution

Moscow - (UPI) - A half-million Russians, mostly civilians, marched in Red square on the 42nd anniversary of the Bolshevik revolution Saturday in a parade stressing peace and prosperity. The military portion of the parade was the smallest in the history of the celebration.

No Planes or Missiles White doves, symbols of peace, flew over the vast square where Premier Nikita S. Khrushchev and other Soviet leaders watched the 3 1/4-hour ceremony. The military display took only 26 minutes and there were no planes,

missiles or tanks shown. The only new weapon paraded was a four-wheeled army rocket launcher. It was a far cry from the massive military muscle-flexing of past anniversaries.

Later, Khrushchev gave a reception in the grand palace of the Kremlin attended by Soviet and foreign dignitaries. To Fulfill Duty The speaker of the day, Defense Minister Marshall Rodion Malinovsky, omitted the usual statement that the Red army was prepared to crush aggressors. He said only that the armed forces were ready

to fulfill their duty, if necessary.

In his 15-minute address Malinovsky said the armed forces had to be prepared for "the reliable protection" of the country as long as foreign (American) bases ring Russia.

Past Events Stressed In the framework of the current "Spirit of Camp David" resulting from Khrushchev's visit to the United States, Malinovsky also stressed "the most important events of the recent past" including Soviet space rockets and the launching of the atomic-powered ice-breaker Lenin.
