

Color Delineators To Be Used on Freeways in State

Salem—Color coded delineators are being used to guide traffic on Oregon Interstate highways, according to W. C. Williams, state highway engineer.

The delineators are white reflectors mounted on white posts at 200-foot intervals along the right hand edge of through roadways, and yellow reflectors on yellow colored posts along acceleration and deceleration lanes at interchanges.

Easily visible by day, the same delineators are equipped with three inch prismatic reflectors which, under normal weather and atmospheric conditions, can be seen for a distance of 1,000 feet at night when they are illuminated by the upper beam of standard automobile headlights.

On deceleration and acceleration lanes and the ramps of interchanges the delineators are spaced at 100-foot intervals. The state highway department paints the posts a bright yellow for daylight recognition, and equips each post with a pair of yellow reflectors for recognition at night.

The change from single white to double yellow reflectors make it clear to the motorist that he is approaching a point of exit from the freeway, Williams said. He added that triple amber reflectors are used to mark the end of acceleration lanes when entering the freeway. These are placed so the viewer has adequate time to adjust to the flow of main highway traffic.

The design of the delineators was developed by the American Association of State Highway Officials and the U.S. bureau of public roads.

Salem—(UPI)—Public Utility Commissioner Jonel C. Hill has approved the name change of Consolidated Freight Lines to Consolidated Freightways Corporation of Delaware.

Dress and Tunic

by Marianne Martin

Successful Results of New Drug Are Reviewed

Successful results in clinical trials of a new drug for lowering high blood pressure have been reported by the Veterans administration.

Doctors administering the drug, guanethidine, to patients at two VA hospitals said it had a potent effect in reducing high blood pressure, similar to the effects of ganglion-blocking drugs now in use against the disease, but did not produce the undesirable reactions that these drugs do.

Dr. Edward D. Freis of the Washington, D.C., VA hospital and his co-researcher, Dr. Edward D. Frohlich of Georgetown university school of medicine, said 15 patients of the Washington VA hospital received a daily dose of guanethidine by mouth for periods varying from four to nine weeks.

Dr. David W. Richardson and Dr. Eugene M. Wyso of the Richmond, Va., VA hospital said 25 patients with high blood pressure there received the drug daily by mouth, in pill form, over a period of 4 1/2 months.

Dr. Freis and Dr. Frohlich noted some undesirable effects of guanethidine, including diarrhea. However, no case was considered serious and the diarrhea was readily controlled by medication.

The Richmond VA hospital team said the only possible harmful effects of guanethidine were those that could be expected from lowering the blood pressure—chiefly dizziness while the patient is standing.

Suitable For Patients
Dr. Freis and Dr. Frohlich said their findings suggest guanethidine probably is suitable for patients with severe and resistant high blood pressure.

Checks Give Clue To Death of Man

Gooding, Idaho—(UPI)—Ten travelers checks worth \$200 Saturday provided the first new clue in the baffling case of a slain Portland, Ore., man whose body was found near here Aug. 24.

Gooding county sheriff's officers said the FBI had informed them the checks were cashed in the Los Angeles area four days after Dr. John Hunt, 37, was found dead. The FBI is checking for latent fingerprints in Washington, D.C. and the results should be known soon. Authorities fear however, too many persons handled the checks in the time before they were found.

URGES WORLD JUDICIARY
Wilmington, Del.—(UPI)—President Charles S. Rhyne of the American Bar Association says world peace can only be achieved if law replaces brute force as a means of settling international disputes. In a speech prepared to the Delaware Bar Association, Rhyne urged all attorneys to work toward achievement of a workable world judiciary.

sure which does not respond satisfactorily to use of another drug, chlorothiazide, or to chlorothiazide in combination with small doses of two other drugs, hydralazine and reserpine.

Dr. Freis and Dr. Frohlich reported their findings in the August, 1959, issue of The Medical Annals of the District of Columbia. Their study is supported in part by a grant from the United States public health service.

A report of the effectiveness of guanethidine in lowering blood pressure was published in the July, 1959, issue of The Virginia Medical Monthly, and additional information on the effects of the drug on the rate of blood flow through the heart and kidneys was presented by Dr. Richardson before the American Heart association.

OVER THE TOP — Domiciliary members participated this year in the United Medford Crusade and helped to send the fund collected at the Camp White VA station over the top. Mike Tanzel, section one, handled the campaign among the domiciliary members. Here he is shown with Jack Riley, home member, (left) at the dining hall entrance making the collections on "pay day." Mark Bogart, of the dental service, chairman, and Byron Puhler, of supply, cochairman, made their final report to Manager H. C. Herzog last week. (George Green Photo)

Plywood Prices Take \$4 Decline

Portland—(UPI)—Plywood prices experienced a \$4 drop Friday to reach the \$64 level for the second time since World War II.

Some industry sources were predicting mill closures because of the price tumble.

The previous post-war low for quarter-inch A-D index grade sanded plywood was reached in February and April of 1958 when the price fell to \$64.

Major producers attributed the falling prices to a slow demand for plywood coupled with a record high production. Industry spokesmen said the \$64 level would result in most plants selling plywood at below-cost levels.

NUTS CAUSE SURGERY

Memphis, Tenn.—(UPI)—Doctors have operated on 21-month-old Brian Lee Knippe to remove part of his right lung where particles of peanuts, which he had eaten, were lodged. The child was reported in satisfactory condition following surgery.

WOOD PADDLE

London—(UPI)—Mrs. Jean Wood, 27, won a divorce on grounds her husband's treatment of her constituted a "gross indignity." What Wood did was to take Mrs. Wood over his knee and spank her.

Among United States' commercial fish catches in 1958 shrimp was the most valuable, 212 million pounds worth \$74,500,000.
