## Use of Downtown Park, Shop Lots Said Increasing

The use of Medford's Park and Shop lots continues to increase, according to Don McNeil, manager of the Jackson County Chamber of Commerce.

As of Nov. 1, Park and Shop lots in the downtown area accounted for more than 12,500 hours of shopper parking, which was paid for through validation of participating merchants.

McNeil said this represents double the parking volume which was recorded during the previous month and a half since the plan was put into operation. About Sept. 1, validated shoppers use of the lots accounted for slightly more than 6,000 shopping hours, McNeil said.

The chamber manager noted that all the lots originally proposed are now in operation. The original plan called for four lots: the lot at Valley Fuel, the Alabam lot at Front and Main sts., the Robinson lot off Front st., and the Risse Richfield lot at Ninth st. and Central ave.

**Newer Lots**  
A new lot behind the Craterian theater opened a few days after the plan was started Aug. 17, the Yellow Cab lot at Fifth st. and Central was opened in September, and the largest of the lots was opened in October. The largest lot extends a full block behind Burelson's from South Bartlett st. to South Riverside ave.

Members of the board of control have made available 25,000 Park and Shop folders for distribution. The folders include a map of the lot locations, explains the plan and lists about 70 business participants.

McNeil said immediate plans call for time studies to determine periods during the day when numerous Park and Shop parking spaces are available. Providing this information to shoppers will serve as a guide toward greater shopping convenience and permit greater use of facilities.

## Academy Awards Sponsor Assured

Hollywood—UPI—The Motion Picture Association of America will sponsor next year's Academy Awards show which again will be carried nationally on television and radio.

The association—in backing the "Oscar" program for the third straight year—said it expected next year's show on April 4 to reach a record number of viewers and listeners.

The group estimated that last year's program reached a world-wide audience of 250 million persons by radio and television.

## Mexican Students Protest Bus Fare

Guadalajara, Mexico—UPI—Troops fired on high school students protesting a five-centavo (about 1 cent) increase in bus fares, wounding 12 of the demonstrators, three of them seriously.

The soldiers opened fire to prevent the students from seizing urban buses. Bands roaming through the city during the day had seized about 70 buses which they held in the stadium near the Technological Institute.

**RESCUERS TOO LATE**—An oxygen mask is held over the face of John Macko, 38, as rescuers seek to free him from a cave-in at the bottom of a deep ditch at Columbia Heights, Minn. Macko, a sewer and water department employee, was buried over an hour in the deep dirt. He never regained consciousness and was dead on arrival at the hospital. A fellow worker was injured in the cave-in. (UPI Telephoto)

## Construction of New Coop Branch Building Planned

Ashland—Construction of a new Ashland retail outlet by the Grange Cooperative Supply association was announced last week by co-op officers, who spoke before the Ashland Chamber of Commerce.

The cooperative was established in Central Point in 1933 and opened the Ashland branch in 1943.

The new buildings will be built on a 660-foot tract of land facing Fourth st. and adjoining the railroad tracks. A long-term lease for the property was obtained from Southern Pacific company.

Don Patterson, general manager, Paul Molloy, assistant general manager, and Carl Fehige, Ashland branch manager, described the co-op's plans at the chamber meeting.

**Concrete Building**  
Plans call for a concrete building 74 feet wide and 120 feet long, which will provide space for the retail store and a warehouse for feeds manufactured at the Central Point mill, as well as fertilizers, steel goods and other farm supplies. The structure is planned to enable patrons to drive inside for loading.

In addition to the main building, an adjoining patio will be constructed to display garden supplies, and an automotive department is planned for retail petroleum, tires, battering and lubrication. Underground storage will be installed for 48,000 gallons of gasoline and diesel and stove oil which is delivered by the Co-op's tank trucks.

Property adjoining the automotive facilities to the south will be developed into a permanent park, the officials reported, and the association plans to develop it into a beauty spot.

**To Call for Bids**  
Patterson said they hope to call for bids about Dec. 1, and that, if plans go on schedule, the project should be completed by late spring. The co-op's present property on Water st. will be sold.

cluded that with the completion of the Talent project, there is substantial growth ahead for this area.

Facilities owned by the association in Central Point and Ashland have an appraised value of \$600,000. Additional warehouse space is planned for Central Point and the combined new construction will represent an outlay of more than \$100,000, Malloy said.

## Extra Patience Leads Man To Jail

Berkeley, Calif.—UPI—Oliver E. Tappen, 39, of Berkeley, is a patient man—but there are times when even patience has its handicaps.

According to police, Tappen entered a department store, approached cashier Nadine Ogden and handed her a note which read:

"This is a holdup. Don't say a word or I shoot. Count \$1500 in 10s and 20s and place in one of your money sacks and give me."

Mrs. Ogden handled the situation in the usual manner. "Hmm," she said, "Won't you please have a seat?"

The cashier handed the note to the head of the department, and he notified authorities. Tappen was still sitting patiently waiting for service when police arrived to escort him to jail.

## HAVE ATOMIC PUNCH

Seoul, Korea—UPI—Gen. I. D. White, U.S. Army commander in the Pacific, said the North Korean Communists may have atomic capabilities. White arrived here for a four-day inspection of U.S. military installations.

## STRIKE FORCES LAYOFF

New York—UPI—Continental Can Co. said that the steel strike has forced it to lay off about 1,400 workers which is less than 3 per cent of its total work force.

# CRATER OSTEOPATHIC HOSPITAL

Between 2nd and 4th Streets . . Central Point, Oegon

**NOW you can be a part of this fine Hospital—Send for your information TODAY!**

### The Hospital...

In the very heart of the beautiful Rogue River Valley will soon rise a splendid, new 29 bed hospital—modern in every respect—and built on the plan of easy expansion to keep pace with the rapid growth of this picturesque area.

The 12,000 square feet of floor space in this functional, spacious hospital is all on the ground floor, thus making for efficiency and patient comfort.

This up-to-date Osteopathic Hospital will be completely air conditioned the year round and has met the requirements of the State Board of Health and the State Fire Marshal.

### The Services...

Crater Osteopathic Hospital will render complete hospital services including:

- Surgery
- Obstetrics
- Osteopathic Manipulative Therapy
- Physical Therapy
- Modern X-ray and Clinical Laboratory
- Separate emergency room
- Oxygen available to all rooms

The rooms will be light, airy and pleasant—equipped with free TV with individual controls and pillow speakers. Everything for the comfort of the patient is being included in the plans. For example—to insure quiet—the laundry, heating and cooling equipment and the work shop are all to be housed in a separate building adjacent to the hospital.

An important policy of management is that the new hospital will be open to all doctors in good standing, licensed to practice medicine by the Oregon State Medical Board.

### Osteopathy...

Osteopathy is an old school of medicine having been started by Dr. Andrew Taylor Still in 1874. This School of Medicine, or the art and science of prevention, diagnosis and treatment of disease and injury, majors in manipulation and includes drugs, obstetrics, surgery and other branches of the healing arts.

### Hospital Financing...

All of the 400 Osteopathic Hospitals in the U.S., with one exception, have been built by private capital—and such is the case at Crater.

To meet the financial needs—and in addition to substantial investment by Dr. Rutter—the Hospital Corporation is offering to the Oregon public \$100,000 of 5% unsecured bonds (\$100 denominations) maturing over a period of 5 to 10 years. The principal sum to be retired on due date with interest paid annually.

Holders of these \$100 bonds may, on their option, use these bonds for hospital services and such bonds will be redeemed by the hospital, in such instances, at a value of 105%—a fine feature when hospitalization is needed.

All moneys received from the sale of bonds will be held in escrow by the First National Bank of Oregon (Central Point Branch) until such time as sufficient funds are available.

Bonds may be secured at the Medford Osteopathic Hospital, 215 East Jackson street, Medford, Oregon. Phone SP 3-3643.

Crater Osteopathic Hospital is being conceived, built and furnished entirely by Southern Oregon contractors, architects and suppliers.

This offer only for Oregon Residents.

### The History...

The present Medford Osteopathic Hospital at 215 E. Jackson was started in 1935 by Dr. W. W. Howard. At that time it was comprised of only 9 beds.

On July 1, 1953, Dr. Paul Rutter purchased the hospital and immediately raised it to full hospital status by increasing its capacity to 17 beds. Included in the improvement was a large, modern X-ray machine, complete laboratory and a commercial laundry.

Dr. Rutter and staff have now found that they have outgrown the present facility and daily feel the need of a larger building with complete and modern facilities and greater bed capacity. With the growth of Osteopathy, nationally and in Southern Oregon, Dr. Rutter and his associates believe the time is now right for the development of the new and spacious Crater Osteopathic Hospital.

## YOU Can Participate

Here is your opportunity to learn how you can share in the growth of Crater Osteopathic Hospital. You can now purchase bonds in \$100 denominations that will mature over a period of 5 to 10 years. At any time, you can redeem your bonds for 105% of face value. An additional dividend is yours with your option to use bonds for hospital services—a fine hospitalization feature for you and your family. Clip and mail this blank for additional information.

Please send me additional information on how I may invest in Crater Osteopathic Hospital. I understand that this information blank in no way obligates me.
