Can't Sleep?

Until recently, the only way to induce sleep was to drug the mind. Now comes safe, hospital-tested Dormin, using the newest sleeping principle. With Dormin you have nothing to fear—no dangerous narcotics, no habit-forming barbiturates, no tranquilizers. Yet Dormin was proved remarkably

effective in 9 out of 10 clinical cases.

Try one or two Dormin capsules as directed. Clinical studies show that is usually enough to bring sleep quickly. Ask for Dormin, the original sleeping capsule—no prescription needed. Only \$1.00 at all good drug stores.

Guarding the Gold Nat Bradford

Here is a game to play when the first snow falls. Make a circle in the snow about 8 feet across. Have a small pile of soft snowballs in the center of the circle (don't use icy snowballs). One player stands guard in the circle. The other players are outside. Each player tries to break into the circle and steal a snowball, crying as he enters "Rix-Rax-Rox! I come to Fort Knox. I'm here in the cold searching for gold!" The guard chases each invader and tries to tag him, or even wash his face in the snow. The first player tagged has to be guard for the next game.

Cuckoo Clock

Frances W. Keene

There are two sets of definitions below the clock. Starting at 12 o'clock, try first to guess the clockwise words. Write the words in the squares around the clock face. If you can't guess all the clockwise words, try the counterclockwise ones. The last letter of each word is the first letter of the next word.

Clockwise (to the right and around)	Counterclockwise (left and around)
