

Shrinks Hemorrhoids New Way Without Surgery

STOPS ITCH RELIEVES PAIN

For the first time science has found a new healing substance with the astonishing ability to shrink hemorrhoids and to relieve pain—without surgery.

In case after case, while gently relieving pain, actual reduction (shrinkage) took place.

Most amazing of all—results were so thorough that sufferers made astonishing statements like "Piles have ceased to be a problem!"

The secret is a new healing substance (Bio-Dyne*)—discovery of a world-famous research institute.

This substance is now available in suppository or ointment form under the name Preparation H.* Ask for it at all drug counters—money back guarantee. *Reg. U. S. Pat. Off.

"My Back Was Killing Me"

Now, More Positive Pain Relief with Direct-Action Kidney Drug

Backache—stabbing pain—are often associated with faulty kidney function. DeWitt's Pills now have a combination of drugs with direct diuretic action to help keep kidneys clean of acid wastes that so often cause back pains, mild bladder irritation, getting up nights, loss of energy—even muscular pains. These drugs, combined in a new formula, give more positive relief than ever before! So effective, you even see they're at work—when "the blue comes through." With kidney function improved, DeWitt's helps you have more pain-free days, more restful nights.

DeWITT'S PILLS

**MOMMY!... MOMMY!...
MOMMY!**

To mothers, that cry means that there's another cut, scratch, scrape, or burn. It also means she should get iodine—but she often doesn't, because iodine burns and stings, upsets youngsters. Here's good news. Science has discovered a new kind of iodine that stops infection best yet doesn't burn or sting. It's polyvinylpyrrolidone-iodine, found only in ISODINE® ANTISEPTIC. Where other types of antiseptics may kill only 1, 2, or 3 types of germs, ISODINE kills all types—even virus and fungus. And up to 40 times faster. Get painless ISODINE ANTISEPTIC. Money-back guarantee.

Answer to the Cuckoo Clock Puzzle

FOUR-FOOTED PATROLMEN

by OMER HENRY

IN JANUARY, 1957, the Baltimore Police Department adopted a new anticrime weapon. This was an original and dramatic move, for no other city in the United States had tried out this means of fighting crime.

During the first month of its operation, the city's crime rate fell 26.9 percent below that of the same period in 1956. And for the entire year of 1957, while the national crime rate was higher than in 1956, Baltimore's figure was 13 percent lower.

Is this new weapon very expensive? Happily, it isn't. Its total added cost in Baltimore during the first year of its operation was \$13,670.

Better still, this anticrime weapon is available to every town and city in the United States—and at a similar low rate.

What is it?

The K-9 Corps. This consists of Maj. L. Wilson Davis, 21 regular police officers, and 21 husky, well-trained German shepherd dogs.

The Baltimore Police Department has learned that nothing on earth will strike fear of the law into hoodlums like a 140-pound German police dog triggered to snarl, pursue, leap, and bite.

How did the K-9 Corps originate?

In December, 1956, a Baltimore newspaper printed an article about the use of police dogs in London. Rex, one of the animals, was instrumental in the arrest of 120 individuals. During 1956, London's 300 dogs aided in arresting 1,168 lawbreakers.

Shortly after the article appeared, Police Commissioner James M. Hepburn let it be known that he was considering using police dogs in Baltimore. Major Davis volunteered to put the program into effect.

The skillful trainers of Baltimore's K-9 Corps teach dogs uncanny control. The moment an order is issued they obey.

For more than 20 years, Major Davis had been interested in obedience work with dogs. During World War II he set up the Marine Corps dog-training program and served as officer in command of the Marine Corps War Dogs, Fleet Marine Force Pacific.

Major Davis invited all members of the police force to volunteer for work in the K-9 Corps. He explained that he would accept only men who were genuinely interested in the program and had good records with the department.

"I made it clear," he says, "that the officer would be responsible for the care and training of his dog and that the two would work together as a team."

Since the dog was to live at the officer's home, Major Davis selected only policemen with adequate yard space to house and care for a dog. "Also," he says, "I made certain that the officer's wife thoroughly approved having a dog at the house."

Many policemen applied for transfer to the K-9 Corps, and Major Davis carefully considered each applicant. The best trainers, he knew, are men who have worked with dogs. A high percentage of the really superior trainers, he says, come from farms where they have handled hunting dogs.

Major Davis approved for transfer to the K-9 Corps only men with high intelligence, excellent character, outstanding physical ability, and a definite skill with dogs.
