Japan Gets Supply Of Natural Uranium

Vienna (Science Service)—The first uranium supply transaction to be completed by the International Atomic Energy agency here gave Japan three tons of natural uranium that were supplied to LAEA without cost by Canada. The Japanese Government paid \$107,991 for the 3,042 kilograms, which will be used in a ten-megawatt reactor. IAEA will continue to be associated with the Japanese project through the application of safeguards with respect to health and safety and to prevent diversion of the natural uranium to non-peaceful uses.

INCOME TAX SEE-SAW

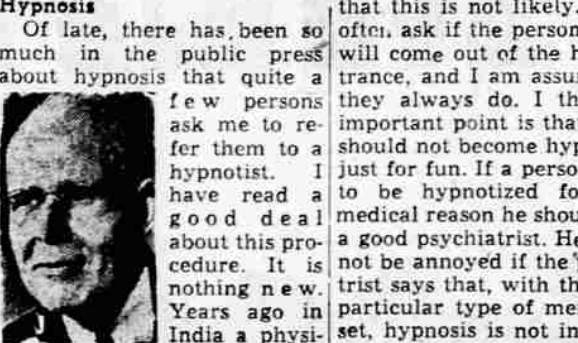

Although Oregon had a successful income tax on both individuals and corporations in 1923, it was repealed by a vote of the people in 1924. In 1927 the Legislature enacted much the same law, but on referral it also was defeated by popular vote. The present Personal Income Tax and Corporation Excise Tax Laws were enacted in 1929.

Hypnosis
Of late, there has been so much in the public press about hypnosis that quite a few persons ask me to refer them to a hypnotist. I have read a good deal about this procedure. It is nothing new. Years ago in India a physician performed many operations on persons who had been hypnotized. Today, some anesthetists are using the technic to help patients to "go under" without fear.

Experts tell us that hypnosis is not true sleep. This is shown by the fact that the electroencephalograms (the tiny electric currents which are constantly running in the brain) do not change in hypnosis as they do in sleep. As we all know, some people can be hypnotized easily while others cannot. Some animals can be hypnotized easily.

Psychiatrists use hypnosis sometimes in an effort to get a better history out of a patient who is reluctant to tell of his or her shameful behavior. At other times, they use the technic to give a strong suggestion to the patient. Able psychiatrists have told me that they do not care to use hypnosis as the only form of treatment for a patient, but they will, if they think it wise, use it in the course of their treatment.

Use on Stage Unwise
Today, experts agree that the use of hypnosis on the stage just to amuse an audience is unwise. There have been cases in which such hypnosis has done great harm to the particular young man or woman. Doubtless, the person was unstable to begin with, I have received a number of letters from people who have said that their daughter or son was never the same again after hypnosis up on a stage.

Many people wonder if a person who is hypnotized could be caused to commit a crime, and experts tell me

can bring disaster. Some of these men now write to say that their physician has suggested that they have their tubes tied — the tubes which carry the semen from the testicles up to little reservoirs at the base of the bladder. The doctors assure them that the operation can do no harm, and certainly will not change their sexual interest or power in the slightest. The doctors tell them that the operation is a minor one that can be done in an office, and one that is immensely easier and safer

Brittle Finger Nails
Many women ask me what to do for brittle finger nails. It is a common complaint, but I have never seen a satisfactory explanation of it, and I never have heard of a good treatment. Some doctors give calcium, but I have seen many cases in which this didn't help. A while ago an old doc-
