

**MARTIAL LAW**—National Guardsmen use fixed bayonets to dispose a crowd of from 500 to 600 strikers who had massed in front of the Wilson Co. packing plant in Albert Lea, Minn. Martial law has been declared to end rock throwing and other violence by the union demonstrators.

### Only One Touhy Brother Remains

Chicago—(UPI)—Once there were six Touhy brothers, the sons of a Chicago policeman. Now there is one. This is their story:

—James Jr.: Died at age 17 in 1917. Shot to death while committing a robbery.

—John: Died in 1927 in a prohibition era shooting brawl said to have resulted from a battle over disputed beer territory with Al Capone.

—Joseph: Died in 1929, shot to death by a suburban tavern owner while running beer.

—Edward: Disappeared in the 1920s. One story is that he disappeared after a feud with the Capone gang. Another story has it that he died in bed.

—Roger: Died Wednesday night. Shotgunned to death at age 61 less than a month after being paroled from prison.

—Tom: The lone surviving member of the Touhy brothers. Living in Arizona and suffering from Parkinson's Disease. Tom was in jail once—served 4 years for an Indianapolis, Ind., robbery.

### Cells Cited as Missing Link in Arthritis Factor

Detroit (Science Service)—An important missing link in the puzzle of rheumatoid arthritis has been established with the pinpointing of the cells that produce the "rheumatoid factor," a mysterious substance found in the blood of arthritics.

The discovery furnishes medical investigators with a new lead to the study of rheumatoid arthritis and may even provide physicians with a new technique for diagnosing the nation's number one crippling disease.

The rheumatoid factor had previously been identified, isolated and purified, but its origin had been unknown, the American Rheumatism Association meeting here was told.

#### Formation Traced

A research team, headed by Dr. Robert C. Mellors of New York's Hospital for Special Surgery, Philip D. Wilson Research Foundation, has now traced the site of formation of the factor to two kinds of cells found in the body tissues of patients suffering from the disease.

These cells are the plasma cells present in the synovial membrane that lines the joints and the "large pale cells" of germinal centers of lymph nodes.

Dr. Mellor pointed out that inflammation of synovial membrane and subsequent swelling of the joints are

early pathological changes that characterize the disease, and it is in such membrane that the plasma cells are found. Swollen lymph nodes, also characteristic of rheumatoid arthritis, contain the "large pale cells."

It is known that both of these cells produce immune bodies or antibodies—one of the body's defenses against infectious disease.

The significance of Dr. Mellor's investigation lies in the fact that the rheumatoid factor behaves in certain respects like an antibody and that it is formed by cells that produce antibodies.

What remains to be clarified is whether the rheumatoid factor is in fact an antibody and, if so, which agents or materials cause the two types of cells to produce the

#### One-Dish Meal

New York—(UPI)—Aromatic acorn squash makes a one-dish meal. Cut 1 medium-sized squash in half lengthwise. Remove seeds and brush the inside and outside with 2 tablespoons of melted butter. Combine one 4½-ounce can of deviled ham and 2 cups of soft bread crumbs and 2 tablespoons of chopped onion. Fill squash cavities with stuffing, sprinkle with bread crumbs and drizzle with melted butter. Bake about 1 hour in a 350-degree oven. Serves 4.

factor in the first place. Many researchers suspect the rheumatoid factor in several antibodies.

If the rheumatoid factor has a protective purpose, then Dr. Mellor's study might provide a new lead in the search for the agent that is ultimately responsible for rheumatoid arthritis. If the factor has no antibody purpose, then its formation must be viewed as some sort of "metabolic error," he said.

### FBI Seeking Man For Bail Jumping

The federal bureau of investigation is seeking Eldridge Solomon Price on a charge of bail jumping, according to Joseph E. Thornton, special agent in charge, Portland FBI office.

Price, who is considered armed and dangerous, is said to be using a number of aliases, the most frequent being a last name of Winn or Wynn. He is described as white, 67 years old, about 5 feet, 9 inches tall, stocky, with white or gray hair, and he sometimes wears a goatee and close-cropped mustache.

A warrant for his arrest was issued at Atlanta, Ga. Anyone having information concerning Price is requested to bring it to the attention of the FBI, Portland, immediately.

### Nike-Zeus Rocket Test Unsuccessful

Washington—(UPI)—The Army has failed again to test successfully its Nike-Zeus rocket, designed as this country's major defense against Russian ballistic missiles.

The Army launched the mighty anti-missile Wednesday at the White Sands, N.M., proving grounds. The second stage did not fire.

Two previous firings of the two-stage rocket also were less than full successes.

The Army said radio telemetry messages from the latest shot indicated that the first and second stages successfully separated. But it said the sustainer motor of the upper rocket did not ignite.

#### "Say It in . . ."

Kansas City, Mo. — (UPI) — This Yuletide, you can wish your friends "Merry Christmas" in a dozen languages. "Froehliche Weihnachten," you might greet them, in German. Or "Onske for Julen" if they are Norwegian.

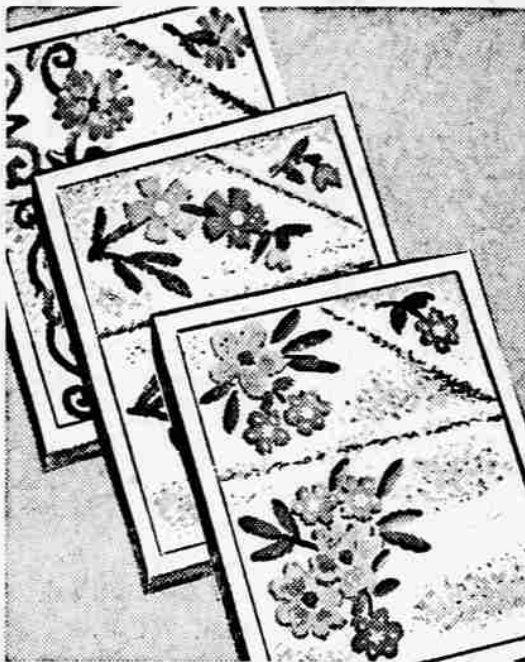

Greetings also are available in French, Spanish, Italian, Polish, Swedish, Hungarian, Slovak, Lithuanian, Croatian and English.
