TELLING SQUIRREL'S AGE

Blacksburg, Va. (UPI)—Wildlife experts at Virginia Tech tell hunters to judge the age of a squirrel by looking at the flattened underside of its tail. Bone showing one-third of the way up the tail means the squirrel is less than six months old and much more tender for stewing. The adult squirrel has a bushier tail.

Juvenile Courts

New York—In 46 of the states, individual cities are authorized to establish courts for juvenile offenders.

Living Beyond Your Heart Attack

I recently read a helpful book on the care of the person who has had a heart attack, written in simple English by Dr. Eugene B. Mozes. It is "Living Beyond Your Heart Attack" (Prentice-Hall, N.Y.). As the author says, many people get over a spell and live on for years; many go back to work; many can drink a little alcohol, but many will do well to stop heavy smoking; many who are fat should reduce; many should cut down in their diet animal fats, and take vegetable oils instead; many should take anticoagulants to keep from getting another attack; many won't have any chest pains or shortness of breath; many should take some exercise like walking and many should avoid blowing their top.

DR. ALVAREZ

Does Castration of Sexual Offenders Help?

I recently read the best report I have seen of legal castration with the idea of putting a stop to sex offenses or calming down the behavior of highly promiscuous women who have an illegitimate child each year – a child the city has to bring up. The book is called "Asexualization," and is by Dr. Johan Bremer (Macmillan). He summarized a careful and detailed study of 244 men and women who were castrated with the hope that this operation would quiet them down. It apparently calmed down some of those men who were inclined to attack children and women. Otherwise it didn't do much good. It usually didn't calm down the promiscuous women, and it didn't improve the sanity of schizophrenics, psychopathic delinquents and degenerated epileptics.

There is some sense to castrating feeble - minded men and women who have an illegitimate and perhaps mentally retarded child every year. The only difficulty with this is that the brothers and sisters of the person with a defective brain easily can be carriers of the defect, and their children can also inherit it. As yet, there is not much chance of getting the brothers and sisters of a degenerate even to avoid having children. They certainly won't consent either to castration or what is harmless and much more logical – sterilization. We doctors have much trouble even in getting some hospital directors to permit a surgeon to tie a man's cords or a woman's tubes. When men refuse to permit this operation, in their community, I would like to ask them, will they dig down into their pockets to support the brood of unwanted, uncared-for and perhaps feebleminded children? Oh, no; that's for the taxpayers to do!

Dr. Alvarez' booklet on cancer may be obtained by sending 25 cents and a large, stamped, self-addressed envelope with your request to Dr. Walter C. Alvarez, Dept. MMT, The Register and Tribune Syndicate, Box 957, Des Moines 4, Iowa.

Forest Products Prices To Be Quoted

Forest products market prices in Jackson and Josephine counties will be published weekly starting this week in the extension service's Farm Forest Products Market report.
