

### Germany Said Building Three Atomic Reactors

Munich (Science Service)—Two atomic reactors, one for research and the other for testing materials, are nearing completion at the Joint Atomic Research establishment of the Land Northrhine-Westphalia, Germany.

A power reactor, order by a cooperative group of German power suppliers, will be erected in the same research area.

The two Research establishment reactors are of the British Merlin and Dido types. They are expected to be in operation by the end of this year.

**'Merlin' and 'Dido'**  
"Merlin" is a water-moderated swimming pool reactor, fueled by enriched uranium. It has 14 irradiation channels.

"Dido" is a heavy-water-moderated reactor, also fueled by enriched uranium. It will have 48 irradiation channels.

Besides the two reactors there will be nine scientific institutes on the research grounds, conducting research in such fields as chemistry, reactor development, nuclear fusion, isotope separation, biology and medicine. The Joint Atomic Research establishment is located at Julich, half way between Cologne and Aachen.

### 'Party Line' Will Hear Chest Sounds

Minneapolis — The party line, to which rural telephone subscribers once had exclusive claim, has been developed into a tool for medical science.

A stethoscope that will enable four doctors to listen in on a patient's chest sounds at the same time will soon be introduced by Miacco Electronics Inc.

The "Stethetron," with four headsets linked to one pickup, is transistorized to amplify heart and chest sounds 10,000 times.

### Railroad Hearing Scheduled Feb. 8

Salem — (UPI) — A hearing by the Oregon public utility commissioner on the application of Spokane, Portland and Seattle railroad to abandon its Vernonia agency has been set for Feb. 8 at Vernonia.

The railroad proposes to handle business transacted at Vernonia station through the SP&S North Plains agent.

### Easy-Knit Set

7232  
by Alice Brooks

Perfect for bun, or ponytail — or pull drawing to cover hair completely! Beginner-easy set.
