

Plot Cruising Short Course Set

Corvallis—A variable plot cruising short course will be held at the Oregon State college school of forestry Feb. 18 and 19, John F. Bell, assistant professor of forest management, who will be in charge, has announced.

The two-day course has been scheduled to allow practicing foresters to learn about the new cruising method that reduces errors and speeds field work. The new method, sometimes called wedge cruising, was developed in Europe and introduced into the United States. It has been field tested in both Douglas fir and pine timber types during the last three years with excellent results, Bell said.

This is the sixth variable plot cruising short course conducted by the school of forestry. Instructors for this course will include Bell, J. R. Dilworth and J. T. Krygier of the forest management department; Norman T. Marsh, Salem, Oregon state tax commission; and Edwin Zaidlicz, bureau of land management, Portland.

Bell is co-author of a bulletin, "Application of the Variable Plot Method of Sampling Forest Stands," published by the Oregon state board of forestry.

Enrollment will be limited to 40, Bell reported, to assure individual instruction. Information about registration, short course content, and other details may be obtained by writing the school of forestry, Oregon State college, Corvallis.

Court Records

MUNICIPAL COURT
Kendall Joe Herndon, transient, driving while under the influence of intoxicating beverages, no operator's license in possession, 60 days.
Herbert Martin Codman, 330 North Front st., assault and battery, 5 days.

Changes in Liability Insurance Are Noted

Changes in liability and property damage insurance policies in connection with swimming pools, outboard motors and "midget" automobiles have been noted by local insurance men.

The changes are in conjunction with a National Rating Bureau ruling, based on increasing numbers of hazards in connection with the three items, they said.

Liability and property damage policyholders who own swimming pools 30 inches or more deep, whether filled to the 30-inch level or not, must declare it in the policy, insurance men said. An additional

82 Alarms Turned In To Firemen

The city fire department responded to 82 alarms in December, 1959, and the rural fire district responded to 10, according to the fire department's monthly report.

House fires accounted for the majority of the alarms in both districts, 43 reported to the city and six to the rural district.

Firemen found flue fires at the greatest number of house fires reported. Of the 43 house fires in the city, 23 were flue fires, and of the six in the rural district, three were flues.

The city fire department also responded to four business occupancy fires, 10 trash fires and received five false alarms.

The rural district had one sawmill fire, one trash fire and no false alarms.

The fire marshal made 60 inspections in December, 29 of them in business occupancies. He made 72 orders or recommendations for the removal of fire hazards and 107 hazards were removed.

A total of 239 fire permits were issued last month, according to the report.

premium is charged at renewal, they added.

Outboard motors over 10 horsepower, or two or more motors whose cumulative horsepower exceeds 10 horsepower, must be declared if they are used on a single craft so the policyholder will still have coverage.

Charged on Motor

If the policyholder owns two motors, each of more than 10 horsepower, he is charged a premium on each motor. If he owns two motors used in tandem on the same boat and the combined horsepower exceeds 10 horsepower the premium is based on the combined horsepower, insurance representatives said.

If the policyholder uses a boat or motor belonging to someone else, he may be liable for damage to the boat and motor "in your care and custody," they added.

Personal liability policies do not protect the policyholder who owns a "midget" automobile away from the premises. To have protection, the vehicle must be declared, and an additional premium will be charged for bodily injury, property damage and medical payments coverage, the insurance men said.

The restriction applies to all "midget" automobiles, which also are known as "kart," "go-Kart," or "speedmobile," of the land motor vehicle type, whether home-made or not. To have coverage off the premises such a vehicle must be specifically insured, they said.

The first American turnpike, known as Little River Turnpike was authorized in Virginia in 1785. Today, Americans travel on over 750,000 miles of highway. To familiarize motorists with the luxury and comfort of driving a new car, auto manufacturers last year spent over \$80 million in newspaper advertising.

First international Postal Congress was held in Switzerland in 1874.

WINE COLORS

Fresno, Calif. - Red wine can be made from white grapes and conversely white wine can also be made of red grapes.

A new Lincoln penny will appear soon. More than 25,000,000,000 Lincoln pennies of the present design have been minted in the last 50 years.

DRAFT RATIO

Washington - Only one of eight men registered for the draft in World War I actually became a member of the nation's armed military forces.

Oil accounts for \$1,400,000,000 worth of all heating fuels used in the United States homes, gas for \$1,600,000,000 and coal and other fuels for \$1,000,000,000.

ORCHESTRA AGE

New York - New York's Philharmonic symphony orchestra is said to be the third oldest in the world and is the oldest in the United States.

Lady Aberdeen, wife of Canada's Governor - General in 1893-98, helped establish the National Council of Women and Victorian Order of Nurses.

When You Look at Your . . .

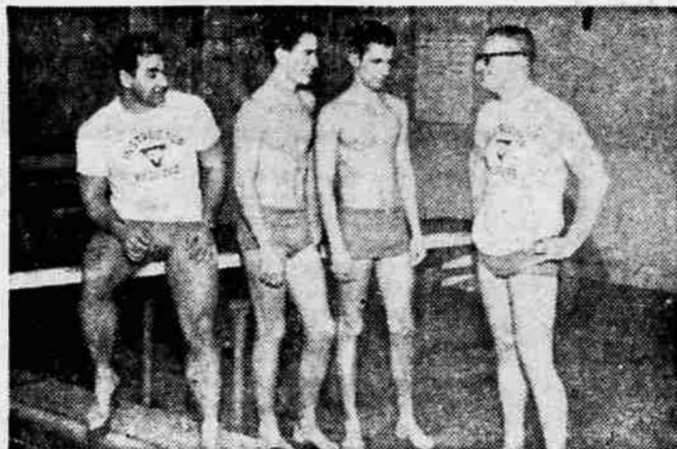

Y M C A

the FUTURE looks GOOD!

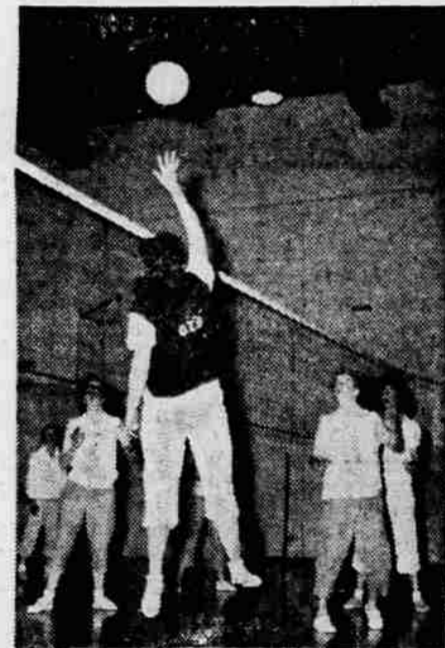

Your investment in the YMCA is an investment in the FUTURE of your children. Whatever you invest in the YMCA pays dividends. Family fun can be yours for a Full Year at less than 77c per week. Where else can you find a complete activity program that fits the needs of every member of your family AT THIS PRICE? Join the YMCA today!

Visit your YMCA today during YMCA OPEN HOUSE and see a sample of the varied program of activities your YMCA can now offer. Bring your family and join your friends at the "Y" today.

SPIRIT

Most people recognize the Y.M.C.A. by its familiar triangle. The three sides of this triangle symbolize SPIRIT, MIND and BODY. Since 1844 the "Y" has been instrumental in helping individuals develop spiritual fitness and moral integrity. The "Y" emphasizes Reverence for God, Respect for Personality, Responsibility for the Common Good and The Application of the Golden Rule. Your membership helps make this work possible.

MIND

Mental Fitness is an important part of your Y.M.C.A. purpose. Every Y.M.C.A. is a self-governing group controlled and operated by laymen in each community. "Y" committees offer individuals great opportunities to develop their community by clear, careful thinking. Club programs are offered youth at all grade levels and give our youngsters a supplementary education program that is aimed at the application of the theories they learn in school.

BODY

Perhaps the most publicized aspect of the Y.M.C.A. is its Physical Education program. The "Y" has constantly been a leader in this area. Basketball, Volley Ball, Swimming Instruction and Professional Football all grew out of Y.M.C.A. sponsorship. Today your Y.M.C.A. is equipped fully to take care of your physical needs and development. See these activities in progress today at your Medford "Y".

An Invitation

From
